HAND TOOLS

A hand tool is any tool powered by hand rather than a motor. They offer more precise control and are often used when power tools are too cumbersome or the job requires less force. Categories include clamps, crimpers, hammers, knives, pliers, and wrenches.

WILLIAMS

POWER TOOLS

Power tools use an electric, battery-powered, hydraulic, or pneumatic power source. They are used for tasks that are repeated or when high force and speed are required.

SAFETY & SECURITY

Industrial safety & security products are there to help facilities and workers stay protected from hazards that could cause injury. They range from PPE (Personal Protective Equipment) products, first aid, traffic control, spill containment, facility identification, and more.

TAPES, ADHESIVES & SEALANTS

Industrial tapes are used for bonding, sealing, masking, packaging, and wrapping. An adhesive is used mainly in applications needing to bond surfaces together in a functional manner while sealants are used to seal the spaces in a joint creating an air and watertight finish.

TESTING & MEASURING

Precision testing and measuring tools are used in the industrial world for inside, outer and linear measurements. Common types include micrometers, slide calipers, height gages and depth gages. Available in analog or digital.

T&A Industrial's commitment to helping you create a stronger workforce is demonstrated by the wide range of additional services and product categories that we offer. Our products can help increase your competitiveness in your industry, improve safety in your work practices, and make it easier for employees to do their jobs more efficiently.
