

A Perfect Finish

3M™ Perfect-It™ Paint Finishing System

DEFECT REMOVAL P1500

To remove dirt nibs and level excess surface texture over large or small areas, use the following fine grade abrasives:

3M™ Purple Finishing Film Disc, P1500, PN 30667

- Use dry to highlight surface defects, then remove.

3M™ Trizact™ Clear Coat Sanding Disc, P1500, PN 02088

- Use damp for long life and reduced 'pigtail' marks.

3M™ Wetordry™ Sheet, 2000, PN 02044

SCRATCH REFINEMENT P3000

To reduce compounding time, refine the remaining scratches using the following abrasive:

3M™ Trizact™ Hookit™ Foam Disc, P3000, PN 02085

- Use damp to reduce compounding time.

Removing P1500 scratches means less time compounding.

P3000 abrasive is required prior to using 5000 abrasive.

SCRATCH REFINEMENT 5000

For the best results and ultimate finish, further refine the P3000 scratches using the following abrasive:

3M™ Trizact™ Hookit™ Foam Disc, 5000, PN 30662

- Use damp.

Removing P3000 scratches means even less time compounding.

Do not use in place of P3000. P3000 abrasive is required prior to using 5000.
