

RMX mixing stand

Mixing without effort

Video on Youtube

RMX with Xo 55 duo raised to the maximum height

Standard delivery without machine and mixing bucket

Mixing without physical strain

The RMX takes the equipment load off your hands during mixing. A particular advantage is the gas-pressurized spring, which enables the swivel arm to be raised and lowered with ease.

Attractively priced alternative

The mixer stand costs far less than an automatic mixing machine. However, the hand-held mixer has to be guided by hand during mixing because automatic mixing is not possible.

Rugged design

For tough daily use on the building site, securely supported on 4 strong legs.

Easy handling

Can be set up and taken down in just a few moves.

Easy to transport

Light in weight and complete with carrying handle.

Suitable for all Xo-R / Xo-R duo hand-held mixers

Technical data | RMX mixing stand

Dimensions (bxh) transport position	455 mm x 900 mm
Dimensions (lxbxh) set up	455 x 455 x 1360 mm
Weight (without mixer)	17 kg
Max. height mixing bucket	450 mm
Article no.	45624

Carrying handle

Xo 55 R duo

Xo 33 R duo

Benefits Xo 33 R duo & Xo 55 R duo

- **Counter-rotating mixing tools:** No counter-torque acting on the user makes for light work with less physical effort.
- **Forced-action mixing effect:** For mixing all types of materials, including viscous and heavy materials, quickly and thoroughly.
- **Electronic speed control:** Infinitely variable for smooth power transmission.
- **Rubber buffer** for a secure machine drop down
- **Work with a straight back:** Handles are positioned further up for a body posture which takes the strain off your back.
- With **stirrers in different colors**, so they can be fitted easily and correctly
- **Rubber protective sleeve** keep the coupling clean and in good working order; changeable.
