The World

A complete range of quality high force tools for all industrial applications, with local availability and after sale service anywhere in the world.... this is what has made Enerpac the undisputed global market leader in high pressure hydraulics.

Across every continent, Enerpac's network of authorized distributors and service centers can reach even the most remote locations, supplying and servicing products that are designed to enhance productivity and performance, while making the workplace safer.

With over 150 sales specialists and a network of service and engineering support in 17 countries across the globe, Enerpac has become the product of choice in industries such as manufacturing, construction, energy, oil & gas, shipbuilding, railroads, mining, and metals transformation.

Always at the leading edge of technology, Enerpac has continued to develop its range of time and cost-savings tools, utilizing modern engineered materials to improve productivity and minimize operator fatigue.

Enerpac's commitment to the continued development of quality high force tools ensures that the products you purchase are the best tools in the industry. We will continue to lead the way in the development of quality high force tools for all industrial applications.

Class Brand

10 Reasons to Work with Enerpac

- Expert Design
- Highly Reliable
- Service Excellence
- Worldwide Experience
- Application Support
- Availability
- Quality
- Value
- Innovative Products
- Systems Solutions

Total Quality

Our products are tested to the most exacting standards. These high standards guarantee the quality, price and performance requirements of the markets we serve around the globe.

Global Network

Enerpac has an extensive network of authorized distributors and service centers located in more than 90 countries worldwide. You can rely on Enerpac for the products and technical support you need to get your job done, anywhere in the world.

Logistics Excellence

Enerpac's mission is to maintain service excellence in the ever-changing world of modern distribution. Providing our extensive range of products to our thousands of distributors worldwide demands a logistic expertise only a market leader can provide.

A Tradition of Innovation

Enerpac has a long history of finding new solutions to better meet the challenges of the industries we serve. We were the first to develop a composite hand pump and the first to offer a computerized lifting system. Our latest innovations include the XA-Series of air driven foot pumps, designed for less operator fatigue - with the unique XVARI® technology, delivering variable oil flow and fine metering for precise control, a full range of aluminum and steel cylinders with the strength of steel and the advantages of aluminum and the Z-Class series of power pumps... pumps that were designed to run cooler, use less electricity and are easy to service.

To support the demands of the construction industry, Enerpac continues to develop Integrated Solutions capabilities. These capabilities include controlled hydraulic movement for your most challenging applications.

ENERPAC 
POWERFUL SOLUTIONS. GLOBAL FORCE.

ENERPAC hydraulic cylinders are available in hundreds of different configurations. Whatever the industrial application... lifting, pushing, pulling, bending, holding... whatever the force capacity, stroke length, or size restrictions... single- or double-acting, solid or hollow plunger, you can be sure that Enerpac has the cylinder to suit your high force application. Enerpac jacking cylinders fully comply to ASME B30.1 (except RD-Series).

GR2 Bearing Technology

The exclusive GR2 is a unique bearing design on RC-Series DUO cylinders which absorbs eccentric load stresses to protect your cylinder against abrasion, over-extending or plunger blow-outs and jamming or top-end mushrooming. As a result, RC-Series DUO cylinders provide long, trouble-free operation.

Easy assembly and disassembly using only standard shop tools.

Heavy-duty, pre-tensioned spring improves retraction rate for enhanced productivity.

Unique GR2 Bearing System surrounds the seal of longer stroke models resulting in improved side-load resistance and extended operating life.

Additional shape and texture to the **cylinder thread protector** and pliable plug-in/pop-off coupler cap for easy operation with gloved and oily hands.

Note: The cut-away drawing is representative of typical cylinder construction and may not represent all cylinders in this section.

Cylinder & Lifting Products Section Overview

* Capacity (tons)	Stroke Range (in)	Cylinder Type and Functions	Series		Page
5-100	.63-14.25	General Purpose Cylinders, Single-acting Cylinder Accessories 	RC-DUO		6 ▶ 10 ▶
20-150	1.97-9.84	Aluminum Cylinders Single-Acting, Solid Plunger, Lock Nut, Hollow Plunger 	RAC RACL RACH		12 ▶ 14 ▶ 16 ▶
20-150	1.97-9.84	Aluminum Cylinders Double-Acting Solid Plunger 	RAR		18 ▶
5-500	.25-2.44	Pancake and Low Height Cylinders, Single-Acting 	CLP RSM RCS		20 ▶ 22 ▶ 23 ▶
2.5-60	5.00-6.00	Pull Cylinders, Single-Acting 	BRC BRP		24 ▶
12-150	.31-10.13	Hollow Plunger Cylinders Single- and Double-Acting 	RCH RRH		26 ▶ 28 ▶
4-25	1.13-10.25	Precision Production Cylinders, Double-Acting 	RD		30 ▶
10-500	2.25-48.00	Long Stroke Cylinders, Double-Acting 	RR		32 ▶
50-1000	1.97-11.81	High Tonnage Cylinders Single-Acting (S/A), S/A with Mechanical Locknut, Double-Acting 	CLSG CLRG CLL		36 ▶ 40 ▶ 44 ▶
7-150 2-100	3.00-6.13 3.94-18.11	Aluminum and Steel Jacks Industrial Bottle Jack 	JHA/JH GBJ		48 ▶ 49 ▶
60-200	14.0-27.0	POW'R-RISER® Lifting Jack	PR		50 ▶
5-25	2.0-6.0	Extreme Environment Products (Valves, cylinders, hand pumps) 	RC P V		52 ▶
5-100	1.50-14.25	Cylinder - Pump Sets (Single-Acting) 	SC		54 ▶

* All cylinder capacities are nominal values, unless otherwise stated. [Maximum] capacities are theoretical and may vary, depending on cylinder condition and application.

▼ Shown from left to right: RC-506, RC-50, RC-2510, RC-154, RC-10010, RC-55, RC-1010

- Unique GR2 Bearing Design, reduces wear, extending life
- Collar threads, plunger threads and base mounting holes enable easy fixturing (on most models)
- Designed for use in all positions
- High strength alloy steel for durability
- Redesigned cylinder thread protector for ease of use
- Heavy-duty, pretensioned spring improves retraction speed
- Baked enamel finish for increased corrosion resistance
- CR-400 coupler and dust cap included on all models
- Plunger wiper reduces contamination, extending cylinder life

▼ Stage lifting set up in Greece, where assembled pipes, 82 feet in length, were stage lifted with six RC-2514 cylinders.

The Industry Standard General Purpose Cylinder

Saddles

All RC cylinders are equipped with hardened removable grooved saddles. For tilt and flat saddles, see the RC-Series accessory page.

Page: 10

Base Plates

To ensure the stability of cylinders for lifting applications, base plates are available for 10, 25 and 50 ton RC cylinders.

Page: 10

Specialty Attachments

For solving all kinds of application problems, specialty attachments are available for 5, 10 and 25 ton RC cylinders.

Page: 162

▼ RC cylinder mounting attachments greatly extend the application possibilities (available for 5, 10, 15 and 25 ton cylinders).

Single-Acting, General Purpose Cylinders

GR2 Bearing Technology

The exclusive GR2 is a unique bearing design on RC-Series DUO cylinders which absorbs eccentric load stresses to protect your cylinder against abrasion, over-extending or plunger blow-outs and jamming or top-end mushrooming. As a result, RC-Series DUO cylinders provide long, trouble-free operation.

▼ QUICK SELECTION CHART

For complete technical information see next page.

Cylinder Capacity	Stroke	Model Number	Cylinder Effective Area	Oil Capacity	Collapsed Height	Weight

The Enerpac Lightweight Aluminum Cylinders

▼ Shown: RAC, RACL, RACH, and RAR

RA Series

Capacity:
20-150 tons

Stroke:
1.97-9.84 inches

Maximum Operating Pressure:
10,000 psi

Think Safety
Manufacturer's rating of load and stroke are maximum safe limits.

Good practice encourages using only 80% of these ratings!

Page: 242

- Lightweight, easy to carry and position to allow a higher cylinder capacity-to-weight-ratio
- Non-corrosive by design, aluminum has always been a good material for use in many caustic environments
- Composite bearings on all moving surfaces guarantee **NO** metal-to-metal contact, to resist side loads and increase cylinder life

Aluminum vs. Steel

Aluminum cylinders, while offering the most lightweight solution also have some unique limitations due to material properties. It differs from steel in that it has a lower finite fatigue life. Aluminum cylinders should **NOT** be used in high-cycle applications such as production.

These cylinders are designed to provide 5000 cycles at their recommended pressure. **This limit should not be exceeded.** In normal lifting and many maintenance applications, this should provide a lifetime of use.

1. **Removable Hardened Saddle** protects plunger from being damaged by abrasive surface contact.
2. **Stop Ring** on all models absorbs eccentric loading and prevents plunger over-extension.
3. **Composite Bearing** material to prevent metal-to-metal contact, reducing side-load issues and increasing life.
4. **Hard-coated Plunger and Base** resist wear and prevent galling.
5. **7075-T6 Aluminum Alloy Components** for maximum strength and minimum weight.
6. **Plunger Return Spring** on all single-acting models for prompt cylinder return.
7. **Standard Steel Base Plate** protects cylinder base from abrasive surfaces.

▼ Shown from left to right: RAC-508, RAC-1506, RAC-304, and RAC-206

Lightweight for Maximum Portability

Saddles

All RAC cylinders are equipped with bolt-on removable saddles of hardened steel.

Lightweight Hand Pumps

Enerpac hand pumps **P-392** or **P-802** make the optimal lightweight set.

Page: **58**

- Composite bearings prevent metal-to-metal contact, increasing cylinder life and resistance to side-loads of up to 10%
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Handles included on all models
- Steel baseplate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High-strength return spring for rapid cylinder retraction
- CR-400 coupler and dustcap included on all models
- All cylinders meet ASME B-30.1 and ISO 10100 standards

◀ Enerpac lightweight aluminum RAC-506 cylinders are ideal for wet environments such as this tunnel under the river (Holland High-Speed Train Line).

* Custom strokes available.

Single-Acting, Spring Return Cylinders

Steel Base Plate

The steel base plate protects the cylinder base from damage, it should not be removed.

The base holes in these aluminum cylinders are designed for securing the steel base plate. **They will not withstand the capacity of the cylinder.**

Do not use the base holes in these aluminum cylinders to attach any device to the cylinder.

Capacity:

20-150 tons

Stroke:

1.97-9.84 inches

Maximum Operating Pressure:

▼ Shown from left to right: RACL-1006, RACL-504 and RACL-506

- Aluminum Lock Nut provides mechanical load holding for extended periods
- Hardened steel stop ring increases cylinder life and resistance to side-loads of up to 5%
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Composite bearings increase cylinder life and side load resistance
- Handles included on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High-strength return spring for rapid cylinder retraction
- CR-400 coupler and dustcap included on all models
- All cylinders meet ASME B-30.1 and ISO 10100 standards

◀ The portable Lock Nut cylinder RACL-1506 used for extended load support during epoxy injection for bridge reinforcement.

To Secure Loads Mechanically

Saddles

All RACL cylinders are equipped with bolt-on removable saddles of hardened steel. For tilt saddles see next page.

The Lightweight Solution for Tensioning and Testing

Saddles

All RACH-cylinders are equipped with bolt-on removable hardened steel hollow saddles.

Lightweight Hand Pumps

Enerpac hand pumps **P-392** or **P-802** make the optimal lightweight set.

Page: 58

- Hollow plunger design allows for both pull and push forces
- Composite bearings increase cylinder life and side load resistance
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Handles included on all models
- Floating center tube increases seal life
- Steel baseplate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High-strength return spring for rapid cylinder retraction

◀ An RACH-306, powered by a P-392 hand pump, is used to extract corroded carriage pins from refuse collection vehicles.

The Lightweight Solution for Double-Acting Applications

Saddles

All RAR-cylinders are equipped with bolt-on removable hardened steel saddles. For tilt saddles see next page.

Page: 19

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: 114

- Double-acting for rapid retraction, regardless of hose lengths and system losses
- Composite bearings increase cylinder life and side load resistance
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Handles included on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- Built-in safety valve prevents accidental over-pressurization

◀ An RAR-506 was easy to position under a bulldozer for repair of frame member.

* Custom strokes available.

Double-Acting, Aluminum Cylinders

Steel Base Plate

The steel base plate protects the cylinder base from damage, it should not be removed.

The base holes in these aluminum cylinders are designed for securing the steel base plate. **They will not withstand the capacity of the cylinder.**

Do not use the base holes in these aluminum cylinders to attach any device to the cylinder.

Capacity:
20-150 tons

Stroke:
1.97-9.84 inches

Maximum Operating Pressure:
10,000 psi

▼ Shown from left to right: CLP-4002, CLP-5002

The Shortest Power Lifter

- Flat design for use in confined areas
- Safety lock nut for mechanical load holding
- Single-acting load return
- Special bearing design resists sideload forces
- Overflow port functions as a stroke limiter
- CR-400 coupler and dust cap included on all models

Saddles

All CLP-Series cylinders include integral tilt saddles with maximum tilt angles up to 5°.

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the

System Components section for a full range of gauges.

Page: 113

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: 114

▼ Only the extreme low height CLP-cylinder fits in this confined area to lift the construction. The V-82 needle valve is used to control cylinder speed during lifting and lowering.

Cylinder Capacity (ton) [maximum]	Stroke (in)	Model Number	Cylinder Effective Area (in ²)	Oil Capacity (in ³)
60 [67.1]	1.97	CLP-602	13.42	26.42

Single-Acting, Pancake Lock Nut Cylinders

Speed Chart

See the Enerpac Cylinder Speed Chart in our "Yellow Pages" to determine your approximate cylinder speed.

Page: 251

Longer Stroke Lock Nut Cylinders

For lock nut applications that require longer stroke lengths, see **CLL-Series** cylinders.

Page: 44

CLP Series

Capacity:

60-500 tons

Stroke:

1.77-1.97 inches

Maximum Operating Pressure:

10,000 psi

CLP-4002, CLP-5002

CLP-602, CLP-1002,
CLP-1602, CLP-2002,
CLP-2502

All CLP-series cylinders require a solid lifting surface for correct support.

Use of pancake cylinders on surfaces such as sand, mud or dirt may result in cylinder damage!

For more safety instructions see our "Yellow Pages".

Maximum Power to Height Ratio

Saddles

All **RCS-Series** cylinders have plunger mounting holes for installation of tilt saddles. See table for selection and dimensional information.

Page: **23**

Low Clearance Lifting

The **LW-16** Lifting Wedge and **SOH-Series** Machine Lifts are the perfect choices for lifting loads that have low clearance.

Page: **159**

RSM-Series, Flat-Jac® Cylinders

- Compact, flat design for use where other cylinders will not fit
- RSM-750, 1000 and 1500 have handles for easy carrying
- Mounting holes permit easy fixturing
- Baked enamel finish for increased corrosion resistance
- CR-400 coupler and dust cap included on all models*
- Hard chrome plated high-quality steel plungers
- Grooved plunger ends require no saddle
- Single-acting spring return

RCS-Series, Low Height Cylinders

- Lightweight, low profile design for use in confined spaces
- Baked enamel finish for increased corrosion resistance
- Plunger wiper reduces contamination, extending cylinder life
- CR-400 coupler and dust cap included on all models
- Grooved plunger end with threaded holes for mounting tilt saddles
- Integral handle on RCS-1002 for easy carrying
- Plated steel plungers
- Single-acting spring return

▼ Only a couple of inches are needed for an RSM-cylinder to lift this large steel construction.

Note: BRP-106C, BRP-106L and BRP-606 are fitted with rubber bellows for rod protection.

*Available as a set. See note on previous page. Please refer to drawings above for BRP-106C and BRP-106L.

▼ Shown from left to right: RCH-306, RCH-120, RCH-1003

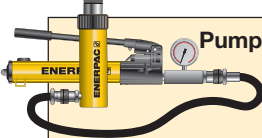

- Hollow plunger design allows for both pull and push forces
- Single-acting spring return
- Nickel-plated, floating center tube on models over 20 tons increases product life
- Baked enamel finish for increased corrosion resistance
- Collar threads for easy fixturing
- RCH-120 includes AR-630 coupler and has 1/4 NPTF port
- RCH-121 and RCH-1211 have FZ-1630 reducer and AR-630 coupler, all other models feature CR-400 coupler

▼ Hollow plunger cylinder RCH-1003 used in an application for intermediate boom suspension on a dragline.

Versatility in Testing, Maintenance and Tensioning Applications

Pump and Cylinder Sets
All cylinders marked with an * are available as sets (cylinder, gauge, couplers, hose and pump) for your ordering convenience. **Page: 54**

Lightweight Aluminum Hollow Plunger Cylinders
If you need a higher cylinder capacity-to-weight ratio the lightweight RACH-Series Aluminum Hollow Plunger Cylinders are the perfect choice. **Page: 16**

Saddles
Most RCH-Series cylinders are equipped with smooth saddles. See table at next page for optional threaded saddles and all dimensional information. **Page: 27**

Cylinder Capacity	Stroke	Model Number	Cyl. Effect. Area	Oil Cap.

Versatility in Testing, Maintenance and Tensioning Applications

Pump Selection

A double-acting cylinder must be powered by a pump with a 4-way valve.

Page: 57

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components section for a full range of gauges.

Page: 113

Saddles

All RRH-Series cylinders are equipped with smooth saddles. See table on next page for optional threaded saddles and all dimensional information.

Page: 29

- Relief valves prevent damage in case of over-pressurization
- Baked enamel finish for increased corrosion resistance
- Collar threads enable easy fixturing (except RRH-1001 and RRH-1508)
- Double-acting operation for fast retraction
- Nickel-plated, floating center tube increases product life
- Hollow plunger allows for both pull and push forces
- CR-400 couplers and dust caps included on all models
- Plunger wiper reduces contamination, extending cylinder life

▼ Double-acting hollow plunger cylinders are applied for bridge launching systems.

High Precision and High Cycle Performance

Speed Chart

See the Enerpac Cylinder Speed Chart in our 'Yellow Pages' to determine your approximate cylinder speed.

Page: 251

- Designed for long life, the best choice for production applications
- Unique mounting configurations simplify fixturing
- Baked enamel finish for increased corrosion resistance
- Double-acting operation develops force in both directions, providing maximum versatility
- Plunger wiper reduces contamination, extending cylinder life

▼ Clamping application using Enerpac RD cylinders (with clevis eye attachments on both ends) for their high-pressure capability and mounting flexibility.

▼ Shown from left to right: RR-10013, RR-1502, RR-20013, RR-1010, RR-7513

- Collar threads, plunger threads and base mounting holes for easy fixturing (on most models)
- Baked enamel finish for increased corrosion resistance
- Removable hardened saddles protect plunger during lifting and pressing
- Built-in safety valve prevents accidental over-pressurization
- CR-400 couplers included on all models
- Plunger wiper reduces contamination, extending cylinder life

▼ These long stroke RR-cylinders are attached to a sliding and guiding system pulling the arched roof assembly of Athen's Olympic Stadium step by step into the final position.

Most Versatile Performers

Rugged enough for the toughest job site uses and precision designed for high-cycle industrial uses.

Pump Selection

A double-acting cylinder must be powered by a pump with a 4-way valve.

Page: 57

Saddles

RR-Series cylinders up to 75-ton have plunger thread for installation of CAT-Series tilt saddles.

Page: 33

Optimum Performance

Enerpac's range of Z-Class electric pumps, fitted with manual or solenoid operated 4-way valves, offer optimum combinations with RR cylinders.

Page: 76

▼ RR-cylinders provide power and precision in a special hydraulic press.

Double-Acting Long Stroke Cylinders

▼ QUICK SELECTION CHART

For complete technical information see next page.

Cylinder Capacity (tons)	Stroke (in)	Model Number	Cylinder Effective Area (in ²)		Oil Capacity (in ³)		Collap. Height (in)

RR Series

Capacity:
10-500 tons

Stroke:
2.25-48.00 inches

Maximum Operating Pressure:
10,000 psi

Energac CLRG-Series

If you do not have a high cycle application, Energac **CLRG-Series** cylinders may be the right alternative.

Page: 40

Speed Chart

See the Energac Cylinder Speed Chart in our "Yellow Pages" to determine your approximate cylinder speed.

Page: 251

Optional Snap-in Saddles

Optional snap-in saddles for RR-Series double-acting cylinders:

Saddle Type	Cylinder Model Number	Saddle Model Number
Flat	RR-1010, 1012	A-102F
	RR-1010, 1012	CAT-10
Tilt	RR-308, 3014	CAT-50
	RR-506, 5013	CAT-100
	RR-5020, 756	
	RR-7513	

Standard Saddles

Grooved	RR-1010, 1012	A-102G
	RR-308, 3014	A-252G

For additional information on saddles:

Page: 10

RR-Series, Double-Acting Cylinders

RR-1010 to RR-3014 models

* For RR-1010 and RR-1012:
N = 1.26 inch; for RR-308 and
RR-3014: N = 2.20 inch.

RR-506 to RR-50048 models

RR-1006 to RR-30048

No mounting holes:
RR-506, 5013
RR-756, 7513
RR-1502, 15032

Cylinder retract capacity for certain RR cylinders may be less than theoretical values, as a result of reduced relief valve pressure settings:

RR-308/3014: 4000 psi
RR-506/5013/5020: 6950 psi
RR-756/7513: 7200 psi

◀ For full features see page 32.

* For RR-1010 and RR-1012: N = 1.26 inch; for RR-308 and RR-3014: N = 2.20 inch.

Double-Acting Long Stroke Cylinders

Couplers Included!
CR-400 couplers included on all models. Fits all HC-Series hoses.

Capacity:
10-500 tons

Stroke:
2.25-48.00 inches

Maximum Operating Pressure:
10,000 psi

▼ Shown from left to right: CLSG-1506, CLSG-2006, CLSG-506

- Integral stop ring provides piston blow-out protection
- Baked enamel outside finish and plated pistons provide superior corrosion protection
- Base mounting holes standard on all models
- Plunger wiper reduces contamination, extending cylinder life
- Single-acting load return

▼ Eight CLSG-2506 cylinders equipped with tilting saddles lifted the planking of the bridge as the pier heads were being rebuilt.

The Single-Acting Heavy Lifting Solution with Integral Stop Ring

Saddles

All **CLSG-Series** cylinders are equipped with bolt-on removable grooved saddles.

For information on optional tilt saddles, see selection chart.

Page: 39

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to

the **System Components** section for a full range of gauges.

Page: 113

Optimum Performance

Enerpac's range of **Z-Class** electric pumps, fitted with manual or solenoid operated 3-way valves, offer optimum combinations with CLSG cylinders.

Page: 76

Low Height - High Tonnage

When low height with high force is required, **CLP-Series** Pancake Cylinders with lock nut offer the solution to lift the first few inches.

Page: 20

Single-Acting, High Tonnage Cylinders

▼ QUICK SELECTION CHART

For complete technical information see next page.

CLSG Series

Capacity:
50-1,000 tons

Stroke:
1.97-11.81 inches

Maximum Operating Pressure:
10,000 psi

Standard Features

- Interchangeable, hardened grooved saddles
- CR-400 Coupler and dust cap
- Top and side mount lifting eye capability
- All cylinders meet ASME B-30.1 and ISO 10100 Standards

Additional Stroke Lengths

Models above 150 tons are also available with standard stroke lengths of 4, 8 and 10 inches. Please contact Enerpac for ordering information and dimensional details.

Lifting an Unbalanced Load

When lifting an unbalanced load **Enerpac Synchronous Lift Systems** can be the solution with multiple lift point capabilities from 4 to 64 points. See our "Yellow Pages" for multi-cylinder set-ups.

CLSG-Series, High Tonnage Cylinders

Mounting Hole Orientation

Top mounting hole orientation is maintained to port location. Base mounting hole orientation is not maintained to port location.

CLSG-50 to CLSG-150 models

CLSG-200 to CLSG-1000 models

◀ For full features see page 36.

▼ Shown from left to right: CLRG-506, CLRG-2006, CLRG-1506

- Integral stop ring provides piston blow-out protection
- Double-acting for positive retraction
- Baked enamel outside finish and plated pistons provide superior corrosion resistance
- Safety valve in retract side of cylinder helps to prevent damage in case of accidental over-pressurization
- Interchangeable, hardened grooved saddles are standard
- Plunger wiper reduces contamination, extending cylinder life

▼ CLRG-Series cylinders supported and positioned these automobile deck elements.

Double-Acting Power Lifters

Saddles

All CLRG cylinders are equipped with bolt-on removable grooved saddles. For information on optional tilt saddles, see selection chart.

Page: 43

Safety Device

A pilot-operated check valve (V-42) can be inserted between cylinder ports.

This valve provides a safety lock on the cylinder under load at any position and remote control for unlocking.

Page: 129

Optimum Performance

Enerpac's range of Z-Class electric pumps, fitted with manual or solenoid operated 4-way valves, offer optimum combinations with CLRG cylinders.

Page: 76

▼ Replacing adjustment rolls under a fly-over with CLRG cylinders, for controlled lifting and lowering.

Double-Acting, High Tonnage Cylinders

▼ QUICK SELECTION CHART

For complete technical information see next page.

CLRG Series

Capacity:
50-1,000 tons

Stroke:
1.97-11.81 inches

Maximum Operating Pressure:
10,000 psi

Standard Features

- Interchangeable, hardened grooved saddles
- CR-400 Coupler and dust cap
- Top and side mount lifting eye capability
- All cylinders meet ASME B-30.1 and ISO 10100 Standards

Pump Selection

A double-acting cylinder must be powered by a pump with a 4-way valve.

Page: 57

RR-Series

For higher cycle applications, Enerpac RR cylinders are a good alternative.

Page: 32

Additional Stroke Lengths

Models above 150 tons are also available with standard stroke lengths of 4, 8 and 10 inches. Please contact Enerpac for ordering information.

CLRG-Series, High Tonnage Cylinders

Mounting Hole Orientation

Top mounting hole orientation is maintained to port location. Base mounting hole orientation is not maintained to port location.

◀ For full features see page 40.

▼ Shown from left to right: CLL-1006, CLL-2506, CLL-1506, CLL-506

- Safety Lock Nut for mechanical load holding
- Baked enamel outside finish and plated pistons provide superior corrosion resistance
- Overflow port functions as a stroke limiter
- Interchangeable, hardened grooved saddles are standard
- CR-400 coupler and dust cap included on all models
- Single-acting load return

▼ For this curved bridge, CLL-Series cylinders were used to support the concrete beams to level the pierhead and to place 4000 ton slide bearings between pier and pierhead.

To Secure Loads Mechanically

Saddles

All CLL cylinders are equipped with bolt-on removable grooved saddles. For information on optional tilt saddles, see the selection chart.

Page: 47

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components section for a full range of gauges.

Page: 113

Low Height - High Tonnage

When low height with high force is required, pancake cylinders with lock nut offer the solution to lift the first few inches.

Page: 20

▼ CLL cylinder, mechanically locked, after positioning the curved bridge.

Single-Acting, Lock Nut Cylinders

▼ QUICK SELECTION CHART

For complete technical information see next page.

CLL Series

Capacity:

50-1,000 tons

Stroke:

1.97-11.81 inches

Maximum Operating Pressure:

10,000 psi

Additional Stroke Lengths

Models above 150 tons are also available with standard stroke lengths of 4, 8 and 10 inches. Please contact

Enerpac for ordering information and dimensional details.

Lifting an Unbalanced Load?

See our "Yellow Pages" for multi-cylinder set ups.

Page: 242

Speed Chart

See the Enerpac Cylinder Speed Chart in our "Yellow Pages" section.

Page: 251

CLL-Series, Lock Nut Cylinders

CLL-50 to CLL-250 models

CLL-300 to CLL-1000 models

Coupler Included!

CR-400 coupler included on all models. Fits all HC-Series hoses.

◀ For full features see page 44.

▼ Shown from left to right: JHA-356, JHA-156

- All-directional operation on 7, 15 and 35 ton models (JHA- Series)
- Internal relief valve to prevent overloading
- Machined flat front and bottom surfaces permit flush alignment in tight corners
- All models include pumping handle
- Chrome plated plungers
- Automatic by-pass port to prevent over-extension (JH-Series)

JH, JHA Series

Capacity:
7-150 tons

Stroke:
3.00-6.13 inches

Maximum Operating Pressure:
10,000 psi

Lifting Wedge and Machine Lifts

Ideal to lift the load the first few inches. The **LW-16** Lifting Wedge requires a very small access gap of only .39 inch.

Page: 168

Load Skates

For moving heavy loads easily and safely.

Industrial Bottle Jacks

▼ Shown: GBJ-010, GBJ-030, GBJ-003

GBJ Series

Capacity:
2-100 tons

Stroke:
2.44-18.11 inches

- Lower handle effort reduces operator fatigue
- Fully serviceable
- High-strength beam and pump linkage for long life
- Pumping handle included on all models
- Safety relief valve to prevent overload
- Automatic by-pass port to prevent over-extension
- Wiper seal for extended life
- Thick base material with large area for increased strength and stability during lifting

Screw Feature

Heat treated, adjustable extension screw with cleated saddle on selected GBJ models helps adjusting and prevents slipping.

Pump and Cylinder Sets

As an alternative to Industrial Bottle Jacks where the operator is required to stand remote from the jacking point, see the range of pump and cylinder sets.

All GBJ Jacks meet or exceed: ANSI, PALD, CE

▼ Shown: PRASA10027L

Safe, Efficient, Mobile Load Lifting

- 60, 100, 150 and 200-ton capacities with pneumatic or electric pumps for the toughest jobs
- 4" ground clearance for transport over rail and rough terrain
- Three position handle provides easy tilt back and transport
- Complies with ASME/ANSI B30.1:2015 & CE specifications
- Easy to change external filter minimizes down time
- Rugged, fully enclosed 24" wide frame with no exposed fittings or hoses
- SUP-R-STACK™ Extension System allows lifting at all heights without blocking.

Pendant Cord

Standard 12' pendant cord for air driven units with pneumatic valves and 20' pendant cord for electric driven units keeps operator away from the load.

▼ Versatility for rail maintenance. One jack for all cars from Intermodal to High Hopper with 28 heights in between.

For power source, the following characters should be inserted in the 5th space of the model number.

Ordering Example:

Model No. PREMI06014L is a 14" stroke, 60 ton model, with a manual valve and a 208-240 VAC, 1-ph electric motor.

- A Air Pump, 50 scfm, 80 psi
- B 115 VAC, 1-ph., 50-60 Hz, 20 A
- E 208-240 VAC, 1-ph., 50-60 Hz, Euro Plug, 10 A
- I 208-240 VAC, 1-ph., 50-60 Hz, USA Plug, 10 A
- G 1)208-240 VAC, 3-ph., 50-60 Hz
- W 1)380-415 VAC, 3-ph., 50-60 Hz
- J 1)440-480 VAC, 3-ph., 50-60 Hz
- R 1)575 VAC, 3-ph., 50-60 Hz

1) Not available for 60-ton capacity

* Based on one 18" and one 11" Extension and one 3" Spacer.
 ** Based on one 18" Extension and one 3" Spacer.

Maximum Corrosion Resistance

Applications

Use Enerpac **Extreme Environment Products** in wet environments such as food processing, pulp and paper, mining, construction and applications in high temperature or in welding areas.

- Corrosion resistant, nickel-plated valves and cylinders
- Stainless steel pump inserts will not corrode
- Viton® Seals provide heat and chemical resistance
- Anodized aluminum pump reservoirs and plastic encapsulated pump bodies resist wet environments
- Two-speed operation reduces pump handle strokes 78% compared to single-speed pumps
- Pump handles lock for easy carrying

700, 900 Series Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Single-Acting, Cylinder Pump Sets

SELECTION EXAMPLE

Selected cylinder:

- RC-106, Single-acting cylinder with 6.13" stroke

Selected pump:

- P-392, Lightweight hand pump

Set model number:

- SCR-106H

Included:

- HC-7206 hose
- GF-10P gauge
- GA-2 adaptor

SET SELECTION:

- 1 Select the cylinder
- 2 Select the pump
- 3 Find the set model number in the blue field of the matrix

SC Series

Capacity:

5-100 tons

Stroke:

1.50-14.25 inches

Maximum Operating Pressure:

10,000 psi

2

Pump selection (See Pump Section of this catalog for full product descriptions)

ENERPAC hydraulic pumps are available in over 1,000 different configurations. Whatever your high pressure pump needs are... speed, control, intermittent or heavy-duty performance... you can be sure that Enerpac has the pump to suit the application.

Featuring Hand, Battery, Electric, Air and Gasoline powered models, with multiple reservoir and valve configurations, Enerpac offers the most comprehensive high pressure pump line available.

Pump Selection

For help in selecting the correct pump for your application, please review our **“Yellow Pages.”** If you require further assistance, contact the Enerpac office located near you.

P-Series, Lightweight Hand Pumps

▼ Pumps shown, from top to bottom: P-802, P-842, P-202, P-142

- Lightweight and compact design
- Durable glass-filled nylon reservoir and nylon encapsulated aluminum pump base for maximum corrosion resistance
- Two-speed operation on most models reduces handle strokes by as much as 78% over single speed pumps
- Lower handle effort to minimize operator fatigue
- Integral 4-way valve on P-842 for operation of double-acting cylinders
- Handle lock and lightweight construction for easy carrying
- Large oil capacities to power a wide range of cylinders or tools
- Non-conductive fiberglass handle for operator safety
- Internal pressure relief valve for overload protection

▼ P-392 in action with RC-256 cylinders.

Exclusively from Enerpac

Cylinder Matching Chart

For help in selecting the correct hand pump for your application, please refer to the Cylinder Matching Chart located in the “Yellow Pages”.

Page: 244

Speed Chart

To determine how a specific pump will operate your cylinder, see the Pump/Cylinder Speed Chart in the “Yellow Pages”.

Page: 251

Tank Kits

When a return-to-tank port is required, the Tank Kits provide a 7/16-20 port at the rear of the reservoir.

PC-20	Fits P-141, P-142
PC-25	Fits P-202, P-391, P-392

LX-101 Hand Pump Oil

A medium viscosity oil specially formulated for hand pumps. Performs well in low temperatures and requires less pumping effort than standard Enerpac HF blue oil.

Page: 118

Pump Type	Usable Oil Capacity (in ³)	Model Number	Pressure Rating*		Oil Displacement per Stroke (in ³)		Max. Handle Effort (lbs)

▼ Shown from left to right: P-77, P-80, P-84, P-801, P-39

- Reduced handle effort and ergonomic grip for less operator fatigue
- Two-speed operation for fast and easy operation (except P-39)
- Vent free reservoir eliminates spills
- Quick grip handle allows for easy transport
- Integral reservoir over-pressurization protection
- All steel construction, chrome plated plunger and wiper system for durable, long lasting performance
- 4-way valving on the P84 and P-464 for operation of double-acting cylinders

▼ In the absence of a power supply, the P-80 Hand Pump offers a powerful solution.

The Solution for Tough Jobs

Two Speed Pumps

Recommended for applications where cylinder plunger must advance rapidly to contact load, and applications where greater oil capacities are required, such as multiple cylinder hook-ups.

Foot Pump Conversion Kits

Convert your **P39, P77, P80, or P801** to foot power with the **PC-11 Kit**. Includes instructions for easy conversion.

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components section for a full range of gauges.

Page: 113

4-Way Control Valve

P-84 and P-464 feature a manual 4-way control valve, designed for use with one double-acting or two single-acting cylinders. For system set-up information:

Page: 247

Pump Type	Usable Oil Capacity (in ³)	Model Number	Pressure Rating*		Oil Displacement per Stroke		Max. Handle Effort (lbs)

	453	P-464***	200	10,000	7.69	.29	110

* Contact Enerpac for applications where operating pressure is less than 10% of pressure rating.

** Available as a set, see note on next page.

*** For use with double-acting cylinders.

Steel Hand Pumps

P Series

P-39, P-77

Reservoir Capacity:
47-453 in³

Flow at Rated Pressure:
.15-.29 in³/stroke

Maximum Operating Pressure:
10,000 psi

P-80, P-801, P-84

Extra Capacity Hand Pumps

P-462 and P-464 feature extra large reservoirs and a high first-stage flow rate.

These pumps are ideally suited for powering high-capacity cylinders.

P-462, P-464

Pump and Cylinder Sets

P-80 is also available as a set (pump, cylinder, gauge, couplers and hose) for your ordering convenience.

Page: 54

Cylinder Matching Chart

For help in selecting the correct hand pump for your application, please refer to the Cylinder Matching Chart located in the "Yellow Pages"

▼ Shown from left to right: P-25, P-51, P-18

When Less Than 10,000 psi is All You Need

- P-25 and P-50 pump oil in both forward and reverse handle movement improving overall efficiency, ideal when mounting space is restricted
- External load-release valve
- Internal pressure-relief valve for overload protection
- P-51 can be operated in horizontal and vertical position with pump head and oil outlet facing downwards

LX-101 Hand Pump Oil

A medium viscosity oil specially formulated for hand pumps. Performs well in low temperatures and requires less pumping effort than standard Enerpac HF blue oil.

Page: 118

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components section for a full range of gauges.

Multifluid Hand Pumps

▼ Shown: **MP-110**

- Superior corrosion resistance
- Impregnated aluminum anodized pump housing with stainless steel internal pumping components
- Standard Nitrile seals – excellent for demineralized water, oil/water emulsions, water glycols, mineral oils, hydraulic fluids
- Custom EPDM seals available for use with Skydrol® or brake fluids
- Two speed pumps up to 14,500 psi pressure
- Externally adjustable pressure relief valve
- 1/4" NPTF gauge port

▼ MP-Series pumps are ideal for testing and filling applications.

MP Series

Reservoir Capacity:

2 gal. (optional)

Flow at Rated Pressure:

.12-1.28 in³/stroke

Maximum Operating Pressure:

1,500-14,500 psi

Optional Reservoir Kit

The 2 gallon reservoir kit **MP-10T*** includes tank with skid frame, top plate with reservoir seal, suction pipe and mounting bolts. Useable oil capacity is 1.5 gal.

*For use with mineral oil applications only.

Also available is model number **11-400**.

Page: **66**

MP-10T

MP-110, 350, 700, 1000

- ① Suction / Tank return port 3/8"-18 NPTF
- ② Pressure port 3/8"-18 NPTF
- ③ Gauge port 1/4"-18 NPTF

Pump Type	Usable Oil Capacity (in ³)	Model Number	Pressure Rating (psi)		Oil Displacement per Stroke (in ³)		Max. Handle Effort (lbs)	Piston Stroke (in)	Weight (lbs)

	*	MP-1000	500	14,500	3.2	.12	99	1.04	14.5

Note: MP-Pump includes .060 in. thick gasket for reservoir mounting.

* MP-Series pumps require the use of an external reservoir.

▼ Shown from left to right: 11-100, P-2282

- Two-speed operation on the P-2282 allows for faster fill, reducing cycle times for many testing applications
- 303 Stainless steel construction on the 11-100 and 11-400 models enable use with many different fluids, such as distilled water, alcohol, diesters, silicones, soluble oils and petroleum
- Large release knob for improved control of pressure release
- Outlet ports are 3/4"-16 cone for 40,000 psi rating

Ultra-High Pressure up to 40,000 psi

2-Way Shut-Off Valve 72-750

For 40,000 psi applications requiring a shut-off valve or gauge snubber. Made of 318 Stainless Steel and utilizing .38 inch cone fittings, it is the perfect selection for use with your Ultra-High Pressure Hand Pump.

Test System Gauges

Ideal for monitoring pressure in your hydraulic circuit, Test System Gauges, such as the T-6010L, are available with cone threads or NPTF threads and in a variety of pressure ranges.

Page: 124

▲ Typical Test System

▲ Test System with Gauge and Snubber

Cone Seal

Stainless Steel High Pressure fittings seal on a "cone" surface and do not require pipe sealer. The Gland Nut holds the sleeve and tubing tight against the cone surface to provide a 40,000 psi seal.

Pump Type	Usable Oil Capacity (in ³)	Model Number	Pressure Rating* (psi)		Oil Displacement per Stroke (in ³)		Max. Handle Effort (lbs)
			1st stage	2nd stage	1st stage	2nd stage	
Two-speed	60	P-2282	200	40,000	.99	.037	106
Single-speed	45	11-100	N/C	10,000	N/C	.152	120
	45	11-400	N/C	40,000	N/C	.038	120

* Contact Enerpac for applications where operating pressure is less than 10% of pressure rating.

Ultra-High Pressure Hand Pumps

▼ Optional Ultra-High Pressure Fittings and Tubing

Description	Connection	Model No.
40,000 psi		
Gland Nut Plug	.38" cone	43-001
Elbow	.38" cone	43-200
Tee	.38" cone	43-300
Gauge Tee	.38" cone side/ .25" cone gauge port	43-301
Gauge Adaptor	.38" cone side/ .25" cone gauge port	83-011
Coupling	.38" cone	43-400
Cross	.38" cone	43-600
Gland Nut with Sleeve	.38" cone	43-701
Gauge Connector	.25" cone	43-704
Tubing	4" tube, O.D. .38" * 8" tube, O.D. .38" * 12" tube, O.D. .38" *	45-116 45-126 45-136
WARNING: Maximum working pressure: 10,000 psi only		
Adaptor	.38" F cone to 1/4" M NPTF .38" F cone to 3/8" M NPTF	41-146 41-166
Adaptor	.38" F cone to 1/4" F NPTF .38" F cone to 3/8" F NPTF	41-246 41-266
Adaptor	.38" M cone to 3/8" F NPTF	41-366

Note: .25" cone fittings use 3/16"-18 threads, 3/8" cone fittings use 1/4"-16 threads.

* Actual tubing lengths are .75" less than nominal size shown. These dimensions make distance between centers of valves and fittings multiples of 4" spaces.

P/11 Series

Reservoir Capacity:
45-60 in³

Flow at Rated Pressure:
.037-.152 in³/stroke

Maximum Operating Pressure:
10,000-40,000 psi

Stainless Steel Construction

Ultra-high Pressure Fittings feature all stainless steel construction except adaptor 41-366, which features nickel plated carbon steel construction.

Ultra-High Pressure pumps DO NOT have an internal safety pressure relief valve.

11-100*, 11-400

*NOTE: Maximum operating pressure for model 11-100 is 10,000 psi.

Cordless Hydraulic Pump

XC-Series Cordless Hydraulic Pump

The XC-Series cordless pump is ideal for jobs using small to medium size cylinders and hydraulic tools, and is compatible with over 140 Enerpac tools and cylinders. These cordless pumps combine the performance of a powered pump with the portability of a hand pump making them a perfect solution for remote applications with limited or no access to a power supply or for locations where corded solutions present trip hazards.

The Lithium-Ion battery provides superior run time, even under extreme job site conditions.*

- 279 cuts of 3/8 inch reinforcing bar using the WHC-750 cutter
- 112 lifts with the WR-5 spreader
- 44 splits on 1-inch, grade 8 nuts using the NC-3241 nut splitter
- 28 lifts of an RC-104

The XC-Series cordless pump is CSA and CE compliant.

*Actual number of cycles per charge will vary depending on condition of tool, battery and ambient conditions.

About the Economy Pump

The Economy pump is best suited to power small to medium size cylinders

or hydraulic tools. Its lightweight and compact design makes it ideal for applications which require easy transport of the pump.

The Universal motor works well on long extension cords or generator-driven electrical power supplies.

For further application assistance refer to the "Yellow Pages".

PUD-1100 Series

- Provides advance/auto-retract of single-acting cylinders
- Ideal for punching applications

- For applications not requiring load holding
- 10-ft pendant controls motor and valve operation

PUD-1300 Series

- Provides advance/hold/retract of single-acting cylinders
- 10-foot pendant controls motor and valve operation
- Ideal for applications requiring remote valve operation.

PUJ-Series

- Available with 3- and 4-way valves for single- or double-acting cylinders
- 10-ft pendant controls the motor operation
- Manual valves provide advance/retract tool control

* NOTE: CE conformity marking only applies to pumps with an "E" suffix.

* For 230 volt applications replace "B" suffix with "E". (CE conformity marking only applies to pumps with an "E" suffix.)

** Electric dump valve for auto-retract of cylinders.

▼ Shown: PEJ-1401B

- Two-speed operation reduces cycle times for improved productivity
- Powerful .5 hp induction motor is submerged in the oil reservoir to run cooler, protect the motor, simplify the pump interface, save space and reduce noise
- Large 1.5 gallon reservoir allows operation of a wide range of cylinders
- 24 VDC remote pendant control on certain models for safer operation
- Externally adjustable relief valve allows control of operating pressure without opening the pump
- 40-micron internal return line filter keeps oil clean, promoting longer pump life
- Full length side tube for easy monitoring of oil level

◀ The Remote Jog model of the Submerged Pump simplifies repair on this construction crane.

Best Performance for Mid-Range Cylinders and Tools

▼ SELECTION CHART

For more technical information see next page.

5 BASIC PUMP TYPES

Select the model that suits your application. For special requirements see page 73 or contact your Enerpac office.

PED-Series: with Dump Valve

- Ideal for punching, crimping and cutting
- For use when load holding is not required
- Control pendant with 10 ft. cord controls valve and motor

PEM-Series: with Manual Valve

- Ideal choice for most applications
- Manual valve control, for both single-acting and double-acting applications
- Manual motor control

PER-Series: with Solenoid Valve

- Ideal for production and lifting
- All valves are 3-position for Advance/Hold/Retract
- Control pendant with 10 ft. cord for remote valve operation

PEJ-Series: with Remote Jog

- For light production and lifting applications
- Manual valve control for single-acting or double-acting cylinders
- Control pendant with 10 ft. cord for remote motor operation

PES-Series: with Pressure Switch

- Designed for maintaining pressure applications, such as clamping, workholding and testing
- All versions include manual valves for directional control

* Contact Enerpac for details on VM style valves.

Submerged Electric Pumps

Submerged Pump Application

The Submerged pump is best suited to power small to medium size cylinders or hydraulic tools, or whenever a quiet, intermittent duty cycle is needed. With its low sound level and the addition of the optional oil cooler, the Submerged pump is suited to light production work as well.

Its lightweight and compact design also make it ideal for applications which require some transport of the pump.

For further application assistance see the "Yellow Pages" or contact your local Enerpac office.

Page: 244

* NOTE: CE conformity marking only applies to pumps with an "E" suffix.

Introducing the *Z-Class* power pumps from Enerpac – pumps that run cooler, use less electricity and are easy to service.

Enerpac has used the latest metallurgical, bearing and seal technologies to produce a pump whose features and benefits far surpass the electric pumps that are available today. By reducing the number of moving parts, improving flow dynamics and decreasing friction, *Z-Class* pumps will stay on the job longer, require less energy to operate and when needed, have lower service costs.

Z-Class electric pumps from Enerpac – simply the best pump you will ever use.

Z Tough.
Dependable.
Innovative.
ZCLASS

Z-Class Pumping Element — The Heart of Your Hydraulic System

Highly efficient design provides increased flow rates, reduced heat generation and a decrease in power consumption. This means improved tool speed and increased service life — which results in higher productivity and lower operating costs.

Heavy-duty bearings extend pump life by reducing friction, reducing surface-loading and lowering bearing stresses.

Pump cavity oil bath extends pump life by reducing heat, improving lubrication and reducing wear.

Self-priming, high-flow 1st stage pump increases pump performance by super-charging the 2nd stage piston pump — improving oil flow in both hot and cold weather operation.

Balanced rotating components reduce vibration creating a smoother running pump — reducing wear, friction and sound levels.

Replaceable piston check-valves increase service life of major pump components.

Ergonomic low-voltage pendant features sealed switches and operates at 24 VDC for improved operator safety.

Z-Class factory installed options & accessories

Extensive list of accessories including heat exchanger, roll-bars, skid bar, pressure transducer, return line filter and level and temperature switches, allow complete pump control over a wide range of industrial applications.

Z-Class electric pumps for your application

Available in one flow range for universal motor and 4 flow ranges for induction motor. Choose from single or two-stage models to provide the optimum cylinder and tool performance for almost any industrial application.

Pump Series	Motor Size (hp)	Flow @ 10,000 psi (in ³ /min)
ZU4	1.7	60
ZE3	1.0	40
ZE4	1.5	60
ZE5	3.0	120
ZE6	7.5	200

Back-lit LCD on select Z-Class pumps

- pump usage information, hour and cycle counts
- low-voltage warning and recording
- offers self-test and diagnostic capabilities
- information displayed in 6 languages
- pressure read-out (when used with the optional pressure transducer)
- adjustable trigger pressure setting (when used with the optional pressure transducer)

Back-lit LCD available on ZU and ZE-Series Electric Pumps ▶

ZU4 Series Pump Applications

- **Mobile:** when frequent pump transport is required and/or on remote locations
- **Universal motor:** 1-phase, runs well under poor voltage supply, using generator power supply or using long extension cord
- **Duty-cycle:** for intermittent applications
- **Cylinders and tools:** for medium to large size single and double-acting applications and high speed.

ZE Series Pump Applications

- **Stationary:** when pump remains in one location
- **Induction motor:** 1 and 3-phase for high-cycle usage
- **Duty-cycle:** for heavy-duty, extended cycle application
- **Cylinders and tools:** for medium to large size single- and double-acting applications and high speed

CLASS

▼ **COMMON PUMP MODELS**

For technical information and other options see next page.

- Features **Z-Class** high-efficiency pump design; higher oil flow and bypass pressure, cooler running and requires 18% less current draw than comparable pumps
- Powerful 1.7 hp universal electric motor provides high power-to-weight ratio and excellent low-voltage operating characteristics
- High-strength, molded composite shroud protects motor and electronics, while providing an ergonomic, non-conductive handle for easy transport
- Low-voltage pendant provides additional safety for the operator (remote control units)

Pro Series pump only

- LCD readout provides pressure and torque display and a number of diagnostic and readout capabilities never before offered on a portable electric pump
- AutoCycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed (pump can be used with or without auto cycle feature)

◀ *Designed to be tough, the ZU4-Series with steel reservoirs will take the abuse of today's construction sites.*

BASIC PUMP TYPES	
Select the model that suits your application. For special requirements contact your Enerpac office.	
Manual Valve <ul style="list-style-type: none"> • Ideal choice for most applications • Manual valve control, for single-acting or double-acting applications • Motor control on shroud 	
Manual Valve with Pendant <ul style="list-style-type: none"> • For light production and lifting applications • Manual valve control for single-acting or double-acting cylinders • Low-voltage control pendant with 10-ft. cord for remote motor operation 	
Dump Valve <ul style="list-style-type: none"> • Ideal for punching, crimping and cutting • For use when load-holding is not required • Low-voltage control pendant with 10-ft. cord controls valve and motor 	
Solenoid Valve <ul style="list-style-type: none"> • Ideal for lifting applications and where remote control is required • Motor runs continuously on pumps with VE33 and VE43 valves. With VE32 valve, motor only runs during the advance function, while holding and retracting, the motor is off • Low-voltage control pendant with 10 ft. cord for remote motor and valve operation 	

ZU-Series, Electric Pumps

Z-Class – A Pump For Every Application

Patented Z-Class pump technology provides high

by-pass pressures for increased productivity – important in applications using long hose runs and high pressure-drop circuits, like heavy lifting or certain double-acting tools.

Enerpac ZU4 Hydraulic Pumps are built to power small to large-sized cylinders or hydraulic tools, or wherever high-speed, intermittent duty, remote hydraulic power is needed.

Classic Electric Pump

- The *Classic* has traditional electro-mechanical components (transformers, relays and switches) in place of solid-state electronics. The *Classic* delivers durable, safe

and efficient hydraulic power for demanding markets like construction, post-tensioning and foundation repair.

Standard Electric Pump

- For applications that do not require digital display features of the Premium Pump. Available in all manual or jog versions.

Pro Electric Pump

- Digital (LCD) display features a built-in hour meter and shows self-diagnostic, cycle-count and low voltage warning information.

Pressure can also be displayed when the pump is equipped with an optional pressure transducer.

¹⁾ CE conformity marking only applies to pumps with an "E" suffix. "E" voltage versions also meet all requirements of the European EMC-Directive.

²⁾ See valves section for technical information on valve types.

³⁾ See custom order matrix for other voltage options.

⁴⁾ Subtract 3 lbs. for STD Electric models.

ZU Series, Specifications and Dimensions

ZU4 Performance							
Motor Size (hp)	Output Flow Rate (in ³ /min)				Motor Electrical Specification (volts-ph-Hz)	Sound Level (dBA)	Relief Valve Adjustment Range (psi)
	100 psi	700 psi	5000 psi	10,000 psi			
1.7	700	535	76	60	115-1-50/60 230-1-50/60	85-90	2,000-10,000

ZU-4 Series with 1 and 2 gallon reservoirs

ZU-4 Series with 2.5, 5.0 and 10.0 gallon reservoirs (Left view shown without side handle)

- ① User adjustable relief valve
- ② Oil fill port, SAE#10
- ③ Oil level sight gauge
- ④ Oil Drain, 1/2" NPTF
- ⑤ M8 x 1.25
- ⑥ Handles on all 2.5, 5.0, and 10.0 gallon reservoirs

Factory installed features and options

- ⑦ Back-lit LCD Electric
- ⑧ Pressure transducer
- ⑨ Heat exchanger
- ⑩ Skid bar
- ⑪ Handle guard installed on all 2.5, 5, and 10 gallon reservoirs
- ⑫ Reservoir handles included on all 2.5, 5 and 10 gallon pumps

◀ Increased output flow and extended brush life increase productivity for post-tensioning applications.

Usable Reservoir Capacity (gal)	Pump Dimensions (in)					
	A	B	C	D	E	F

ZU-Series, Ordering Matrix

CUSTOM BUILD YOUR ZU4 SERIES PUMP

If the ZU4 Series pump that would best fit your application cannot be found in the chart on page 79, you can easily build your custom ZU4 Series pump here.

▼ This is how a ZU-Series pump model number is built up:

Z	U	4	4	08	L	B	-	H	K	T	
1	2	3	4	5	6	7			8		
Product Type	Motor Type	Flow Group	Valve Type	Reservoir Size	Valve Operation	Voltage			Options and Accessories		

1 Product Type

Z = Pump Series

2 Motor Type

U = Universal electric motor

3 Flow Group

4 = 60 in³/min @ 10,000 psi

4 Valve Type (see page 110 for more details)

- 1 Dump (VE32D)
- 2 3 way/2 position manual or electric (VM32 or VE32)
- 3 3 way/3 position manual or electric (VM33 or VE33)
- 4 4 way/3 position manual or electric (VM43 or VE43)
- 6 3 way/3 position locking manual w/po check (VM33-L)
- 7 3 way/2 position manual (VM22)
- 8 4 way/3 position locking manual w/po check (VM43-L)
- 9 4 way/3 position manual w/power seating (VM43-LPS)

5 Reservoir Size (useable capacity)

- 04** = 1.0 gallon
- 08** = 2.0 gallon
- 10** = 2.5 gallon (includes side handles)
- 20** = 5.0 gallon (includes side handles)
- 40** = 10.0 gallon (includes side handles)

6 Valve Operation

- D** = Dump (solenoid valve w/pendant and LCD Electric)
- J** = Jog (manual valve w/pendant and Standard Electric (i.e. w/o LCD)
- K** = Jog (manual valve w/pendant and LCD Electric)
- L** = Manual valve w/LCD Electric (w/o pendant)
- P** = Manual valve w/pendant and classic electric (i.e. w/o LCD)
- R** = Manual valve w/Classic electric (i.e. w/o LCD) [w/o pendant]
- M** = Manual valve w/Standard Electric (i.e. w/o LCD) [w/o pendant]
- S** = Solenoid valve w/pendant and LCD Electric

7 Voltage

- B** = 115V, 1 ph, 50/60Hz
- E** = 208-240V, 1 ph, 50/60 Hz (w/European plug and CE EMC compliant)
- I** = 208-240V, 1 ph, 50/60 Hz (w/NEMA 6-15 plug)

8 Options and Accessories (see page 82 for possibilities)

- F** = Filter
- G** = 0-15,000 psi gauge (2½")¹⁾
- H** = Heat exchanger
- K** = Skidbar (1 and 2 gallon reservoirs only)
- L** = Level/temp switch²⁾³⁾
- N** = No reservoir handles (includes lifting eyes)
- R** = Roll cage
- T** = Pressure transducer²⁾
- U** = Foot switch

¹⁾ Pressure gauge not available on pump models with pressure transducer

²⁾ These options require LCD electric

³⁾ Not available on 1 and 2 gallon reservoirs

ZU Series

Reservoir Capacity:
1.0-10.0 gal.

Flow at Rated Pressure:
60 in³/min.

Motor Size:
1.7 hp

Maximum Operating Pressure:
10,000 psi

Speed Chart

To determine how a "Z" pump will operate your cylinder, see the Pump/Cylinder Speed Chart in the "Yellow Pages".

Page: **251**

Ordering Example

Model Number:
ZU4408LB-HKT

ZU4408LB-HKT is a 60 in³/min at 10,000 psi pump with a 4-way, 3-position manual valve, a 2 gal. (8-liter) reservoir, operates on 115V, 1ph, 50/60 Hz and is specified with optional LCD electrical panel, heat exchanger, pressure transducer and skidbar.

Torque Wrench Pumps

System matched air and electric pumps provide control to operate Enerpac Torque Wrenches.

Page: **202**

Pressure Transducer*

- More durable than analog gauges (against mechanical and hydraulic shock)
- More accurate than analog gauges (0.5% full scale of pump)
- Calibration can be fine tuned for certification
- "Set pressure" feature turns off motor at user defined pressure (or shifts valve to neutral on models with VE33/VE43 valves)
- Display pressure in psi, bar, or MPa

* Requires LCD Electric

Accessory Kit Model Number	Adjustable Pressure Range (psi)	Switch-point repeatability	Dead-band (psi)
ZPT-U4 *	50-10,000	± 0,5%	50

* Add suffix T for factory installation.

Level/Temperature Switch

- Ensures feedback on pump oil level and temperature
- Drop-in design allows for easy installation to pump reservoir
- Plugs directly into pump electrical enclosure
- Built-in thermal sensing shuts off pump when unsafe operating temperature is reached
- Oil level switch shuts down pump before oil reaches an unsafe operating level

Model Number	Operating Temperature (° F)	Maximum Pressure (psi)	Weight (lbs)
ZLS-U4	40-230	150	.11

* Add suffix L for factory installation.

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: 114

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components section for a full range of gauges.

Page: 113

Foot Switch

- Hands-free remote control on solenoid dump and 3-position valves
- With 10 foot cord

Accessory Kit No.	Can be used on ZU4 Pumps with
ZCF-2 *	Solenoid VE-Series valves

* Add suffix U for factory installation.

Roll Cage

- Protects pump
- Provides greater pump stability

Accessory Kit Number	Fits on Reservoir
ZRC-04 *	1 and 2 gallon ¹⁾
ZRC-04H *	1 and 2 gallon ²⁾
ZRB-10 *	2.5 gallon
ZRB-20 *	5 gallon
ZRB-40 *	10 gallon

* Add suffix R for factory installation.

¹⁾ Without heat exchanger ²⁾ With heat exchanger

Ordering Example:
Model No. ZU4208BB-QR

Skidbar*

- Provides easy two-hand lift
- Provides greater pump stability on soft or uneven surfaces
- Also available as an add-on kit (model number SBZ-4)

* 1 and 2 gallon reservoirs only

Accessory Kit No.	For ZU-Series Pumps with Reservoir	Wt. (lbs)
SBZ-4 *	1-2 gal. w/o heat exchanger	4.9
SBZ-4L *	1-2 gal. with heat exchanger	5.5

* Add suffix K for factory installation.

ZU-Series Factory Installed Options and Accessories

ZU4-Series Options

Accessory Kits can be installed by the customer.

See chart below for all possible options on ZU4-Series pumps:

- Classic Electric,
 - Standard (STD) Electric (no LCD)
 - Pro Electric (with LCD).
- Refer to page 81 for ordering matrix.

ZU4-Series Options	Factory Installed			Accessory Kits		
	Classic Electric	Standard Electric	Pro Electric	Classic Electric	Standard Electric	Pro Electric
Return Line Filter	F	F	F	ZPF	ZPF	ZPF
Skid Bar ¹⁾	K	K	K	SBZ	SBZ	SBZ
Roll Cage	R	R	R	ZRC	ZRC	ZRC
Heat Exchanger	H	H	H	ZHE	ZHE	ZHE
Pressure Gauge	G	G	G	G	G	G
Pressure Transducer	-	-	T	-	-	ZPT-U4
Level/Temperature Switch	-	-	L	-	-	ZLS-U4
Foot Switch	-	-	U	-	-	ZCF-2

¹⁾Skid Bar not in combination with Roll Cage.

ZU Series

Reservoir Capacity:

1.0-10.0 gal.

Flow at Rated Pressure:

60 in³/min.

Motor Size:

1.7 hp

Maximum Operating Pressure:

10,000 psi

Return Line Filter

- 25 micron nominal filter removes contaminants from return oil flow before allowing it back into tank
- Internal by-pass valve prevents damage if filter is dirty
- With maintenance indicator

Accessory Kit Model Number	Maximum Pressure (psi)	Maximum Oil Flow (GPM)	By-pass Setting (psi)
ZPF *	200	12.0	25

* Add suffix F for factory installation.

Heat Exchanger

- Removes heat from the bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components

Accessory Kit No. *	Can be used on
ZHE-U115	115V pumps
ZHE-U230	230V pumps

* Add suffix H for factory installation.

Heat Exchanger

- Extends system life
- Stabilizes oil temperature at a maximum of 130° F at 70° F ambient temperature.

Do not exceed maximum oil flow and pressure ratings. Heat exchanger is not suitable for water-glycol or high water based fluids.

Thermal Transfer *	Maximum pressure (psi)	Maximum oil flow (GPM)	Voltage (VDC)
Btu/h	900	7.0	12

* At GPM at 70 °F ambient temperature.

▼ Shown from left to right: ZE3304MB-K, ZE4110DB-FHR

Z-Class

The New Standard for Industrial Applications

Oil Level Indicators

All ZE pumps feature an oil level indicator—sight glasses on the 1 and 2 gallon reservoirs and oil level gauges on the 2.5, 5 and 10 gallon reservoirs.

▼ SELECTION CHART *

BASIC PUMP CONFIGURATIONS Select your ZE pump model here for most applications. For special requirements, see the ZE Pump ordering matrix.		Pump Type	Used with Cylinder			Valve** Model Number	Useable Oil Capacity (gal)		
MANUAL VALVE CONTROL	Manual Valve without electric box or LCD • Ideal choice for most applications • Manual valve control, for both single-acting or double-acting applications • Manual motor control • On/off switch on 1-phase electric motor		●	—	●	—	●	VM32	2.0
			●	—	●	●	●	VM33	2.0

			—	●	●	●	●	VE43	10.0

* Models in this chart are 115 VAC, 1-phase at 50/60 Hz for ZE3-4 or 220 VAC, 3 phase at 50/60 Hz for ZE5-6. For other options, please refer to the ZE Pump ordering matrix. ** See Valve Section for technical information.

ZE-Series Electric Pumps

- Features **Z-Class** high-efficiency pump design; higher oil flow and by-pass pressure, cooler running and requires 18% less current draw than comparable pumps
- Totally enclosed, fan-cooled industrial electric motors supply extended life and stand up to harsh industrial environments
- Low-voltage pendant, on certain models, provides additional safety for the operator
- Multiple valve and reservoir configurations provide application specific models to match the most demanding industrial applications
- High-strength, molded electrical enclosure protects electronics, power supplies and LCD readout from harsh industrial environments
- LCD readout provides a number of diagnostic and readout capabilities never before offered on an industrial pump (included with electric valve models, optional on other models)
- IP54 Rating for superior dust and water protection

ZE Series

Reservoir Capacity:
1.0-10.0 gal.

Flow at Rated Pressure:
40-200 in³/min

Motor Size:
1.0-7.5 hp

Maximum Operating Pressure:
10,000 psi

User Adjustable Relief Valve

All VM and VE-Series have a user adjustable relief valve to allow the operator to easily set the optimum working pressure.

Locking Valves

For applications requiring positive load holding, VM-Series valves (except VM32) are available with a pilot-operated check valve. This provides hydraulic locking of the load until the valve is shifted into the retract position. To order this feature on your ZE-series pump see the valve type in the order matrix.

Page: 108

Single-Stage or Two-Stage

Choose single-stage pumps for applications that require constant flow regardless of pressure, such as testing or clamping. Two-stage pumps have an increased output flow at low pressure to allow fast movement towards the load, for reduced cycle times and increased productivity. To specify a single-stage pump, place the letter "S" at the end of the model number. For example: **ZE5320LG-S**

ZE3 Series (1.0 hp) Output Flow Rate at 10,000 psi: 40 in ³ /min		ZE4 Series (1.5 hp) Output Flow Rate at 10,000 psi: 60 in ³ /min		ZE5 Series (3.0 hp) Output Flow Rate at 10,000 psi: 120 in ³ /min		ZE6 Series (7.5 hp) Output Flow Rate at 10,000 psi: 200 in ³ /min

ZE-Series, Specifications and Dimensions

▼ PERFORMANCE CHART

Pump Series	Operation	Output Flow Rate (in ³ /min)				Available Reservoir Sizes (useable oil) (gal)	Motor Size		Relief Valve Adjustment Range (psi)	Sound Level (dBA)
		100 psi	700 psi	5,000 psi	10,000 psi		hp	RPM		
ZE3	Single-stage	43	43	42	40	1, 2, 2.5, 5, 10	1.0	1750	1000-10,000	75
	Two-stage	450	385	42	40					
ZE4	Single-stage	64	64	62	60	1, 2, 2.5, 5, 10	1.5	1750	1000-10,000	75
	Two-stage	650	600	62	60					
ZE5	Single-stage	128	126	123	120	2.5, 5, 10	3.0	1750	1000-10,000	75
	Two-stage	850	825	123	120					
ZE6	Single-stage	220	215	210	200	2.5, 5, 10	7.5	3450	1000-10,000	80
	Two-stage	900	890	210	200					

Output flow rate is listed at 60 Hz. Flow rate will be approximately 5/6 of these values at 50 Hz.

ZE-Series Pumps with 1 and 2 gallon reservoir

ZE-Series Pumps with 2.5, 5, 10 gallon reservoir

i Single-Stage or Two-Stage Pumps

Choose single-stage pumps for applications that require constant flow regardless of pressure, such as testing or clamping.

Two-stage pumps have an increased output flow at low pressure to allow fast movement towards the load, for reduced cycle times and increased productivity.

- ① User adjustable relief valve on all manual and solenoid valves:
 3/8" NPTF on A and B ports
 1/4" NPTF on auxiliary ports
- ② Electric Box (Optional w/manual valve)
- ③ Heat Exchanger (Optional)
- ④ Roll Bar (Optional)
- ⑤ Return Line Filter (Optional)
- ⑥ Skid Bar (Optional)
- ⑦ Oil Drain
- ⑧ Oil Level/Temperature Switch (Optional)

Reservoir Size (useable oil) (gal)	ZE-Series Pump Dimensions (in)					
	A	B	C	D	D1	H

10.0	10.6	15.7	19.9	22.7	22.5	18.9

ZE Series Electric Pump Ordering Matrix

CUSTOM BUILD YOUR ZE SERIES PUMP

If the ZE Series pump that would best fit your application cannot be found in the chart on page 85, you can easily build your custom ZE Series pump here.

▼ This is how a ZE Series Pump model is built up:

1 Product Type

Z = Pump Class

2 Prime movers

E = Induction Electric Motor

3 Flow Group

- 3** = 40 in³/min @ 10,000 psi
- 4** = 60 in³/min @ 10,000 psi
- 5** = 120 in³/min @ 10,000 psi¹⁾
- 6** = 200 in³/min @ 10,000 psi¹⁾

4 Valve Types

- 0** = No valve w/coverplate
- 1** = Dump (VE32D)
- 2** = 3 way/2 position manual (VM32)
- 3** = 3 way/3 position manual or electric (VM33 or VE33)
- 4** = 4 way/3 position manual or electric (VM43 or VE43)
- 6*** = 3 way/3 position locking manual w/po check (VM33L*)
- 7** = 3 way/2 position manual (VM22)
- 8** = 4 way/3 position locking manual w/po check (VM43L)

5 Useable Oil Capacity

- 04** = 1.0 gallon²⁾
- 08** = 2.0 gallon²⁾
- 10** = 2.5 gallon
- 20** = 5.0 gallon
- 40** = 10.0 gallon

6 Valve Operation

- D** = Dump valve (w/ pendant and LCD)
- L** = Manual valve (w/o pendant, w/ LCD)
- M** = Manual valve⁶⁾ (w/o pendant or LCD)
- N** = No valve⁶⁾ (no electrical box)
- S** = Solenoid valve (w/ pendant and LCD)
- W** = No valve (w/o pendant and LCD)

7 Voltages

Single Phase

- B** = 115V 1 ph 50-60Hz³⁾
- E** = 208-240V 1 ph 50-60 Hz European Plug
- I** = 208-240V 1 ph 50-60 Hz USA Plug

Three Phase⁶⁾

- M** = 190-200V 3ph 50-60Hz
- G** = 208-240V 3ph 50-60Hz
- W** = 380-415V 3ph 50-60Hz
- K** = 440V 3ph 50-60Hz
- J** = 460-480V 3ph 50-60Hz
- R** = 575V 3ph 60Hz

8 Options and Accessories (see page 88 for possibilities)

- F** = Filter
- G** = 0-15,000 psi gauge (2 1/2")⁷⁾
- H** = Heat exchanger⁴⁾
- K** = Skidbar (1 and 2 gal. reservoirs only)
- L** = Level/temp switch^{4) 5)}
- N** = No reservoir handles (includes lifting eyes)
- P** = Pressure switch⁴⁾
- R** = Roll cage
- S** = Single stage
- T** = Pressure transducer^{4) 7)}
- U** = Foot switch⁴⁾

- 1) ZE5 and ZE6 series pumps only available with 3-phase motors.
- 2) 1 and 2 gallon reservoirs only available on ZE3 and ZE4 series pumps.
- 3) 115 volt pumps are supplied with 15 amp plug for intermittent use. 20 amp circuit recommended for frequent full pressure use.
- 4) These options require LCD electrical package. Pressure switch option only available on manual valves without locking valve. The LCD electrical package can accept either a pressure switch or pressure transducer, but not both.
- 5) Not available with 1 and 2 gallon reservoirs.
- 6) Standard Electric models with 3-phase motors are shipped without cord, motor starter or overload protection.
- 7) Pressure gauge not available on pump models with pressure transducer. Pressure transducer provides digital pressure readout on LCD display.

* Not available on ZE5 or ZE6 Series Pumps

ZE Series

Reservoir Capacity:

1.0-10.0 gal.

Flow at Rated Pressure:

40-200 in³/min.

Motor Size:

1.0-7.5 hp

Maximum Operating Pressure:

10,000 psi

Ordering Example 1

Model Number: ZE4420MB

ZE4420MB is a 60 in³/min, 10,000 psi pump with a 4 way, 3-position manual valve, a 5 gallon reservoir, operates on a 115 VAC 1 ph 50/60 Hz motor and includes standard electrical package.

Ordering Example 2

Model Number: ZE6440SG-HNU

ZE6440SG-HNU is a 200 in³/min, 10,000 psi pump with a 4 way, 3-position electric valve, a 10 gallon reservoir, operates on a 230 VAC 3 ph 50/60 Hz motor. It includes LCD electrical package and foot switch on 10 ft cord, no reservoir handles and the optional heat exchanger.

Pendants

When ordering Enerpac VE-Series solenoid valve for use on "W" type valve operation (no Valve, with Electric Box [LCD], without pendant) the pendant must be ordered separately. Pendant connection to be plugged into electric box.

Electric Box ¹⁾

- Back-lit LCD
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Pressure read-out ²⁾
- Auto-mode pressure setting ²⁾
- Information can be displayed in six languages ³⁾

¹⁾ Included on pumps with solenoid valves. Can be factory installed on pumps with manual valve

²⁾ When used with optional pressure transducer

³⁾ English, French, German, Italian, Spanish and Portuguese

Level/Temperature Switch ⁴⁾

- Shuts down pump before oil level reaches an unsafe level, avoiding damage due to cavitation
- Shuts down pump when unsafe oil temperature is reached
- Ideal if pump is used in remote area without visual access to oil level

⁴⁾ 24 V, requires Electric Box. Available for 2.5, 5 and 10 gallon reservoirs

Accessory Kit Model Number	Fixed Temperature Signal (°F)	Operating Temperature (°F)	Max. Pressure (psi)
ZLS-U4 *	75	40 - 230	150

* Add suffix **L** for factory installation, see ordering matrix.

Return Line Filter

- 25 micron nominal filter removes contaminants from return oil flow before allowing it back into tank
- Internal by-pass valve prevents damage if filter is dirty
- With maintenance indicator
- Replaceable filter element PF25

Accessory Kit Model Number	Maximum Pressure (psi)	Maximum Oil Flow (GPM)	By-pass Setting (psi)
ZPF *	200	12.0	25

* Add suffix **F** for factory installation, see ordering matrix.

Roll Cage

- For easy portability and hoisting
- Protects pump and electric box
- Available for all reservoir sizes

Accessory Kit Number	Fits on Reservoir
ZRC-04 *	1 and 2 gallon ¹⁾
ZRC-04H *	1 and 2 gallon ²⁾
ZRB-10 *	2.5 gallon
ZRB-20 *	5 gallon
ZRB-40 *	10 gallon

* Add suffix **R** for factory installation, see ordering matrix.
¹⁾ Without heat exchanger ²⁾ With heat exchanger

Skid Bar

- Provides easy two-hand lift
- Provides greater pump stability on soft or uneven surfaces

Accessory Kit Number	For ZE-Series Pumps with Reservoir	Weight (lbs)
SBZ-4 *	1-2 gal. w/o heat exchanger	4.9
SBZ-4L *	1-2 gal. with heat exchanger	5.5

* 1 and 2 gallon reservoirs only. Add suffix **K** for factory installation, see ordering matrix.

Foot Switch ⁵⁾

- Hands-free remote control on solenoid dump and 3-position valves
- With 10 foot cord

⁵⁾ 15 V, requires Electric Box

Accessory Kit Number	Can be used on ZE-Series Pumps with
ZCF-2 *	Solenoid VE-Series valves

* Add suffix **U** for factory installation, see ordering matrix.

ZE-Series, Factory Installed Options & Accessories

Pressure Transducer ¹⁾

- Displays pressure on LCD in bar, MPa or psi
- More accurate than analog gauge
- Calibration can be fine-tuned for certification
- Easy-viewing variable rate display
- “Set pressure” feature turns off motor at user defined pressure (or shifts valve to neutral on models with VE33/ VE43 valves)

¹⁾ 24 V, requires Electric Box

Accessory Kit Model number	Adjustable Pressure Range (psi)	Switch-point Repeatability	Dead-band (psi)
ZPT-U4 *	50-10,000	± 0,5%	50

* Add suffix T for factory installation, see ordering matrix.

Pendants ³⁾

- For pump types with valve operation “W” (No Valve, with Electric Box, without pendant)

³⁾ When ordering Enerpac VE-Series solenoid valve, the pendant must be ordered separately. Pendant connection to be plugged into electric box

Pendant Model Number	To be used with Solenoid Valve:
ZCP-1	VE32D
ZCP-3	VE32, VE33, VE43

Pressure Switch ²⁾ ³⁾

- Controls pump, monitors system
- Adjustable pressure 500-10,000 psi
- Includes glycerine filled 15,000 psi pressure gauge G2536L
- Accuracy ± 1,5% of full scale

²⁾ 24 V, requires Electric Box. Not available in combination with pressure transducer.

³⁾ Not available on LCD electronics

Accessory Kit Model number	Switch-point Repeatability	Deadband (psi)	Oil Ports (NPT)
ZPS-E3 *	± 2%	115-550	3/8"

* Add suffix P for factory installation, see ordering matrix.

Heat Exchanger ⁴⁾

- Removes heat from bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components.

⁴⁾ 24 VDC, requires electric box

Accessory Kit Model number	Fits on Reservoir	Weight (lbs)
ZHE-E04 *	1 and 2 gallon	9.0
ZHE-E10 *	2.5, 5, and 10 gallon	9.0

* Add suffix H for factory installation, see ordering matrix.

Options

Accessory Kits can be installed by customer. See chart below for options on Standard Electric (without electric box) or LCD Electric (with electric box). Refer to page 87 for ordering matrix.

ZE-Series Options	Factory Installed		Accessory Kits	
	Std. Electr.	LCD Electr.	Std. Electr.	LCD Electr.
Return Line Filter	F	F	ZPF	ZPF
Skid Bar ¹⁾	K	K	SBZ	SBZ
Roll Cage	R	R	ZRB	ZRB
Single-stage	S	S	-	-
Heat Exchanger	-	H	-	ZHE
Pressure Gauge ²⁾	G	G	-	-
Pressure Switch ³⁾	-	P	ZPS-E3	-
Pressure Transducer ⁴⁾	-	T	-	ZPT-U4
Level/Temp Switch ⁵⁾	-	L	-	ZLS-U4
Foot Switch ⁶⁾	-	U	-	ZCF-2

¹⁾ Available for 1 and 2 gallon reservoirs.

²⁾ Not available on pumps with pressure transducer.

³⁾ Includes 14,500 psi gauge. Only available on manual valves without locking feature.

⁴⁾ Electric box can accept either pressure switch or pressure transducer, but not both.

⁵⁾ Available for 2.5, 5, 10, gallon reservoirs.

⁶⁾ For control of solenoid dump and 3-position valves.

ZPT-U4 Pressure Transducer

More durable against mechanical and hydraulic shock than analog gauges.

- Digital pressure read-out provides accuracy of 5% of full scale.
- Easy-viewing variable rate display automatically varies increments between 44, 203, 508 and 2103 psi as rate of pressure change increases.
- “Set pressure” feature turns off motor at user defined pressure (or shifts valve to neutral on VE33 and VE43 valves).

ZHE-Series Heat Exchangers

Heat exchanger stabilizes oil temperature at 130° F at 70° F ambient temperature. Thermal transfer at 5 GPM and 70° F ambient temperature: 900 Btu/hour.

Do not exceed maximum oil flow of 7.0 GPM and maximum pressure of 300 psi. Not suitable for water-glycol or high water based fluids.

▼ Shown: **PEM-8418**

- Panel-mounted pressure gauge and adjustable relief valve for system pressure control
- Two-speed pump design, with high by-pass pressure, for rapid cylinder advance
- Dual voltage motor (230/460 VAC, 3 phase, 60 Hz)
- Full length reservoir sight tube with integral thermometer for ease in monitoring oil level and temperature
- Low voltage controls to protect the pump operator

The Largest Pump for the Largest Jobs

Locking Valves

Pumps with VM-4 manual valves are available with VM-4L manual valves for positive load holding. Add suffix "L" to pump model number.

Page: 108

FS-34 Foot Control Switch

This 3-position switch allows hands-free control of the solenoid valve on the pump. Operates 24V and

115V valves that use the square electrical connector.

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system,

specify only genuine Enerpac hydraulic hoses.

Page: 114

◀ With similar specifications, a gasoline powered EGM-8000 Series is shown here performing a synchronized lift.

8000-Series Electric Pumps

About the 8000 Series

The 8000 Series is the largest pump in the Enerpac line and the best choice to power most large size cylinders, multiple cylinder circuits, and applications where the need for high speed requires high flow rates.

The 8000 Series, with its large reservoir capacity, is best suited for large jobs and may be the only solution because of the required oil capacity.

For further application assistance see our "Yellow Pages", or consult your local Enerpac office.

Page: 103

PE Series

Reservoir Capacity:

25 gal.

Flow at Rated Pressure:

2.0 gal/min.

Motor Size:

12.5 hp

Maximum Operating Pressure:

10,000 psi

Dimensions shown in inches.

Speed Chart

To determine how an 8000 Series pump will operate your cylinder, see the Pump/Cylinder Speed Chart in the "Yellow Pages".

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: 114

- Features Z-Class high efficiency pump design, higher oil flow and bypass pressure
- Two-speed operation and high by-pass pressure reduces cycle time for improved productivity
- Internal relief valves. One is factory set for overload protection while the second is user adjustable for pre-setting maximum system pressure
- Sight gauge on 1 and 2 gallon and level gauge on 2.5, 5 and 10 gallon reservoirs allow quick and easy oil level monitoring
- Optional heat exchanger warms exhaust air to prevent freezing and cools the oil

ZA-Series Air Hydraulic Pump Ordering Matrix

CUSTOM BUILD YOUR ZA4 AIR PUMP

▼ This is how a ZA-Series Pump model number is built up:

1 Product Type

Z = Pump class

2 Motor Type

A = Air motor

3 Flow Group

4 = 80 in³/min@10,000 psi

4 Valve Type

- 0 = No valve with coverplate
- 2 = 3-way, 2-position (VM32)
- 3 = 3-way, 3-position (VM33)
- 4 = 4-way, 3-position (VM43)
- 6 = 3-way, 3-position, locking (VM33L)
- 7 = 3-way, 2-position (VM22)
- 8 = 4-way, 3-position, locking (VM43L)

5 Usable Oil Capacity

- 04 = 1.0 gallon
- 08 = 1.75 gallon
- 10 = 2.5 gallon
- 20 = 5.0 gallon
- 40 = 10.0 gallon

6 Valve Operation

- M = Manual valve
- N = No valve

7 Voltage

- X = Not applicable

8 Options

(Specify in alphabetical order)

- F = Filter
- G = 0-15,000 psi gauge (2 1/2")
- H = Heat exchanger*
- K = Skidbar*
- N = No reservoir handles (includes lifting eyes; 2.5, 5, 10 gallon only)
- R = Roll bars

* (1 and 2 gallon reservoirs only)

Ordering Example

Model Number: ZA4208MX-FHK

ZA4208MX-FHK is an air operated pump with a 3-way, 2-position manual valve, a 2.0 gallon reservoir, filter, heat exchanger and skid bar.

ZA Series

Reservoir Capacity:

1.0-10.0 gal.

Flow at Rated Pressure:

80 in³/min.

Maximum Operating Pressure:

10,000 psi

OIL FLOW vs. PRESSURE

100 psi Dynamic Air Pressure at 70 scfm

1 and 1.75 gallon reservoirs

2.5, 5, 10 gallon reservoirs

Dimensions (in)							Weight (incl. oil) (lbs)
A	B	C	D	E	F	G	
11.6	5.6	11.0	6.0	15.4	-	-	65.5
11.6	5.6	11.0	8.1	15.4	-	-	75.7
13.0	7.1	16.5	16.6	16.0	15.6	18.4	112.7
11.6	5.6	11.0	6.0	15.4	-	-	66.7
11.6	5.6	11.0	8.1	15.4	-	-	76.9
12.0	6.1	16.5	12.0	16.0	11.0	15.1	87.1
13.0	7.1	16.5	16.6	16.9	15.6	18.4	113.9
16.5	10.6	15.7	19.9	20.4	18.9	23.0	164.6

- ① User adjustable relief valve on all manual valves
 - ② Air inlet 1/2" NPTF
 - ③ Return Line Filter (optional)
 - ④ Oil Sight Gauge
 - ⑤ Roll Cage (optional)
 - ⑥ Oil Drain
 - ⑦ Lifting eyes (4) (optional)
 - ⑧ Handles
- Skid Bar (Model No. SBZ-4) (optional)

▼ Shown: **XA11G**

- Higher oil flow for increased productivity
- Variable oil flow and fine metering for precise control
- Ergonomic design for less operator fatigue
- Closed hydraulic system prevents contamination and allows pump usage in any position
- Pedal lock function for retract position
- External adjustable pressure setting valve
- ATEX Certified.* Includes ground screw for explosion protection

* See explanation of ATEX Certification in "Yellow Pages."

▼ Easily operated by foot. No need to fully lift up foot - rest body weight on heel, resulting in a hands-free and stable working position.

XVARI[®] TECHNOLOGY

Productivity and Ergonomics

Optional Pressure Gauge

Integrated gauge with calibrated scale reading in psi, bar and MPa for actual pressure reading.

Optional 4-Way 3-Position Valve

For powering double-acting hydraulic cylinders and tools.

Optional 1/2 Gallon Reservoir

Double oil capacity for powering larger hydraulic cylinders and tools.

Pedal Safety Guard

Customer installed frame protects both pedals against accidental activation.

Order model number ¹⁾

XPG1

"Joy-stick" Lever Kit

Customer installed set of handles for manual operation of both pedals.

Order model number ¹⁾

XLK1

Hydraulic Swivel Connector

Customer installed swivel connector for optimal orientation of the hydraulic hose.

Order model number ¹⁾

XSC1

¹⁾ Accessories must be ordered separately.

XVARI® Technology, Air Driven Hydraulic Pumps

XVARI® TECHNOLOGY

Production Application

XA11 pump is used with a 13-ton hollow cylinder to compress and position diesel engine valve springs.

The operator benefits from the fine metering capacities of the XVARI® Technology to apply the mandatory precise stroke and force.

XA Series

Reservoir Capacity:
61-122 in³

Flow at Rated Pressure:
15 in³/min.

Air Consumption:
10-35 scfm

Maximum Operating Pressure:
10,000 psi

▼ XA-SERIES PERFORMANCE CHART

¹⁾ High-flow coupler CR400 and accessories must be ordered separately.

²⁾ Available as cylinder pump set, see page 54.

▼ Shown left to right: PAMG-1402N, PATG-1102N, PARG-1102N, PATG-1105N

- High efficiency cast aluminum air motor for increased life and reduced air consumption
- Fully serviceable air motor assembly
- Reinforced heavy-duty reservoir for applications in tough environments
- New generation air saver piston with rugged one-piece design reduces air consumption and operating costs
- Return-to-tank port for use in remote valve applications
- Quiet – only 76 dBA with low air consumption of 12 scfm
- Operating air pressure: 40-125 psi, enables pump to start at extremely low pressure
- Internal pressure relief valve provides overload protection

▼ Easily operated by hand or by foot.

Compact Air Over Hydraulic

RFL-102 Regulator-Filter-Lubricator

Recommended for use with all air pumps. Provides clean, lubricated air and allows for air pressure adjustment. Steel bowl guards are standard.

User Adjustable Relief Valve

All VM-Series directional valves have a user adjustable relief valve to allow the operator to easily set the optimum working pressure.

High Pressure Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: 114

- Features **Z-Class** high efficiency pump design, higher oil flow and bypass pressure
- Two-speed operation reduces cycle time for improved productivity
- Full sight oil level glass on all reservoirs allow quick and easy oil level monitoring
- Sturdy wheeled cart for ZG6 allows transport over uneven terrain and features collapsible handles for easy storage
- Dual forced air heat exchangers on ZG6 stabilizes hydraulic oil temperature
- ZG5 is available in two 4-cycle engine sizes: 7.1 ft.lbs Honda and 8.5 ft.lbs Briggs & Stratton
- ZG6 has Briggs & Stratton 17 ft.lbs engine with electric start, pressurized oil and 16-amp charge output for accessories

Other Options Available

The ZG5/ZG6 pumps are available in a wide range of configurations and options. Contact Enerpac for further information.

ENERPAC hydraulic valves are available in a wide variety of models and configurations.

Whatever your requirements... directional control, flow control, or pressure control... you can be sure that Enerpac has the correct valve to match your application exactly.

Designed and manufactured for safe operation up to 10,000 psi, the range of Enerpac valves allows for direct pump mounting, remote mounting, manual or solenoid actuation, and in-line installation, giving you flexible solutions to control your hydraulic system.

Pressure and Flow Control Valves

For more hydraulic system control with pressure relief valves, shut-off valves, check valves and sequence valves see our "System Components" section.

Solenoid 115 VAC	Double-acting	4-Way, 3 Position, Tandem Center	

For remote valve applications, see page 108.

Pump Mounted Directional Control Valves

All valves feature several gauge ports for “system”, A port and B port pressure monitoring. User-adjustable relief valves are included on all models to allow the operator to easily set the optimum working pressure for each application. VM33 and VE43 valves include “System Check” feature, for more precise pressure holding and improved system control. The VM33 has improved porting which provides faster cylinder retraction while motor is running.

Model Number	Hydraulic Symbol	Schematic Flowpath			Weight (lbs)

VM, VE Series

Flow Capacity:
4.5 gal/min.

Maximum Operating Pressure:
10,000 psi

High-Pressure Hoses

VE33-115 and VE43-115 electric valves are supplied with IC400 control station. These valves include an 8 ft. power cord, and can be used on any Enerpac pump. They require a separate 115 volt power supply to operate.

Locking Valves

For applications that require positive load holding, VM Series valves (except the VM22 and VM32 valve) are available with a pilot-operated check valve. This option provides hydraulic locking of the load until the valve is shifted into the retract position.

To order this feature, place an “L” at the end of the model number.

Pendants for VE-Series Solenoid Valves

When ordering Enerpac VE-Series solenoid valves, the pendant must be ordered separately for Z-Class pumps. Pendant connection to be plugged into electric box of pump.

To be used with solenoid valves:	Pendant
VE32D	ZCP-1
VE32, VE33, VE43	ZCP-3

▼ Shown from left to right: VC-20, VC-4L

Reliable Remote Control

Locking Valves

For applications that require positive load holding, VC and VM Series valves are available with a pilot-operated check valve. This option provides hydraulic locking of the load until the valve is shifted into the retract position.

- Advance/Hold/Retract operation for use with single-acting or double-acting cylinders

* Requires use of tank port for dump or unloading.

Unmatched Combinations and Possibilities

3-Way Check Valve

Use a **VS-51** 3-way pilot operated check valve assembly to convert your 3-way modular valve into a load-holding valve.

4-Way Check Valve

Use a **VS-61** 4-way pilot operated check valve assembly to convert your 4-way modular valve into a load-holding valve.

System Pressure Control

To add system pressure control to your modular valve, order **VS-11 Relief Valve** assembly.

Bolt Kits for Accessory Valves With No Manifold

Order Bolt Kit **BK-2** when adding one of the accessory valves. Order Bolt Kit **BK-3**

when adding any combination of two accessory valves.

How to order one of the 1,300 possible model numbers?

With over 1,300 possible model numbers, Enerpac has the perfect valve for you. Use the "chart" to build your own valve for the specific application you require. This is the complete guide to all the Modular valves that are available.

Solenoid Operated Modular Valves

CUSTOM BUILD YOUR MODULAR VALVES

▼ This is how a Modular Valve Model Number is built up:

1 Product Type

VE = Solenoid Operated Valve

2 Valve Code

- A** = 4/3 Open Center
- B** = 4/3 Closed Center
- C** = 4/3 Tandem Center
- D** = 4/3 Float Center
- E** = 4/2 Crossover Offset
- F** = 3/3 Tandem Center
- G** = 3/3 Closed Center
- H** = 2/2 Normally Closed
- K** = 2/2 Normally Open
- M** = 4/2 Float Offset
- P** = 3/2 Normally Open

3 Flow Capacity

1 = 4 gallons per minute

4 Voltage

- 1** = 24 VDC
- 2** = 220/240 V, 1 ph, 50 Hz
- 5** = 115 V, 1 ph, 60 Hz
- 6** = 230 V, 1 ph, 60 Hz

5 Accessory Valves

- 000** = No accessory valves
- 100** = Relief Valve only
- 150** = Relief Valve and 3-way pilot operated check valve
Only for VEF/VEG
- 160** = Relief Valve and 4-way pilot operated check valve
Only for VEA/VEB/VEC/VED
- 500** = 3-way pilot operated check valve
Only for VEF/VEG
- 600** = 4-way pilot operated check valve
Only for VEA/VEB/VEC/VED

6 Manifold

- A** = No manifold**
- B** = Remote Mounted
- D** = Pump Mounted*

* Only for valve code: **VEA/VEC/VEF**

** Must order Bolt Kit separately.

Valve dimensions in inches.

Modular Valve Pump Mounted

¹⁾ add 1.85 inch for each Accessory Valve

Flow Capacity:

4 gal/min.

Maximum Operating Pressure:

10,000 psi

Example: VEA-15600-D

VEA-15600-D is a Modular Valve with a 4-way, 3-position open center flowpath, 115 VAC, and an integral pilot-operated check valve, for mounting on an Enerpac pump.

Modular Valve Remote Mount Manifold

Pressure Drop versus Oil Flow

ENERPAC System Components –

All the additional components you need to complete your high pressure hydraulic system. Engineered to work with your Enerpac cylinders, pumps and tools.

All Enerpac components are designed and manufactured to the most exacting standards.

With this complete line of hydraulic hoses, couplers, fittings, manifolds, oil and gauges Enerpac has the accessories to compliment your system and ensure the efficient operation, long life, and safety of your hydraulic equipment.

Yellow Pages

For sample system set-ups and how to correctly specify your system components, please view the Enerpac **Yellow Pages**.

Page: 246

Maintain System Integrity

Use Enerpac System Components, designed to interface with Enerpac Cylinders, Pumps and Tools to ensure your system operates at peak performance.

Crimped-on rubber strain relief for improved life and durability on all models.

Thermo-plastic Hoses (700-Series)

- For demanding applications, featuring a 4:1 design factor
- Maximum working pressure of 10,000 psi
- Two layers of steel wire braids
- Outside jacket is polyurethane, to provide maximum abrasion resistance
- Exhibits low volumetric expansion under pressure to enhance overall system efficiency

Heavy-duty Rubber Hoses (900-Series)

- The most complete offering: 35 models up to 50 feet in length
- Rubber coated with two layers of steel wire braids
- Designed to comply with Material Handling Institute IJ-100 hose specification
- Flexible, with little “memory”, is the best choice for long hose runs

◀ *To prevent back pressure and to increase cylinder retraction speed, when using long hoses, the Enerpac HC-7300 range of hoses with increased internal diameter is the best choice.*

Emphasize Safety and Quality

To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

WARNING !

- Do not exceed 10,000 psi maximum pressure.
- Do not handle hoses while under pressure.

More safety instructions in our “Yellow Pages”.

Hose Oil Capacity

When using long hose lengths, it is sometimes necessary to fill the pump reservoir after filling the hoses. To determine the hose oil capacity, use the following:

For .25" internal diameter hoses:
Capacity (in³) = .5892 x Length (ft)

For .38" internal diameter hoses:
Capacity (in³) = 1.3608 x Length (ft)

▼ Shown: FH-604, FR-400, A-630 disassembled, C-604, AH-604, AR-400

3/8" High Flow Couplers

- Standard equipment on most Enerpac cylinders
- Recommended for use on all Enerpac pumps and cylinders where space and porting permits
- Include "2-in-1" dust cap for use on male and female coupler halves

3/8" High Flow "Flush-face" Couplers

- Featuring "Push-to-connect" operation, to guarantee good connection every time
- Flush-face, zero-leak operation for minimal spillage
- HTMA* recognized for safety and performance

3/8" Regular Spee-D-Coupler®

- For medium duty applications; for use with hand pumps
- Includes female steel dust cap

1/4" Regular Coupler

- For use with small cylinders and hand pumps
- Includes female steel dust cap

* Hydraulic Tool Manufacturers Association

Quick Connection of Hydraulic Lines

Thread Sealer

To seal NPTF threads use one of the new anaerobic thread sealers or Teflon paste. When using Teflon tape, apply the tape one thread back from the end of a fitting to prevent it from entering the hydraulic system.

WARNING!

Couplers should be pressurized only when completely connected, and should not be coupled or uncoupled when pressurized.

More safety instructions in our "Yellow Pages".

Page: 242

S- and W-Series Torque Wrench Couplers

S- and W-Series Torque Wrenches require 1/4" spin-on couplers and THQ hoses.

Page: 183

▼ With the use of Enerpac High Flow Couplers, hoses are easily installed for multiple hydraulic line connections in this 34 points PLC-controlled lifting system.

Hydraulic Couplers

F-Series

Flush-faced couplers provide reduced pressure drop versus other types and are preferred in dirty, grimy construction and mining environments due to easy clean, non-dirt trapping faces.

Metal Dust Caps

Steel dust caps are available for the C-604 series couplers. Order model number: **CD-411M** for female half **CD-415M** for male half

A C F Series

Maximum Flow Capacity:
2,500 in³/min.

Thread:
1/4" and 3/8" NPTF

Maximum Operating Pressure:
10,000 psi

C-604

F-604

A-604, A-630

CT-604 Safety Tool

Use the Enerpac CT-604 to relieve hydraulic back pressure by safely bleeding the hydraulic coupler.

Minimize injuries from projectile parts and under-skin hydraulic fluid injections by eliminating unsafe coupler bleeding practices. The CT-604 is Enerpac-engineering safe for use at 10,000 psi (700 bar).

NOTE: C-Series only.

Maximum Flow Capacity (in ³ /min)	Coupler Type	Model Numbers			Dimensions (in)							Dust Cap(s)

55 Gallons	HF-104	
1 Gallon**	LX-101	

* Packed in two 2½ gallon cans.

** Hand pump oil.

HF Oil

- Specially formulated for power pumps
 - maximum volumetric efficiency
 - maximum heat transfer
 - prevents cavitation
 - anti-sludge, anti-rust, anti-foam additives
- Maximum film protective lubricity
 - anti-oxidation additives

LX Hand Pump Oil

- Specially formulated for hand pumps
 - anti-sludge, anti-rust additives
- Reduced handle effort over HF oil
 - good low temperature performance
- Not for use in power pumps

Manifolds

Description		Model No.	Dimensions (in)
7" Long Manifold with 7 female ports.		A-64	
14" Long Manifold that allows direct mounting of control valves to the manifold. 7 female ports.		A-65	
6-Port Hexagon Manifold Plugs furnished for all ports 3/8"-18 NPTF.		A-66	
Premounted Manifold Functions as split-flow valve to control 2 to 4 single-acting cylinders simultaneously. All ports 3/8"-18 NPTF.		AM-21 AM-41	

Hydraulic Oil, Manifolds and Fittings

Recommended Tubing for Hand Plumbing Applications

Enerpac does not supply high-pressure pipe or tubing but recommends the use of cold drawn steel tubing instead of regular pipe in the following dimensions:
 In place of 1/4" pipe use 3/8" tubing with a 0.065" minimum wall thickness.
 For 3/8" pipe use schedule 80 as a minimum or 1/2" with a 0.095" minimum wall thickness.
 For 1/2" pipe use schedule 80 as a minimum or 3/4" tubing with a 0.135" minimum wall thickness.
 All tubing wall thicknesses based on a 55,000 psi minimum tensile strength.

Hydraulic Force and Pressure Gauges

Maximum Indicator Pointer

Indicator retains peak readings of pressure or force generated by the system.

Order model number: **H-4000G**.

Can easily be installed on GP-Series dry gauges.

Load Gauges

To measure external load supported by a cylinder or jack. For pressing parts together under pre-determined loads, weighing, testing, etc.

Pressure Gauges

To measure the input pressure into cylinders, jacks or high pressure systems. Also for all testing applications.

GP-Series gauges are dry gauges.
GF-Series gauges are glycerine filled.

Visual References for System Pressure

Glycerine Filled (G-Series)

- Calibrated in dual scale reading in psi and bar
- All pressure sensing parts sealed and dampened by glycerine for long life
- Includes safety blow-out disk and pressure equalizing membrane
- Gauge snubbers or needle valves recommended for high cycle applications

High Cycle (H-Series)

- Calibrated in dual scale reading in psi and bar
- Ideal for use in many applications, specifically for high cycle and harsh environments
- Gauge snubbers or needle valves recommended to shut off gauge when not in use

Gauge Adaptor

For easy gauge installation into almost any system, Enerpac offers a complete line of gauge adaptors.

Page: 126

Snubber Valve

Infinitely adjustable for metering oil out of a gauge. The V-91 Snubber Valve is also suitable as a shut-off valve to protect the gauge during high-cycle applications.

Page: 129

◀ When lifting or pressing, always use a gauge. A gauge is your "window" to the system—it lets you see what's going on.

V Series

Maximum Operating Pressure:

10,000 psi

Valve Type and Model Number	Description	Hydraulic Symbol
Needle Valve V-82 V-182F V-8F	 <p>V-82: To control cylinder speed. Can also be used as shut-off valve for temporary load holding. V-182: Same as V-82, but with V-8F: Similar to V-82, but with very fine metering for precise flow control. Not recommended as shut-off valve.</p>	
Snubber Valve V-91	 <p>V-91: Adjustable for metering oil out of a gauge to prevent snapping of gauge pointer when load or pressure is suddenly released. Also suitable as shut-off valve to protect</p>	
Auto Damper® Valve V-10	 <p>V-10: To be used when gauge pressure must be monitored during high cycle applications. Creates a flow resistance when load is released suddenly.</p>	
Check Valve V-17	 <p>V-17: Ruggedly built to resist shock and operate with low pressure drop. Closes smoothly without pounding. $\frac{3}{8}$" NPTF female ports.</p>	
Pilot Operated Check Valve V-42	 <p>V-42: Can be mounted at the cylinder to hold the load in case of system pressure loss. Normally used with double-acting cylinders where pilot port receives pressure</p>	
Manually Operated Check Valve V-66* V-66F	 <p>V-66: Used for load holding applications with single and double acting cylinders. Valve is manually opened to allow oil to flow back to tank when cylinder retracts. V-66F: Similar to V-66, but with very fine metering capability for precise flow control. Not designed for load holding applications.</p>	
Pressure Relief Valve V-152*	 <p>V-152: Limits pressure developed by the pump in hydraulic circuit, thus limiting the force created by other components. Valve opens whenever preset pressure is reached.</p>	
Sequence Valve V-161	 <p>V-161: To control oil flow to a secondary circuit. Flow is blocked until system pressure rises to the V-161 setting. When this pressure level is reached, the V-161 opens to</p>	

* See page 52-53 for more information on extreme pressure and flow control valves.

ENERPAC Hydraulic Presses are available in a wide variety of standard capacities and configurations, or you can “build your own” with the easy-to-use matrix.

The press frames are a welded construction for maximum strength and durability, and when combined with the power of high pressure hydraulics, will provide years of safe and dependable service in your workshop.

Enerpac press capacities range from 10-ton to 200-ton and are available in Bench, C-Frame, Arbor, H-Frame and Roll-Frame models.

These Press features increase productivity and broaden the range of applications:

Standard on many Enerpac IP Presses, the exclusive Hydra-Lift™ offers effortless adjustment to the press daylight by use of a hydraulic lift.

Easy horizontal cylinder position is achieved with the unique “roller-head” cylinder mounting block, standard on most Enerpac IP Presses.

Optional “V-blocks” for positioning of complex parts are designed with high-strength steel for long life.

▼ Press shown: IPE-5060

- Quality welded frame for maximum strength and long life
- Exclusive “Hydra-Lift™” bed for effortless adjustment of the vertical daylight (10-ton models are manual)
- Roller head design is standard to allow movement and locking of the cylinder from side to side (10-ton, 25-ton and 30-ton are manual)
- All models in the Quick Selection Chart have been matched to a pump, cylinder, hoses and gauge, offering the complete package

◀ An Enerpac H-Frame press quickly removes the shaft from this assembly.

Setting the Industry Standard

Cylinder Mounting Block

Allows cylinder mounting into a press frame, while also allowing side to side adjustment of cylinder position.

Page: 140

Hydra-Lift™

Allows easy, effortless daylight adjustment. Standard on most H-Frame presses.

Page: 140

Pump Mounting Bracket

Heavy-duty steel brackets allow mounting of one of the Enerpac Power Sources to power your press.

Page: 140

Gauge Included

All standard press models include a gauge and gauge adaptor, matching the press capacity.

Page: 135

V-Blocks

These optional V-Blocks are designed for easy fixturing of round stock and other non-uniform materials. Featuring precise fit into the press bolster.

Page: 140

H-Frame Presses

Ordering Variations

Any variations to a listed part number must be ordered as two separate items. For example, if you need a different voltage electric pump, please order from the modular matrix on page 141 and the electric pump from the modular matrix on page 87 (electric) or page 93 (air).

Any questions should be directed to our Technical Service Department.

Page: 140

Cylinder Types

= Single-acting, Spring Return

= Double-acting, Hydraulic Return

IP Series

Capacity:

10-200 tons

Maximum Daylight and Width:

54.50 & 48.00 inches

Maximum Operating Pressure:

10,000 psi

Ordering Variations

Any variations to a listed part number must be ordered as two separate items. For example, if you need a different voltage electric pump, please order from the modular matrix on page 141 and the electric pump from the modular matrix on page 87 (electric) or page 93 (air).

Any questions should be directed to our Technical Service Department.

Page: 140

▼ Shown: IPR-10075

- Quality welded frame for maximum strength and long life
- Frame rolls easily on four steel roller bearings
- Hydraulic clamp cylinders lock frame into position
- Exclusive “Hydra-Lift™” bolster for effortless adjustment of the vertical daylight
- Standard roller head design allows movement of the cylinder from side to side
- All models in the Quick Selection Chart have been matched to a pump, cylinder, hoses and gauge, offering the complete package
- Roll Frame design features a stationary bed with the ability to support heavy loads

The One and Only

Cylinder Mounting Block

Allows cylinder mounting into a press frame, while also allowing side to side adjustment of cylinder position.

Page: 140

Pump Mounting Bracket

Heavy duty steel brackets to allow conversion to one of the Enerpac Power Sources to power your press.

Page: 140

Hydra-Lift™

Allows easy, effortless daylight adjustment.

Page: 140

Optional V-Blocks

These V-Blocks, 200 ton only, are designed for easy fixturing of round stock and other non-uniform materials. Featuring precise fit into the press bolster.

The Standard In Workshop Tools

Push Pin A-183

For applications requiring precision pressing, such as shaft removal and insertion. This attachment fits 10 ton cylinders and requires the use of a threaded adaptor saddle (A-13).

Smooth Saddle A-185

For pressing applications of delicate parts, such as aluminum castings, this saddle decreases surface marks during the pressing application. Requires 10 ton cylinder and threaded adaptor saddle (A-13).

C-Clamp Press

- 5, 10 and 20 ton capacity
- Operational in all positions

Arbor Press

- Foot mounting holes for horizontal or vertical positioning
- Machined work surfaces for easier fixturing
- Slotted back to simplify loading and unloading of longer parts

Bench Frame Press

- Cylinder mounting adaptor allows lateral positioning along rails
- Mounting holes for easy mounting to fixed surface

C-Clamp Press A-205, A-210, A-220

◀ A-310 Arbor Press used for compacting powder at 10 tons.

Cylinder Speed

This chart will help you calculate the time required for an Enerpac cylinder to extend when powered by a 10,000 psi Enerpac hydraulic pump. The Cylinder Speed Chart can also be used to determine the pump type and model best suited for an application when you know the plunger speed required.

Cylinder and Pump Selection Chart

Note: Values are approximate. Cylinder speed may vary in actual application.

CUSTOM BUILD YOUR OWN PRESS

If the press that would best fit your application cannot be found in the charts, you can easily build your custom press here. All presses must be ordered with cylinders. The pump is ordered separately.

▼ This is how a press model number is built up

1 Product Type

IP= Industrial Press

2 Frame Type

H = H-Frame
R = Roll Frame ¹⁾

3 Press Capacity

010 = 10 ton
025 = 25 ton
030 = 30 ton
050 = 50 ton
100 = 100 ton
150 = 150 ton
200 = 200 ton

4 Cylinder Type

S = Single-Acting (RC-Series)
D = Double-Acting (RR-Series)

5 Cylinder Stroke (in)

- 10 ton S/A: 06, 08, 10, 12, 14
10 ton D/A: 10, 12
- 25 ton S/A: 06, 08, 10, 12, 14
- 30 ton S/A: 08
30 ton D/A: 08, 14
- 50 ton S/A: 06, 13
50 ton D/A: 06, 13, 20
- 100 ton S/A: 06, 10
100 ton D/A: 06, 13, 18
- 150 ton D/A: 06, 13, 32
- 200 ton D/A: 13, 18, 24

6 Pump Mounting Kit ²⁾

0 = No mounting kit
1 = Hand operated and small air pumps: P-80, P-84, P-141, P-142, P-202, P-391, P-392, PA-133 and all Turbo II Air pumps
2 = Electric, large hand operated and modular air pumps: PUJ-12, PEM-12, ZE3-6 Series P-462, P-464 PAM-10 and -90 Series

¹⁾ Roll Frame Press: 50-, 100- and 200-ton press capacity only. (Assembly required)
²⁾ Includes hoses for press, except for option 0.

Ordering Example

Model number: IPH-050S06-2

IPH-050S06-2 is a 50-ton H-Frame press with a single-acting, 6 inch stroke cylinder (RC-506). It has a pump mounting kit (for an electric Pump or a Modular Air Pump).

See the cylinder and pump selection chart on previous page for selecting the proper pump.

IP Series

Capacity:
10-200 tons

Maximum Daylight and Width:
54.50 & 48.00 inches

Maximum Operating Pressure:
10,000 psi

“No Load” indicates the plunger speed as it extends toward the load (1st stage).

“Load” indicates the plunger speed as the load is applied at a system pressure of 10,000 psi (2nd stage).

Formula $V = A \div Q$

$$V \text{ (sec/in)} = A \text{ (in}^2\text{)} \div Q \text{ (in}^3\text{/min)}$$

V = Cylinder plunger speed in seconds per inch

A = Cylinder effective area in square inches (in²)

Q = Pump oil flow in cubic inches (in³)

Cylinder Plunger Speed (sec/in)	=	Cylinder Effective Area (in ²)	÷	Pump Flow Rate (in ³ /min)	x	$\frac{60 \text{ sec}}{1}$
---------------------------------	---	--	---	---------------------------------------	---	----------------------------

▼ Shown: LH-102 and TM-5 (in middle)

TM, LH Series

Capacity:

2,000 to 200,000 lbs.

Accuracy, % of full scale:

± 2%

TM and LH models are 100% tested to verify accuracy within a ± 2% range.

If your application requires a calibrated tool, it must be submitted for certification testing.

Certification is NOT available from Enerpac.

Tension Meter TM-5

- Accuracy, ± 2% of full scale
- Zinc and bronze plated to resist rust and corrosion
- Dual-range readout in kilograms and pounds
- Cushioned metal case provides safe storage and transport
- Maximum indicating pointer reading for pre-selected forces or to maintain maximum force readings

Load Cells LH Series

- Accuracy, ± 2% of full scale
- Swivel loading pad reduces eccentric loading for improved accuracy
- Maximum indicating pointer reading for pre-selected forces or to maintain maximum force readings
- Dual-range readout in kilograms and pounds

TM-5

LH-Series

ENERPAC hydraulics power many custom press applications. By providing reliable and safe high-pressure solutions, Enerpac can solve your custom press application.

Fully Automated PLC-Controlled 1800 Ton High-Accuracy Press

The pressing and heating cycle, during the production of magnetic acceleration coils, required high force and high-accuracy to ensure absolute quality.

Enerpac was consulted to assist in the design of a high accuracy production press. Control of the press force is monitored along with the temperature of the coils during forming by a PLC Control System.

600 Ton High-Accuracy Collar Press

For production of accelerator coils, sheet metal needs to be formed into a specific shape and size. The end product of this forming is a cylindrical collar, which has a very solid structure, specific shape, and a tight tolerance for circularity and concentricity.

The Enerpac team was consulted to accomplish this task using proven high-pressure technology. The 600-ton press consisted of two separate hydraulic systems. The first system featured eight 25-ton cylinders, to position the sheets, while the second system featured eight 75-ton cylinders, to press the sheets into the correct shape.

The results were a hydraulic press system that increased productivity and lowered operating costs.

1000 Ton Cold Forming Press

A manufacturer of diesel engines needed to work-harden aluminum for crankshaft bearing inserts. Working with a customer-hired Systems Integrator, Enerpac provided a 1000-ton cylinder and hydraulic power supply, to the specifications required by the Integrator, to fit into his custom frame and operate with his control system. The Enerpac solution included a 50-series electric pump and 4-way electric solenoid valve.

The final products allowed the end user to quickly, accurately, and safely manufacture crankshaft bearings with an efficient production cycle.

ENERPAC offers a complete line of pullers with the widest range of sizes, capacities and styles.

Whether your application requires mechanical, hydraulic or the patented Posi Lock® system, Enerpac can satisfy your requirements.

Made of high strength steel alloys, you can depend on Enerpac pullers to provide years of trouble-free operation, even in the harshest environments.

Hydraulic Pullers

These hydraulic pullers eliminate time-consuming and unsafe hammering, heating or prying. Damage to parts is minimized through the use of controlled hydraulic power.

Posi Lock® Pullers

The puller that meets the safety challenge. A control cage holds the pulling jaws securely in working position. This patented feature reduces the possibility of the puller jaws slipping off the work surface thereby increasing

productivity and tool life while reducing dangerous situations for the user. The Posi Lock® feature is available in mechanical or hydraulic versions.

WARNING

Do not exceed 50% of the rated puller capacity when using a double crosshead (2 griparms) or when using puller legs in combination with bearing puller attachment.

CAUTION!

Not all puller components and configurations are rated at the set capacity. Please contact Enerpac for specific details.

Always wear Safety Goggles and Gloves while using pullers.

Puller Section Overview

When selecting a puller it is important to consider three basic specifications:

1. Capacity:

The amount of force the puller is capable of producing.

Typically, the capacity required for a job can be determined by using the shaft diameter of the part being pulled.

For manual pullers, the center bolt diameter of the puller should be at least half the diameter of the shaft being pulled from.

For hydraulic pullers, the capacity in tons should be 7 to 10 times the shaft diameter. Use the following chart:

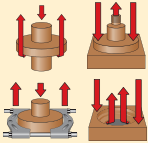

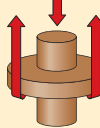

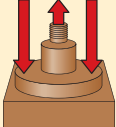

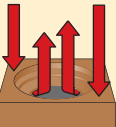

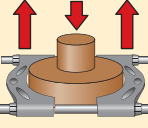

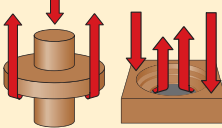

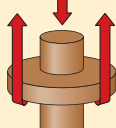

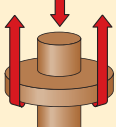

Shaft Diameter	Puller Capacity
0" to 1"	10 ton
1" to 2"	20 ton
2" to 3.5"	30 ton
3.5" to 5.5"	50 ton

2. Reach:

The distance between the bottom of the base and the jaw flats. The puller's reach must equal or exceed the same distance of the part being pulled.

3. Spread:

The distance between the jaws. The puller's spread needs to be greater than the width of the part being pulled.

Puller Function	Capacity (tons)	Puller Type	Series		Page
	8-50	Master Puller Sets Max. Reach: 27.56 in. Max. Spread: 43.30 in.	BHP		146 ▶

BHP-Series, Master Puller Sets

▼ Shown: Master Puller Set BHP-3751G

BHP Series

Capacity:

8, 20, 30 and 50 tons

CAUTION!

Not all puller components and configurations are rated at the set capacity. Please contact Enerpac for specific details.

- Supplied with a full hydraulic set including pump, hose, cylinder, gauge and gauge adaptor in a storage case
- High quality, forged steel components provide superior reliability and service
- Sets include speed crank and adjusting screw for fast contact to work before hydraulics are applied
- All Master Puller Sets include a Grip Puller, a Cross Bearing Puller, a Bearing Cup Puller and a Bearing Puller which can be ordered separately. See items 10, 20, 30 and 40

▼ Maintenance engineers throughout the industry greatly appreciate Enerpac Master Puller sets.

	Center Screw Thread	3/4"-16 UNF	1"-8 UNC	1 1/4"-7 UNC	1 5/8"-5.50 NS

* Dimensions in inches.

** Puller capacity, not attachment capacity. See Warning box!

WARNING!

Do not exceed 50% of the rated puller capacity when using a double crosshead (2 griparms) or when using puller legs in combination with bearing puller attachment.

▼ Shown: **BHP-382**

Bearing Puller

- Made of high strength steel alloy
- Wedge-shaped edges allow removal of the most hard-to-grip components
- Easily adapted to Cross Bearing Pullers for fast and efficient removal of the most difficult parts

◀ Bearing Cup Puller shown with Crosshead Puller attachment.

Bearing Puller

Bearing Puller has wedge shaped edges for placing puller behind hard to reach bearings, gears, etc., where clearance prevents direct application of grip puller arms.

The Bearing Puller can be used with the Cross Bearing Puller or the Grip Puller.

▼ Shown from left to right: EP-206, EP-108

- Patented “Safety Cage” jaw retention system
- Roll threaded shafts for less effort when applying high torque
- Slim tapered jaws for improved gripping in tight spots
- Available in 2 and 3 jaw design and inside and outside pulling configuration
- More efficient pulling, as one man can do the job where manual pullers often require two operators

For Safer and Faster Pulling

Long Jaws

Long Jaws are used to increase the reach and spread of manual pullers. They maintain the same pulling capacity as the standard jaws, but reduce clamping force to 25%.

Page: 153

Shaft Attachments

Shaft protectors and extenders are live centers that fit over the standard puller shaft for tip protection and additional reach.

Page: 153

Application Tip

In determining the correct manual puller capacity for your application, use the following rule:

The center bolt diameter of the puller should be at least 1/2 the diameter of the shaft being pulled on.

Example:

A part being pulled from a shaft with a diameter of 1.5" would require a puller with a center bolt diameter of at least .75".

◀ Positioning an EP-104, 3-jaw puller on the accessory drive of a diesel engine.

Posi Lock® Mechanical Grip Pullers

External Puller

- 1 Patented "Safety Cage" guides jaws, holding them securely onto the part.
- 2 Durable forged jaws provide positive grip.
- 3 Jaw head provides pivot and reaction point for jaws.
- 4 Pin, for easy jaw removal and replacement.
- 5 T-handle provides control of the puller jaws.
- 6 Drive bolt with rolled threads for increased force with reduced input torque.
- 7 Snap-ring retains cage to drive bolt and provides quick removal for easy service.

EP EPPMI Series

Capacity:
2-40 tons

Maximum Reach:
4.00-14.00 inches

Maximum Spread:
0.50-25.00 inches

ENERPAC offers an extensive range of dedicated tools for a variety of specific and flexible applications. Whatever your requirement... cutting, punching, spreading or bending... you can be sure that Enerpac has the correct tool to do your job safely and efficiently.

Featuring maintenance sets, machine lifts and load skates, as well as hole punches, pipe benders and cable cutters, Enerpac has the tools to ensure that even your most demanding applications can be undertaken with the highest degree of safety and accuracy.

Pump and Tool Sets

Selected hydraulic tools in this section are available in sets, for a perfect tool-pump match.

Hydraulic System Set-up

Check out our "Yellow Pages" section for help on system set-ups and valving configurations.

The Universal Hydraulic Tool Box

Maintenance Sets

Enerpac Maintenance sets are a complete assortment of accessories matched to hydraulic powered tools. Using these sets allows you to quickly configure a unique tool to meet your most difficult jobs.

Built around the Enerpac lightweight hand pump, hose and cylinder, these sets enable you to push, pull, lift, press, straighten, spread and clamp with forces up to 12.5 tons.

More Information

For detailed information on all included attachments, see the following pages.

Page: 162

◀ Clamping a workpiece is just one of the many applications for the Enerpac maintenance sets.

▼ QUICK SELECTION CHART

Capacity using attachments* (tons)	Set Model Number						Number of Attachment Components	Weight (lbs)
2.5	MS2-4	P-142	HC-7206	RC-55	GP-10S	GA-4	34	59
2.5	MSFP-5**	P-142	HC-7206	RC-55	G2535L	GA-3	24	44

* If no attachments are being used, capacity is double these values. Maximum operating pressure is then 10,000 psi.

** This set also includes the FZ-1055 Adaptor.

MS-Series, Maintenance Sets

CAUTION!

When cylinders are used with maintenance set attachments or components, the maximum system pressure must be limited to half the rated pressure (5,000 psi).

WARNING!

Only use attachments provided with set. Non-Enerpac attachments and longer extension tubes will reduce column strength, potentially creating unsafe conditions.

MS Series

Capacity (using attachments):

2.5-12.5 tons

Max. Operating Pressure (using attachments):

5,000 psi

▼ APPLICATION EXAMPLES

MS-Series, Maintenance Sets

CAUTION! When cylinders are used with maintenance set attachments or components, the maximum system pressure must be limited to half the rated pressure (5,000 psi).

Note: All dimensions in inches.

SP-Series, Lightweight Hydraulic Punch

▼ Shown: SP-35S

- .50" thick mild steel maximum capacity
- Round, oblong and square punches and dies are available to solve your punching applications
- Long life Enerpac single-acting, spring return design
- Durable steel case keeps tools and dies together and provides for easy carrying and storage
- CR-400 female coupler included

Much Faster than Drilling...

Tool Kit SPK-10

Included with all 35 ton punches, this tool kit is used to remove and install the punch into the head.

Can be ordered as a replacement under model number **SPK-10**.

Ordering Information

The 35-ton hydraulic punch may be ordered by itself or as a set, including an electric, air or hand pump.

Please refer to the Quick Selection Chart information on next page.

A punch and die may also be ordered as a matched set.

Vertical Lifting Wedge

▼ Shown: LW-16 with SB-2 and optional LWB-1

LW Series

Minimum Clearance:

.39 inches

Maximum Lift Height:

2.02*-2.72* inches

Maximum Force:

16 tons

Maximum Operating Pressure:

10,000 psi

ER-Series Load Skates

In combination with the Enerpac Lifting Wedge we recommend Load Skates for moving heavy loads.

Page: 170

Split-Flow Manifolds

Split Flow Valves to control two or four lifting wedges simultaneously.

AM-21 with 3 ports 3/8" NPTF.
AM-41 with 5 ports 3/8" NPTF.

Page: 118

- Requires .39 inch access gap
- Lifting force 16 ton at 10,000 psi hydraulic pressure
- Automatic mechanical retraction (single acting)
- Securely raises or lowers 16 tons with no slippage
- Lifting wedge LW-16 includes safety block SB-2
- Use in tandem to lift 32 tons, or 64 tons
- .83 inch of vertical lift from each step (maximum lift to 2.72 inches with optional LWB-1 stepped block)

▲ Optional LWB-1 Stepped Block

LW-16

▼ For lifting heavy equipment with minimum floor clearance the LW-16 is the ideal tool.

Max. Lifting Force (ton)	Model No.	Minimum Clearance Gap (in)	Max. Lift per Stage (in)	Max. Lifting Height (in)	Max. Lifting Height Using Stepped Block (in)	Oil Capacity (in ³)	Weight (lbs)
16	LW-16	.39	.83	2.02	2.72	4.75	15.4

*Use optional stepped block LWB-1 to increase wedge lifting height 1.18 inches.

Hydraulic Machine Lifts

▼ Shown from left to right: SOH-10-6, SOH-23-6

SOH Series

Lifting Capacity:
8.5-20 tons

Stroke:
5.39-6.18 inches

Toe Clearance:
0.79-1.18 inches

Maximum Operating Pressure:
10,000 psi

- For lifting heavy equipment with minimum available access
- Remote operation of hydraulic pump enhances safety
- Low-height lifting toe
- Precision guided to reduce friction and isolate cylinder from side-loads
- Two extendable support feet provide extra stability
- Includes RC-Series cylinder with CR-400 coupler

RSM Flat-Jac®

Low height, single acting spring-return cylinders are ideal for space restricted applications.

Page: 22

Best Match Manual Pump

To power your Enerpac Lifting Wedge, The Enerpac P-392 Hand Pump or P-392FP Foot Pump is an ideal choice.

Page: 57

Capacity (ton)	Toe Clearance with Cylinder Retracted (in)			Stroke (in)	Model Number	Oil Capacity (in ³)	Dimensions (in)						Weight (lbs)

▼ Shown: Set ERS-20

Move Heavy Loads Easily and Safely

Sets (see table) include all components necessary to handle a variety of applications. Two **ELB-1** link-up bars, two **ERH-1** handles (34.4" long) and one **EMB-1** metal box are included. Optional long handle **ERH-2** (46.4") also available.

Lifting Wedge and Machine Lifts

To place the Load Skates, the load must first be lifted. This can be done easily and safely using Enerpac Lifting Wedge or Machine Lifts.

- Rugged and sturdy construction for long life
- Low profile construction for increased stability
- Low rolling-resistance allows for easy load movement
- Attachable load leveling plates and swivel turntables for turning corners

Page: 168

▼ Load Skates may be ordered separately or as a matched set.

- Protect your equipment from dust, water, grease and dirt
- Reduce losses on the jobsite, maintenance area or shop
- Durable steel, painted with rust-resistant primer and finished in durable enamel
- Heavy-duty hinges and lifting handles
- Lockable

CM Series

Case Size:
.67-16 Cubic Ft.

Protect your Equipment

Maintenance Sets

Enerpac Maintenance sets are a complete assortment of accessories matched to hydraulic powered tools. Using these sets allows you to quickly configure a unique tool to meet your most difficult jobs.

Built around the Enerpac lightweight hand pump, hose and cylinder, these sets enable you to push, pull, lift, press, straighten, spread and clamp with forces up to 12.5 tons.

Hydraulic Pullers

These hydraulic pullers eliminate time-consuming and unsafe hammering, heating or prying.

Damage to parts is minimized through the use of controlled hydraulic power.

Page: **154**

▼ When not storing the lifting system, this heavy-duty storage case doubles as a work station.

Case Size	Model Number	Dimensions L x W x H	Thickness	Weight
(ft ³)		(in)	(in)	(lb)

Quick, Safe and Wrinkle-free Bending

'One Shot' and 'Sweep'

One shot shoes give up to a 90° bend without resetting. Sweep shoes are used where increased radii are required for multiple parallel pipe installations.

- Makes smooth, wrinkle-free bends
- Sets include cylinder, hose and manual, air or electric pump
- Sets are also available without hydraulics
- Bending shoes and bending frame are lightweight, heat-treated aluminum
- All sets include sturdy steel storage case
- All sets include BZ-12091 angle indicator for accurate bending
- BZ-12377 Shoe Lock Pin included in every set
- Eject-O-Matic™ benders (STB-202 models) use a double-acting cylinder to eject pipe from the bending shoe

▲ Typical one shot bending operation.

ENERPAC'S *Bolting Solutions* caters to the complete bolting work-flow, ensuring joint integrity in a variety of applications throughout industry:

Joint Assembly

From simple pipe alignment to complex joint positioning of large structural assemblies, our comprehensive line of joint assembly products range from hydraulic to mechanical alignment tools.

Controlled Tightening

Enerpac offers a variety of controlled tightening options to best meet the requirements of your application. From mechanical torque multipliers to hydraulically driven square drive wrenches, and low profile torque wrenches, we offer the products you need for accurate and simultaneous tightening of multiple bolts.

Joint Separation

Enerpac also provides hydraulic nut splitters and a variety of mechanical and hydraulic spreading tools for joint separation during inspection, maintenance and decommissioning operations.

High-quality bolting solutions from the brand you can trust. See how Enerpac can make your bolting work-flow more accurate, safer and efficient.

Bolting Integrity Software

Visit www.enerpac.com to access our free on-line bolting software application and obtain information on tool selection, bolt load calculations and tool pressure settings. A combined application data sheet and joint completion report is also available.

Torque Tightening

See our "Yellow Pages" for information on torque tightening.

Accurate, Efficient Torque Multiplication

When accurate make-up or break-out of stubborn fasteners requires high torque

- High-efficiency planetary gear sets achieve high output torque from low input torque
- Most models operator protected by anti-backlash device
- Multiplier output accuracy $\pm 5\%$ of input torque
- Reversible, tighten or loosen bolts
- Reaction bar or reaction plate type
- Angle-of-turn protractor standard on E300 series models
- Reaction plate models offer increased versatility with reaction point locations
- E300 and E400 series replaceable shear drives provide overload protection of internal power train (one replacement shear drive is included)

Typical Torque Multiplier Applications

- Locomotives
- Power plants
- Pulp and paper mills
- Refineries
- Chemical plants
- Mining and construction
- Off-road equipment
- Shipyards
- Cranes

▼ SELECTION CHART

Torque Multiplier Type	Output Torque Capacity		Model Number
	(Ft.lbs)	(Nm)	
Reaction Bar Multiplier	750	1015	E290PLUS
	1000	1355	E291
	1200	1625	E391
	2200	2980	E392
	3200	4340	E393
Reaction Plate Multiplier	2200	2980	E492
	3200	4340	E493
	5000	6780	E494
	8000	10845	E495

◀ Enerpac Reaction Bar Torque Multiplier E393 used to manually torque bolts up to 3,200 ft-lbs.

Manual Torque Multipliers

Manual Torque Multipliers

Enerpac manual torque multipliers provide efficient torque multiplication in wide clearance applications and when external power sources are not available. Manual torque multipliers are used in most industrial, construction, and equipment maintenance applications. Hydraulic torque wrenches are better suited for tight tolerance, flange and repetitious bolting applications.

Use Reaction Bar Models:

- where space is limited
- where multiple reaction points are available
- when portability is desirable

Use Reaction Plate Models:

- above 3200 Ft.-lbs. output torque
- on flanges and applications where neighboring bolt or nut is available to react against
- when extreme reaction forces are generated

E Series

Maximum Output Torque:

750-8000 Ft.lbs

Torque Ratio:

3:1-52:1

Multiplier Output Ratio Accuracy:

± 5 %

Selector Pawl

Models with anti-backlash protection have directional selector pawls. Set the pawl for clockwise or counter-clockwise rotation.

Angle-of-Turn Protractor

E391, E392 and E393 models include an angle-of-turn protractor (scale) to tighten fasteners using a "torque turn" method. Allows accurate measuring a specific number of degrees of rotation.

Shearable Square Drive

Designed to provide overload protection on E300- and E400-series multiplier power train by shearing when excess input torque is applied. Internal shear pin prevents tool from falling off bolt.

Reaction Bar Type ¹⁾

Reaction Plate Type ¹⁾

CAUTION!

Never use impact type air tools for power driving torque multipliers. Torque multiplier drive train damage will occur.

Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

¹⁾ E200 and E400-series do not have an Angle-of-Turn Protractor (scale).

User must verify manual torque wrench accuracy prior to use to ensure accurate final output torque.

Rigid Steel Design

The *Professional* Square Drive Solution

S-Series, Square Drive Wrenches

This product range has been designed using state-of-the-art CAD techniques to bring you the most advanced and safe torque wrench on the market.

To ensure that the tools you buy meet our own exacting requirements, during the design process every prototype was put through finite element stress analysis, photo-elastic modeling, rigorous cyclic testing and strain gauging.

Simplicity

- Includes handle to improve tool handling and safety
- 360° click-on, multi-position reaction arm
- Push button square drive release for quickly reversing the square drive for tightening or loosening
- Fine tooth ratchet prevents tool “lock-on”
- Single 360° hydraulic swivel manifold, complete with screw lock couplings, increases wrench and hose maneuverability

Design

- Compact, high-strength uni-body construction for a small operating radius
- Robust design with minimal parts enables easy on-site maintenance without special tools
- Lightweight, ergonomic design for easy handling and an easy fit, even in applications where access is limited
- Optimised strength-to-weight ratio
- Fast operation due to the large nut rotation per wrench cycle (35 degree rotation angle) and rapid return stroke

Reliability

- All wrenches are nickel-plated for excellent corrosion protection and improved durability in harsh environments

Accuracy

- Constant torque output provides high accuracy across the full stroke
- Accuracy of +/-3% can be achieved because the Uni-Body construction reduces internal deflections

TSP - Pro Series Swivel

Featuring Tilt & Swivel technology the TSP provides 360° X-axis rotation and 160° Y-axis rotation.

How to Order*

Order as an accessory which can be fitted to existing S-Series wrenches.

Factory fitted to new S-Series wrenches: Suffix the wrench model number with "-P", e.g.: **S1500-P**.

*Includes male and female couplers.

Page: 188

Torque Wrench Hoses

Use Enerpac THQ-700 Series torque wrench hoses with S-Series torque wrenches to ensure the integrity of your hydraulic system.

19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T

Double-Acting Square Drive Hydraulic Torque Wrenches

- ① Drive Unit
- ② Pro Series Swivel
- ③ Reaction Arm
- ④ Extended Reaction Arm
- ⑤ Square Drive
- ⑥ Allen Drive
- ⑦ Short Reaction Arm

Select the Right Torque

250% Choose your Enerpac Torque Wrench using the **untightening rule of thumb**: Loosening torque equals about 250% of tightening torque.

S Series

Maximum Torque at 10,000 psi:
25,150 Ft.lbs

Square Drive Range:
3/4-2 1/2 inch

Nose Radius:
.99-2.50 inch

Maximum Operating Pressure:
10,000

*Additional socket sizes available upon request.

The rigid steel design of S-Series torque wrenches guarantee durability, reliability and safety. These wrenches can be powered by the portable ZU4T-Series pumps. ▶

Torque Wrench and Pump Selection Matrix

For optimum speed and performance see the torque wrench and pump matrix.

Accessories for S-Series Torque Wrenches

TSP-Series, Pro Series Swivels

- Featuring Tilt and Swivel technology
- 360° X-axis and 160° Y-axis rotation
- Increases tool fit in restricted access areas
- Simplifies hose placement
- Includes male and female couplers

**TSP
RTE
SRS
Series**

Torque Wrench Model Number	Model Number	Maximum Pressure (psi)	Wt. (lbs)
S1500, S3000	TSP100A	10,000	0.4
S6000, S11000, S25000	TSP200A	10,000	0.4

To order an S-series wrench fitted with the TSP swivel, add suffix "P" to the model number. Example: **S1500-P**.

RTE-Series, Reaction Tube Extensions

- Full torque rated
- Increases tool fit in restricted access areas

Torque Wrench Model Number	Model Number	Dimensions (in)					Wt. (lbs)*
		A	B	C	D	E	
S1500	RTE15	27.80	5.98	25.04	2.28	23.62	10.1
S3000	RTE30	28.86	5.98	25.47	2.24	23.62	12.1
S6000	RTE60	29.41	5.98	25.94	2.56	23.62	17.0
S11000	RTE110	30.28	5.98	26.57	2.99	23.62	24.7
S25000	RTE250	32.01	5.98	26.97	3.94	23.62	38.1

* Weights indicated are for the accessories only and do not include the wrench.

SRS-Series, Extended Reaction Arms

- Lightweight interchangeable design

Wrench Model	Max. Torque (Ft-lbs)	Model Number	Dimensions (in)					Wt. (lbs)*
			A	B	C	D	E

Pin and Ring

All sockets are supplied with a "Pin and Ring" to hold the socket in place on the square drive of the tool.

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

ENERPAC professional series steel torque wrenches provide reliable controlled tightening solutions across many industries.

S3000 Square Drive Torque Wrench on Wind Turbine Assembly and Maintenance

S3000 used to connect wind turbine segments during assembly and maintenance. A robust but compact solution is required for bolt tightening on wind tower sections. Large numbers of fasteners require precise application of torque to ensure joint integrity is achieved and maintained.

The Enerpac S-Series wrench offers simple and reliable operation while providing accurate and repeatable results.

W4000 Low Profile Torque Wrench on an ANSI Pipe Flange

Throughout the Oil and Gas, Petrochemical and Processing Industries, pipeline joints, valves, pumps and machinery present challenges for controlled bolting.

The restricted access on this pipeline elbow was easily overcome with an Enerpac W-Series Torque Wrench. The W Wrenches offer reliability and control, ensuring even and consistent torque is applied to all bolts.

S6000 on a High Volume Pump Unit

High vibration requires long studs to be accurately tightened to the calculated preload.

During maintenance, quick turnaround times are essential; S Series wrenches provide a large angle of nut rotation per stroke, offering speed and accuracy in a compact ergonomic tool.

▼ Shown: Drive units with interchangeable cassettes

Simplicity

- Includes handle to improve tool handling and safety
- No tools are needed for changing the hexagon cassettes
- Innovative, pinless wrench construction incorporates quick release cylinder and automatic crank engagement
- Single 360° hydraulic swivel manifold complete with screw lock couplings increases wrench and hose maneuverability

Design

- Cylinders and low profile cassettes have been engineered to give ultra slim, compact low clearance tooling with a small nose radius
- Robust design with minimal parts enables easy on-site maintenance without special tools
- Nut sizes covered range from 1 1/8 - 6 1/8 inch (30 - 155 mm)
- Optimized strength-to-weight ratio
- Fast operation due to the large nut rotation per wrench cycle (30 degree rotation angle) and rapid return stroke

Reliability

- All wrenches are nickel-plated for excellent corrosion protection and improved durability in harsh environments
- All wrenches are fitted with bronze bushings to ensure the ratchet will never seize in the sideplates, thus eliminating costly repairs

Accuracy

- Constant torque output provides accuracy ± 3% across the full stroke
- In-line reaction foot ensures accuracy by reducing internal deflections

Rigid Steel Design

The *Professional* Low Profile Solution

W-Series, Low Profile Torque Wrenches

This product range has been designed using state-of-the-art CAD techniques to bring you the most advanced and safe torque wrench on the market. Safety, quality, toughness and reliability are built in.

During the design process every prototype was put through finite element stress analysis, photo-elastic modelling, rigorous cyclic testing and strain gauging.

TSP - Pro Series Swivel

Featuring Tilt and Swivel technology the TSP provides 360° X-axis rotation and 160° Y-axis rotation.

How to Order*

Order as an accessory which can be fitted to existing W-Series wrenches.

Factory fitted to new W-Series wrenches: Suffix the wrench model number with "-P" e.g.: **W2000-P**.

Torque Wrench Hoses

Use Enerpac THQ-700 Series hoses with W-Series torque wrenches to ensure the integrity of your hydraulic system.

19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T

Double-Acting Hydraulic Hexagon Torque Wrenches

- ① Hexagon Cassette
- ② Drive Unit
- ③ Pro Series Swivel
- ④ Extended Reaction Arm
- ⑤ Reducer Insert
- ⑥ Reaction Paddle

Hexagon Cassettes and Reducer Inserts

Maximum versatility with the full range of interchangeable hexagon cassettes and hexagon reducing inserts is available in metric and inch sizes.

Page: 194

W Series

Maximum Torque at 10,000 psi:
35,000 Ft.lbs

Hexagon Range:
1 1/8 - 6 1/8 inch

Nose Radius:
1.22-4.52 inch

Maximum Operating Pressure:
10,000 psi

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench and pump matrix.

Page: 202

▼ These rigid steel wrenches with low profile interchangeable hexagon cassettes guarantee durability and maximum versatility in bolting applications.

W22000 Series Imperial Cassettes & Reducer Inserts

Maximum Torque at 10,000 psi:

22,500 Ft.lbs

Hexagon Range:

2¹⁵/₁₆ - 5³/₈ inch

Maximum Operating Pressure:

10,000 psi

W
Series

▼ WCR4000 Roller Cassette with Spanner and W4000 Drive Unit

Provides a safe, and reliable controlled bolting solution for applications with limited access

- Spanners available to fit most commonly used API flanges
- Small nose radius – resolves bolt to pipe restrictions
- Slim spanner design – reduces bolt height restrictions
- Wide range of spanners ranging from 1⁷/₁₆ - 3¹/₈ inches (36 - 80 mm)
- Includes handle to improve tool handling and safety
- Rigid solid steel body for maximum endurance and minimum downtime

SAFE LINK Design

SAFE-LINK spanner design includes a mechanical fuse inside the cassette, providing a safer bolting

experience for the operator and bystanders.

Closed Bi-Hex Spanner

Slim ring style profile with bi-hexagonal design provides the ultimate mixture of versatility and durability.

▼ *The small nose radius of the closed spanner resolves bolt to pipe restrictions where standard hexagon cassettes do not fit.*

▼ *The slim spanner design allows tool to fit between bolts, where access is restricted and standard hexagon cassettes do not fit.*

▼ *The roller-cassette reacts off the periphery of the flange, as the spanner drives the nut forward, allowing the WCR4000 to provide more torque in a limited space.**

*NOTE: The WCR Cassette is non-ratcheting.

Hydraulic Roller Cassette Torque Wrench

WCR4000-Series Applications

The WCR4000 helps resolve narrow clearance restrictions in bolting of API and BOP flanges.

The Enerpac WCR4000 Roller Cassette has been developed for applications where there are severe clearance restrictions, particularly in height above the nut or between the bolt center and the inside of the joint.

Powered by the standard W4000 drive unit which is compatible with standard W-Series hexagon cassettes.

The WCR-wrench must be repositioned after each wrench cycle by removing the tool from the nut and operating the pump in the retract direction. The tool does not retract.

Rigid Steel Design

The most advanced and safe torque wrenches on the market. To ensure that the tools you buy meet our own exacting requirements, during the design process every prototype was put through finite element stress analysis, photo-elastic modeling, rigorous cyclic testing and strain gauging.

Solid steel tool body for maximum endurance and minimum downtime.

WCR Series

Bi-Hexagonal Spanner Size:

1⁷/₁₆-3¹/₈ inch

Spanner Nose Radius:

1.22-2.18 inch

Maximum Torque:

4250 Ft-lbs

Maximum Operating Pressure:

10,000 psi

Torque Wrench Pumps

Visit enerpac.com for system matched air and electric torque wrench pumps providing control to operate hydraulic torque wrenches.

Torque Wrench Hoses

Use Enerpac THQ-700 Series hoses with W-Series torque wrenches to ensure the integrity of your hydraulic system.

19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T

TSP WTE WRP Series

TSP-Series, Pro Series Swivels

TSP-Series

- Featuring Tilt and Swivel technology
- 360° X-axis and 160° Y-axis rotation
- Increases tool fit in restricted access areas
- Simplifies hose placement
- Includes male and female couplers

Torque Wrench Model Number	Model Number	Maximum Pressure (psi)	Wt. (lbs)
W2000, W4000	TSP100A	10,000	.44
W8000, W15000, W22000, W35000	TSP200A	10,000	.44

To order a W-series wrench fitted with the TSP swivel, add suffix "P" to the model number. Example: **W2000-P**.

WTE-Series, Extended Reaction Arm

WTE-Series

- Full torque rated
- Increases tool fit in restricted access areas

ENERPAC S-Series and W-Series Torque Wrenches provide high accuracy across the full stroke for safety critical applications.

W4000 Low Profile Torque Wrench used in a set of four to simultaneously tighten a flange

Sometimes some creativity is needed to tighten a joint that must be brought together by tightening multiple bolts at the same time. By combining four Enerpac W-Series wrenches with a 4-port manifold on an Enerpac ZE-Series pump this specialty task can be done safely and quickly. This simple adaptation provides even and accurate torque across the flange four times faster than using only one W4000 at a time.

S1500 Square Drive Wrench with twice the flexibility

When looking to tighten the bolts on a large specialized piece of machining equipment the need for a unique tool was requested by the customer. A double-headed Reaction Arm and double-sided Square Drive was the answer to the situation.

Although in most instances the Enerpac product in the catalog can solve a customer's requirements there are occasions where something custom is required. Enerpac has the capabilities to provide those solutions.

W8000 Low Profile Torque Wrench tightening the bolts on turbine.

Using the strength and accuracy of a steel wrench to tighten highly stressed bolts on a turbine is the safe way to handle a critical application.

All of Enerpac's W-Series and S-Series Wrenches are made of high-strength steel which gives you additional stiffness that other alloys cannot provide. This added stiffness translates into a stronger and more durable tool.

Optimum Torque Wrench and Pump Combinations

For optimum speed and performance Enerpac recommends the following system set-up with wrench-pump-hose combinations.

ZU4-Series Electric Torque Wrench Pump

Utilizing a universal motor, the ZU4-Series has excellent low voltage characteristics. It works well with long extension cords or generator driven electrical power supplies. A field proven, efficient design ensures this pump is dependable and will draw less current—lowering your operating cost. The pumps are available in Pro and Classic formats. ZU4 Pro pumps have an LCD feature to display torque or pressure, selectable torque wrench, and self-diagnostics – premium features not available on any other pump. ZU4 Classic pumps feature an analogue gauge and a basic electrical package to deliver durable, safe and efficient hydraulic power.

ZE-Series Electric Torque Wrench Pump

The ZE-Series features premium options, such as the LCD to display torque or pressure values, and self-diagnostics. These pumps utilize an induction motor, making the ZE-Series the coolest and quietest pumps in their class.

ZA-Series Air Torque Wrench Pump

Utilizing the highly efficient design of the Z-Class pumping element, this air driven pump is best suited to power medium to large size torque wrenches

TQ-700 Series

Designed for both portability and production, the TQ-700 features optimized flow technology to deliver superior bolting speed.

Portable Electric Torque Wrench Pumps

▼ Shown: PMU-10427

PMU Series

Reservoir Capacity:

0.5-1 gal.

Flow at 10,000 psi:

20 in³/min.

Motor Size:

0.5 hp

Maximum Operating Pressure:

10,000 and 11,600 psi

Pump Ratings

-Q suffix pumps are for 10,000 psi torque wrenches, and include spin-on couplers.

-E suffix pumps are for use with 11,600 psi rated torque wrenches, and include polarized lock-ring safety couplers.

- Powerful two-speed pump is lightweight and easy to carry
- Standard heat exchanger package keeps pump cool under extreme use
- Glycerin filled gauge with scales reading in psi and bar
- Transparent overlays in Ft.lbs and Nm for all Enerpac torque wrenches provide a quick torque reference
- Universal motor for a high power-to-weight ratio; generates full pressure on as little as 50% of the rated line voltage
- Adjustable pressure relief valve for accurate torque adjustments and precise repeatability

Twin Torque Wrench Hoses

Use Enerpac THQ-700 series twin hoses with 10,000 psi pumps, or use THC-700 series twin hoses with 11,600 psi pumps.

ZU4 Electric Torque Wrench Pumps

ENERPAC 
POWERFUL SOLUTIONS. GLOBAL FORCE.

▼ Shown: ZU4204TB-Q and ZU4204BB-Q

- Features **Z-Class** high-efficiency pump design; higher oil flow and bypass pressure, cooler running and requires 18% less current draw than comparable pumps
- Powerful 1.7 hp universal electric motor provides high power-to-weight ratio and excellent low-voltage operating characteristics
- High-strength, molded composite shroud protects motor and electrical components, while providing an ergonomic, non-conductive handle for easy transport
- Low-voltage pendant provides additional safety for the operator
- Valve technology reduces oil operating temperatures and withstands contaminants to increase pump reliability

Pro-Series

- LCD readout provides pressure and torque display and a number of diagnostic and readout capabilities never before offered on a portable electric pump
- Auto cycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed. (Pump can be used with or without auto cycle feature)

Z Tough.
Dependable.
Innovative.
CLASSIC

FIRMWARE for Pro-Series

- Display torque in Ft.lbs. or Nm
- Display pressure in bar, MPa or psi
- Torque wrench model is selectable
- “Auto cycle” setting easily programmable

Classic Electrical

Basic electrical package includes mechanical contactor, ON/OFF toggle switch, pendant with electro-mechanical pushbuttons, 24V transformer timer and operator accessible circuit breaker.

Back-lit LCD, for Pro-Series

- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Information can be displayed in English, French, German, Italian, Spanish and Portuguese
- Pressure transducer is more accurate and durable than analog gauges

▼ Any brand of hydraulic torque wrench can be powered by the portable ZU4-Series torque wrench pump.

ZU4 Torque Wrench Pumps

Z-Class – A Pump For Every Application

Patented Z-Class pump technology provides

high by-pass pressures for increased productivity—important in applications using long hose runs and high pressure-drop circuits, like heavy lifting or certain double-acting tools.

Enerpac ZU4 Hydraulic Pumps are built to power small to large torque wrenches. Choosing the right ZU4 torque wrench pump for your application is easy.

Classic Electric Torque Wrench Pump

- The Classic has an analog gauge and traditional electro-mechanical components (transformers, relays and switches) in place of solid-state electronics. The Classic delivers durable, safe and efficient hydraulic power.

Pro Series Electric Torque Wrench Pump

- Digital (LCD) display features a built-in hour meter, pressure and torque display, and shows self-diagnostic, cycle-count and low voltage warning information. These premium features are not available on any other pump—anywhere!

AutoCycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed. (Pump can be used with or without AutoCycle feature).

ZU4 Series

Reservoir Capacity:

1 and 1.75 gal.

Flow at 10,000 psi:

60 in³/min.

Motor Size:

1.7 hp

Maximum Operating Pressure:

10,000 and 11,600 psi

Torque Wrench Pump Selection Matrix

How to order your ZU4-Series torque wrench pump

Ordering Example 1

Model No. ZU4208TB-QMHK
10,000 psi pump for use with Enerpac S- and W-Series and other 10,000 psi torque wrenches, 115V motor, 1.75 gallon reservoir, 4-wrench manifold, heat exchanger and skidbar.

Refer to the torque wrench pump selection matrix for optimum wrench, pump and hose combinations.

Twin Torque Wrench Hoses

Use Enerpac THQ-700 series twin hoses with 10,000 psi pumps, or use THC-700 series twin hoses with 11,600 psi pumps.

10,000 psi	
19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T
11,600 psi	
19.5 feet long, 2 hoses	THC-7062
39 feet long, 2 hoses	THC-7122

▼ Most hydraulic torque wrenches can be powered by the Enerpac ZU4-Series torque wrench pump.

ZU4 Torque Wrench Pump Options

Heat Exchanger

- Removes heat from the bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components

Accessory Kit No. *	Can be used with:
ZHE-U115	115V pumps
ZHE-U230	230V pumps

* Add suffix **H** to pump model number for factory installation. Heat Exchanger adds 9.1 lbs. to pump weight.

Ordering Example:

Model No. ZU4208TB-H

Skidbar

- Provides greater pump stability on soft or uneven surfaces
- Provides easy two-handed lift

Accessory Kit No. *	Can be used on ZU4-Series torque wrench pumps
SBZ-4	1 and 1.75 gallon ¹⁾
SBZ-4L	1 and 1.75 gallon ²⁾

* Add suffix **K** to pump model number for factory installation.

¹⁾ Without heat exchanger 4.9 lbs.

²⁾ With heat exchanger 7.0 lbs.

Ordering Example:

Model No. ZU4208TB-QK

Roll Cage

- Protects pump
- Provides greater pump stability

Accessory Kit No. *	Can be used on ZU4-Series torque wrench pumps
ZRC-04	1 and 1.75 gallon reservoir ¹⁾
ZRC-04H	1 and 1.75 gallon reservoir ²⁾

* Add suffix **R** for factory installation.

¹⁾ Without heat exchanger

²⁾ With heat exchanger

Ordering Example:

Model No. ZU4208BB-QR

ZU4 Series

Reservoir Capacity:

1 and 1.75 gal.

Flow at 10,000 psi:

60 in³/min.

Motor Size:

1.7 hp

Maximum Operating Pressure:

10,000 and 11,600 psi

4-Wrench Manifold

- For simultaneous operation of multiple torque wrenches
- Can be factory installed or ordered separately

Accessory Kit No. *	Can be used on ZU4-Series torque wrench pumps
ZTM-E	for 11,600 psi torque wrenches
ZTM-Q	for 10,000 psi torque wrenches

* Add suffix **M** to pump model number for factory installation.

Ordering Example:

Model No. ZU4208TB-QM

▼ Shown: TQ-700E

Lightweight Torque Wrench Pump

- Optimized flow technology delivers up to 50% faster bolting than competing pumps
- Compact and lightweight design fits through tight openings and provides easy handling
- Built-in protection for controls and gauge for job-site durability
- IP55 rating for superior dust and water protection
- Advanced IEC Motor provides for quiet, continuous operation, high voltage tolerance, and low maintenance
- Simple pressure setting and convenient pendant control for hassle-free operation

Optimized for S-Series and W-Series Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

Pendant Control

The TQ-700 comes equipped with a 20-foot pendant cord which allows the user to pre-saturate the pump from a distance increasing productivity and speed of setup.

Four Port Manifold

The TQ-700 Classic offers an optional four wrench manifold as an accessory (TQM) factory installed. (Add suffix "M" at the end of the model number. For example: TQ700EM) .

Twin Torque Wrench Hoses

Use Enerpac THQ-700 series twin hoses with 10,000 psi pumps.

10,000 psi	
20 feet long, 2 hoses	THQ-706T
40 feet long, 2 hoses	THQ-712T

◀ The TQ-700E and the W-Series wrenches are a productive combination in wind applications.

Electric Torque Pump

TQ-700 Series Pump Applications

The TQ-700 Series pump is ideal for powering hydraulic wrenches for the Power Generation and Wind Markets.

The TQ-700 has been engineered with **Optimized Flow Technology** to deliver up to 50% faster bolt tightening than competing pumps.

Bolting speed is more complex than how much flow per minute the pump produces. The key is optimizing the flow rate across the entire bolting cycle. With more oil flowing at the right time and at the right volume, you achieve

the optimized flow for a hydraulic bolting system. The result of this optimized flow is more bolts tightened faster and a more productive work team.

Internal laboratory testing based on standard torquing procedure on a pipe flange with 14, 1 1/8" bolts.

Dimensions shown in inches.

Performance	For Use with Torque Wrenches		Pressure Rating (psi)	Model Number	Motor Electrical Specification	Usable Oil Capacity (gal)	Weight (no oil) (lbs)
	S	W

Reservoir Capacity:
1 gallon

Maximum Operating Pressure:
10,000 psi

FS-Series Spreaders

FS-Series Flange Spreaders provide quick and easy joint separation using hydraulic or mechanical force.

Page: 224

Nut Splitters / Nut Cutters

Remove rusted or corroded nuts easily with Enerpac Nut Cutters. Hexagon nut capacities up to 5.12 inches.

Page: 221

IP55 Rating for Superior Dust and Water Protection

The IP Code (or Ingress Protection Rating) classifies and rates the degrees of protection provided against the intrusion of solid objects and water in mechanical casings and electrical enclosures.

An IP55 rating means the TQ-700 offers complete protection against contact with mechanical and electrical components, and that dust will not enter in a sufficient quantity to interfere with the operation of the equipment.

The IP55 rating also means water jets sprayed against the TQ-700 from any direction will not have any harmful effects.

CLASS

FIRMWARE 7.0

- Display torque in Ft.lb. or Nm
- Display pressure in bar, MPa or psi
- Torque wrench model is selectable
- “Auto cycle” setting easily programmable

- Features **Z-Class** high-efficiency pump design; higher oil flow and bypass pressure, cooler running and requires 18% less current draw than comparable pumps
- Totally enclosed, fan-cooled industrial electric motors supply extended life and stand up to harsh industrial environments
- Low-voltage pendant provides additional safety for the operator
- High-strength, molded electrical enclosure protects electronics, power supplies and LCD readout from harsh environments
- LCD readout provides pressure and torque display and a number of diagnostic and readout capabilities never before offered on a portable electric pump
- Auto cycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed (Pump can be used with or without auto cycle feature)
- Valve technology reduces oil operating temperatures and withstands contaminants to increase pump reliability

Back-lit LCD

- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Information can be displayed in English, French, German, Italian, Spanish and Portuguese
- Pressure transducer is more accurate and durable than analog gauges

▼ PERFORMANCE CHART

Pump Series	Output Flow Rate (in ³ /min)				Motor Size		Relief Valve Adjustment Range (psi)	Sound Level (dBA)
	100 psi	700 psi	5,000 psi	10,000 psi	hp	RPM		
ZE4	650	600	62	60	1.5	1750	1000 - 11,600	75
ZE5	850	825	123	120	3.0	1750	1000 - 11,600	75

Flow rate will be approximately 5/6 of these values at 50 Hz.

▼ Shown: PTA-1404

Two-Stage Power in a Portable Design

- Compact and portable
- Handle located directly over pump's center of gravity for greater ease in carrying
- High bypass (1800 psi) for faster torque cycles
- High power-to-weight ratio suits all Enerpac torque wrenches
- Glycerine filled pressure gauge with scales reading in psi/bar
- Transparent overlays in Ft.lbs and Nm for all Enerpac torque wrenches provide a quick torque reference
- Internal safety relief valve, factory preset
- 15 ft. air pendant assembly enables easy maneuvering at the job site

Pump Ratings

-Q suffix pumps are for 10,000 psi torque wrenches, and include spin-on couplers.

-E suffix pumps are for use with 11,600 psi rated torque wrenches, and include polarized lock-ring safety couplers.

Ordering Notes: Maximum allowable hardness to split is HRc-44. Not to be used on square nuts. Larger sizes available upon request.

* Available as Tool-Pump set, see note on this page.

▼ Shown: NS-7080, NS-70105

- Specially designed to suit standard ANSI B16.5 / BS1560 flanges
- Single-acting, spring return cylinder
- Tri-blade technology provides three cutting surfaces on a single blade
- Interchangeable heads provide maximum nut range flexibility
- Preset scale allows controlled blade extension, which avoids damage to bolt threads
- Grip tape and handle included for more secure maneuverability
- Nickel-plated cylinder body for excellent corrosion protection and improved durability in harsh environments
- Internal Pressure Relief Valve for overload protection

Power and Precision

High Performance Nut Splitter

Blade Cutting Depth Scale

Adjustable cutting depth scale for controlled blade extension, which avoids damage to bolt threads.

The scale indicates the bolt range in metric and imperial values on each cutting head.

Hydraulic Nut Cutters

The NC-Series models are available featuring an angle-head design for 0.50"-2.88" hexagon nuts.

Page: 221

FS-Series Spreaders

FS-Series Flange Spreaders provide quick and easy joint separation using hydraulic or mechanical force.

Page: 224

ATM Flange Alignment Tools

The ATM series provides safe high-precision flange alignment tools that fit most commonly used ANSI, API, BS, and DIN flanges.

Page: 226

◀ Heavily corroded and weathered nuts are quickly split and removed using an NS-Series Nut Splitter.

Hydraulic Nut Splitters

Nut Splitter Sets

To provide maximum flexibility, NS-Series Nut Splitters can also be ordered in sets (NS-xxxSy).

Select Nut Splitter size and pump style from the chart below.

To order additional Cutting Heads (NSH-xxxxxx), Cylinders (NSC-xxx) or Replacement Blades (NSB-xxx), see Selection Chart below.

SET SELECTION:

- 1 Select your Nut Splitter
- 2 Select your pump type

Hydraulic and Mechanical Industrial Spreaders

▼ Shown: FSH-14 and FSM-8 with safety blocks SB1

FSM/FSH Series

Tip Clearance / Maximum Spread*:
0.24/3.16 inches

Maximum Spread Force:
8-14 tons

Maximum Operating Pressure:
10,000 psi (FSH-14)

Stepped Blocks FSB-1

Use this pair of stepped blocks to increase wedge opening up to 3.16 in. (81 mm). Fits both FSH-14 and FSM-8.

- **Integrated wedge concept:** friction-free, smooth, parallel wedge movement eliminates flange damage and spreading arm failure
- **Unique interlocking wedge design:** no first step bending and risk of slipping out of joint
- **Requires very small access gap of only .24 in. (6 mm)**
- **Stepped spreader arm design:** each step can spread under full load
- **Few moving parts means durability and low maintenance**
- **Safety block SB-1 and ratchet spanner SW-22 included with FSM-8**
- **Safety block and Enerpac RC-102 cylinder included with FSH-14**

Flange Spreader Sets

Hydraulic FSH-14 is available as a set (pump, tool, gauge, adaptor and hose).

Set Model Number	Set Includes:	
STF-14H	FSH-14	GA-2
	P-392	GP-10S
	HC-7206	-

▼ Two FSH-14 spreaders used simultaneously with Enerpac handpump, hoses and AM-21 split-flow manifold.

Max. Spreading Force (ton)	Model Number	Tip Clearance (in)	Max. Spread* (in)	Type	Oil Capacity (in ³)	Weight (lbs)
8	FSM-8	.24	3.16	Mechanical	-	14.3
14	FSH-14	.24	3.16	Hydraulic	4.76	15.7

* Using stepped blocks FSB-1.

ATM-Series, Flange Alignment Tools

▼ From left to right: ATM-4, ATM-9, ATM-2

- Enerpac ATM-Series tools rectify twist and rotational misalignment quickly, safely, and without the need for an external power source
- Appropriate for use on most ANSI, API, BS and DIN flanges
- No slings, hooks or lifting gear required
- Can be installed and used in any position (horizontally or vertically)
- Portable, lightweight design enables easy transport and use, even in remote locations

ATM Series

Minimum Bolt Size:

.63-1.24 inches

Flange Wall Thickness:

.55-9.00 inches

Maximum Lifting Force:

1-10 tons

Adjustable Reach

The highly adjustable reach of the wing and drop leg on the **ATM-4** and **ATM-9** allows precise alignment.

ATM-9 Hydraulics

Includes cylinder, P-142 two-speed hand pump and 6-ft long hose (HC-7206C).

All dimensions shown in inches.

ATM-2

ATM-4

ATM-9

▼ The compact ATM-2 is actuated by simply hand turning the crank.

Maximum Lifting Force (ton)* (kN)*	Model Number	Minimum Bolt Size**		Flange Wall Thickness (max)		Weight (lbs)	
		(in)	(mm)	(in)	(mm)		
1	10	ATM-2	.63	16	.55 - 3.29	14 - 82	3.5
4	40	ATM-4	.95	24	1.18 - 5.23	30 - 133	19
10	90	ATM-9**	1.24	31,5	3.66 - 9.00	93 - 228	32

* At 10,000 psi maximum operating pressure.

** ATM-9 includes an Enerpac hand pump and hydraulic hose (gauge and adaptor sold separately). ATM-9 weight includes tool only.

FF-Series, Mechanical Flange Face Tool

▼ Shown: FF-120

- Refacing made easy — hand-operated machine tool can be set up anywhere without the need for air, electric or hydraulic power support
- Lightweight and portable — easily transported to remote locations for increased productivity
- Adjustable cutting range for flange diameters between 1-12 inches [25,4-304,8 mm]
- Interchangeable collets for ID mounting range from 1-6 inches allowing the user to work on many different flanges with minimal time between set-ups
- Interchangeable lead screws suitable for refacing damaged raised-face (RF), flat-face (FF) or lens-ring joint flanges
- Tool body with expanding collets centers itself providing real concentric operation

Dimensions shown in inches.

▼ TOOL SELECTION CHART

Pipe Flange Cutting Diameter Range		Internal Pipe Mounting Diameter Range		Average Roughness (Ra)		Model Number	Wt. (lbs)
(in)	(mm)	(in)	(mm)	(μ in)	(μ m)		
1.0 - 12.0	25,4 - 304,8	1.0 - 6.0	25,4 - 152,4	125-250	3,18-6,35	FF-120	15
				60-100*	1,52-2,54*		

* When using fine thread feed screw, FF120FSF.

FF Series

Pipe Flange Cutting Diameter Range:

1-12 in (25,4-304,8 mm)

Internal Pipe Mounting Diameter Range:

1-6 in (25,4-152,4 mm)

Average Roughness:

125-250 μ in (3,18-6,35) μ m

Joint Separation Tools

FS and FSH-Series parallel wedge spreaders provide quick and easy joint separation using hydraulic or mechanical force.

224

Joint Assembly Tools

Rectify twist and rotational alignment without additional stress in pipe lines using the **ATM-Series** flange alignment tools.

Page: 226

Fine Thread Feed Screw

Accessory Kit **FF120FSF** is included as standard and provides a fine thread feed screw, 1/2"-20 UNF, and delivers a Ra of:

60-100 μ in (1,52-2,54 μ m)

▼ The Enerpac FF120 Quick Face has same precision and quality of finish as powered machines.

With more than 50 years supporting industrial markets, Enerpac has gained the unique and in-depth expertise that is respected by industrial professionals around the world. Across every continent, Enerpac's network of application engineers, authorized distributors and technical service centers can reach any location, and deliver innovative solutions, technical assistance and quality products.

Enerpac's complete line of standard and customized products and a unique systems approach offers the benefits of safety and efficiency to applications where high forces are required. Whether constructing a signature bridge across a deep valley, lifting a national landmark for seismic retrofit or simultaneously testing hundreds of foundation pilings to support a new building, Enerpac will supply the high-force solutions to get the job done.

▼ Shown: **SBL1100 Hydraulic Gantry**

- **Self-contained hydraulics and electronics**
- **Intelli-Lift wireless control system**
- **Self-propelled wheels or tank rollers**
- **Foldable boom on SBL1100, MBL500 and MBL600**
- **Full range of supplementary equipment: header beams, lifting lugs, side shift, skid tracks**
- **All gantries are ASME B30.1 compliant**

◀ Shown: **SBL1100**

SL/SBL/MBL Series

Capacity:
67-1200 tons

Lift Height:
11-47 feet

Hydraulic Gantries are a safe, efficient way to lift and position heavy loads in applications where traditional cranes will not fit and permanent overhead structures for job cranes are not an option.

Hydraulic Gantries are placed on skid tracks to provide a means for moving and placing heavy loads, many times with only one pick.

Enerpac offers three series of Hydraulic Gantry systems:

- the cost-effective SL-Series offers entry level control and capacity
- the heavy-duty SBL-Series offers capacities up to 1,200 tons and 3-stage lifting capability through the boom structure
- the MBL-Series incorporates all features of the SBL-Series and offers full lifting capacity over the full stroke. The MBL Gantries have been designed with increased footprint stability and can therefore lift using 2 legs as well as 4.

All Enerpac gantries are delivered with specific properties and control systems to ensure optimum stability and safety.

▼ Shown: HSL50006 Ton Strand Jack

- Full control of lifting and lowering through SCC control system
- Two sizes strand diameter: 0.62" (15.7mm) and 0.71" (18 mm)
- Complete line of electric and diesel power pumps
- Nickel plated telescopic pipes preventing bird caging
- Standard supplied with lifting anchor
- Automated locking – unlocking operation
- Special corrosion treated high endurance multi-use wedges
- Full range of accessories: strand dispenser, strand guide, re-coiler

HSL Series

Capacity:
17-1405 tons

A strand jack can be considered a linear winch. In a strand jack, a bundle of steel cables or strands are guided through a hydraulic cylinder. Above and below the cylinder are anchor systems with wedges that grip the strand bundle simultaneously, this is how the strand jack is able to carry a load. Lifting and lowering a load is achieved by hydraulically controlling the main jack and both mini jacks alternately.

Enerpac utilizes Smart Cylinder Control (SCC), ensuring full control of the lifting and lowering operation.

Today strand jacks are widely recognized as the most sophisticated heavy lifting solution. Strand jacks are used all over the world to erect bridges, load out offshore structures, and lift/lower heavy loads where the use of conventional cranes is neither economical nor practical.

◀ Shown: HSL85007.

▼ Shown: **HSK1250 Skidding System**

- **PTFE skid pads with dimpled surface for low friction and long lifetime**
- **Easy to replace skid pads, no tools necessary**
- **Unique gripper anchor system complete with lever for easy selection of skidding direction**
- **Double acting hydraulic cylinders with sufficient capacity in both push and pull direction. No need to turn the skid shoe for reverse skidding direction**
- **Large load support surface on the skid beam**
- **Bottom of skid shoes equipped with stainless steel sliding plates**

◀ Shown: **HSK1250**

HSK/HSKLH Series

Capacity:

140-280 tons

Stroke:

24 inches

The HSK skidding system is comprised of a series of skid-shoes powered by hydraulic push-pull cylinders, travelling over a pre-constructed track.

A series of special PTFE coated blocks are placed on the skid-tracks. The PTFE surface is matched with a sliding plate under the Enerpac skid shoes, designed to achieve minimum friction coefficients. The skid shoes are connected by hoses to a hydraulic electric or diesel driven power pack.

In addition to our standard skidding systems we have the capabilities to create customized skidding systems to meet your specific requirements.

Enerpac Skidding Systems are available in three versions:

- **HSK1250** with a capacity of 140 tons per skid unit
- **HSK2500** with a capacity of 280 tons per skid unit
- **HSKLH2000** with a capacity of 225 tons per skid unit and a lower collapsed height

The HSK1250 and HSK2500 skidding systems are available in two varieties: using a "skid shoe jack" or a "skid shoe beam". The skid shoe jack includes an integrated lifting cylinder. A skid shoe beam is designed for skidding purposes only.

To calculate the minimum required capacity per shoe, the entire load has to be able to rest safely on 2 of the 4 shoes. To skid a load of 500 tons, the required skidding system is **HSK2500**.

Self-Propelled Modular Trailer

▼ Shown: **SPMT600**

- **Multiple configurations possible**
- **Minimized height and slim design**
- **Intellidrive wireless control system**
- **One power pack per 3 trailers maximum**

SPMT Series

Capacity:

67 tons

Transport Speed:

2 mph (unloaded)

The Enerpac Self Propelled Modular Trailer features a minimized height and slim design, which make it very easy to operate in confined spaces. Each trailer has 3 axles. Each wheel unit has a steering as well as a lifting cylinder at its disposal. Wheel propulsion is accomplished by hydraulic propulsion. The power pack has a 55 hp tier 4 driven engine.

The SPMT is controlled by Intelli-drive, a wireless control system that allows the entire system to be operated by one person.

One of the unique features of the system is that it is able to be containerized. Two trailers and a power pack can be shipped inside a 20 ft. container.

◀ Shown: **SPMT600**

▼ **EVO-8** (shown with optional cylinders and wire stroke sensors)

- **Modular lifting system to control 4, 8 or 12 lifting points**
- **Can be networked to link up to 4 systems together (requires separate master control box)**
- **Intuitive user interface provides easy set-up and control with multiple lifting options**
- **Accuracy of 0.040" between leading and lagging cylinders**
- **Data storage and recording capabilities**
- **For use with standard single- or double-acting cylinders**
- **Built in warning and stop alarms for optimum safety**
- **Variable frequency electric motor for optimal flow control**
- **Two flow groups available to operate a wide range of cylinders**
- **EVO-B is a modular design allowing for use of existing Enerpac pumps**

EVO Series

Number of Lift Points:
4-12 points

Accuracy Over Full Stroke:
Up to 0.040"

Ease of Operation

- A single operator controls the entire operation
- User friendly interface: visual screens, icons, symbols and color coding

Enerpac's family of EVO synchronous lifting systems provides precision control and levels of force suitable for most lifting/lowering applications.

We can also provide custom systems tailored to unique project requirements.

The standard EVO system can support up to 12 lifting points, or be networked up to 48 points, and includes features such as center of gravity and tilting/weighing capabilities. It is a comprehensive self-contained design that features simple to use software that is extremely efficient at completing basic to complex applications.

The modular EVO-B system is a modular design that allows for utilization of existing Enerpac pumps. EVO-B offers an economical solution to basic applications requiring a maximum of 8 lifting points.

◀ Shown: EVO

When your application requires something other than our standard product offering, look to Enerpac's Integrated Solutions Team. Our group of Engineers, Designers and Specialist, will work with you to understand your specific application and provide a turn-key solution that will exceed your expectations.

STEEL FABRICATION

Enerpac has a dedicated facility for steel fabrication and welding. We design and manufacture custom structures used in demanding heavy-lifting applications.

ENGINEERING

Enerpac has a multi-disciplined engineering team capable of design and development of all aspects of an Integrated Solutions system. Leveraging design and application experience with the latest in computer software, rapid prototyping and analysis methods ensures delivery of the highest quality systems.

FIELD SUPPORT

Enerpac Integrated Solutions is available to provide on-site support including training and troubleshooting of systems. We also stock repair parts and consumable items at several locations to ensure fast delivery and minimal downtime.

ELECTRONICS

Enerpac designs all control systems in-house. This capability keeps control technology close to the design engineers who are developing the rest of the system. In doing so, we can tailor the control system to match unique project requirements.

HYDRAULIC POWER SUPPLIES

Enerpac designs, assembles and tests small to large hydraulic power units in-house. Power units range from 1/4 hp to 320 hp and are tested with the system they are intended to operate.

MACHINING

Enerpac utilizes the latest in CNC machining technologies and manufactures all large and special hydraulic cylinders in-house. We can machine diameters up to 50 inches with lengths to 240 inches.

MAINTENANCE and REPAIR

Due to the unique nature of Enerpac's Integrated Solutions systems, we offer complete maintenance and repair services. Our M&R group is available to assist customers who do not have access to local service facilities qualified to work on these systems.

SYNCHRONOUS HOISTING

A unique crane product for below-the-hook positioning of heavy loads that require precision placement. May reduce the number of cranes needed and reduce the costs for multiple picks.

STRAND JACK GANTRY

The strand jack gantry is a steel structure to facilitate erection and skidding back, forth and sideways of heavy loads. The Enerpac strand jack gantry allows you to operate in confined spaces.

This is powered by a hydraulic power unit that is situated on ground level. The capacity, height and width of the construction can be modified in cooperation with our engineering team.

The system consists of 3 major components:

- Steel Construction
- Strand Jacks for Vertical Lifting
- Skidding System for Horizontal Skidding

BRIDGE LAUNCHING

Providing a solution for the most complex and demanding bridge construction applications, Enerpac has over 20 years providing unique customer bridge launching systems.

SELF-ERECTING TOWER

The Enerpac Self Erecting Tower (ESET) is a self-erecting-tower-lift system that enables you to build a free standing gantry from ground level. The Self Erecting Tower can be supplied in various capacities and heights and is built with standard modular components, enabling a flexible solution to future project demands.

The Self Erecting Tower enables moving the load in all directions: lifting, lowering, skidding back and forth, and has side shift capabilities. Lifting and skidding are achieved using standard Enerpac strand jacks that can also be used for other applications.

The Self Erecting Tower is a versatile lift-system that can be used in a wide variety of operations, for example the installation of reactor vessels in a petrochemical plants or erecting a shipyard crane. When compared with large capacity cranes, the Self Erecting Tower significantly reduces transportation and set up costs.

▼ Shown: Mechanical Actuators

Precision Positioning and Control in a Mechanical Package

- Machine screw versions up to 250 tons for low-cycle, high-load applications and positive load holding
- Ball-Screw versions up to 100 tons for high-cycle, high-speed applications
- Electro-Mechanical Drive System can be interlinked and easily synchronized
- Precision rolled load screws Class 3 fit for additional strength
- Preloaded tapered roller bearings tolerate high thrust loads and minimize side loading
- Precision worm gear sets provide minimum backlash while reducing wear
- Wide variety of base mounting and screw end configurations

Maximize Your System Control

Custom control boxes designed to meet your specific application requirements.

System Accessories

Enerpac offers a large array of motors, drive components, and boots to meet any demanding project.

◀ *Uni-Lift® Actuators were the ideal choice to position and adjust the complex scaffolding for aircraft maintenance. Precision movement and flexibility was an asset in getting the job done efficiently and safely.*

Ball Screw Cutaway

Machine Screw Cutaway

Design Features:

- Available with translating, rotating and keyed load screw designs
- High-strength rolled load screws provides maximum durability
- Rugged aluminum alloy and ductile iron housings for demanding or rigorous environment
- Corrosion resistant zinc plating is standard on most units
- The widest range options gear ratios are available to meet all application requirements
- Speeds up to 175 inches per minute

Actuator Accessories:

- High-quality bellow boots for added loadscrew protection
- Easy mounting of optional screw ends are available in plain, top plate and clevis design
- Wide selection of motors and C-face adaptors
- Limit switches and encoders for complete system control
- Couplers and shafting available for individual system requirements
- A large choice of mitre gear boxes and reducers provide maximum system design flexibility
- Custom built control boxes to meet your specific need

Typical Mechanical Actuator Set-Up

B, M Series

Capacity:

.25-250 tons

Maximum Stroke:

15-230 inches

Types:

Machine & Ball Screw

Over-travel Stop Nuts provide a mechanical stop and are used to prevent the ejection of the power screw from the actuator.

CAD Modeling Software

Our experienced sales team and application engineers will deliver the precise support you need to meet the most demanding and unique requirements. State-of-the art CAD modeling software offers the needed flexibility to design custom built "special" screw jacks to suit all customer needs.

Engineers utilized two (2) Uni-Lift® 100-ton actuators with 15' of travel to raise and lower the ramp on each ferry dock along the Mississippi River, USA. The Department of Transportation engineers needed a way of lifting and lowering ramps during high and low tide conditions, while holding up to the harsh environmental conditions of the gulf coast.

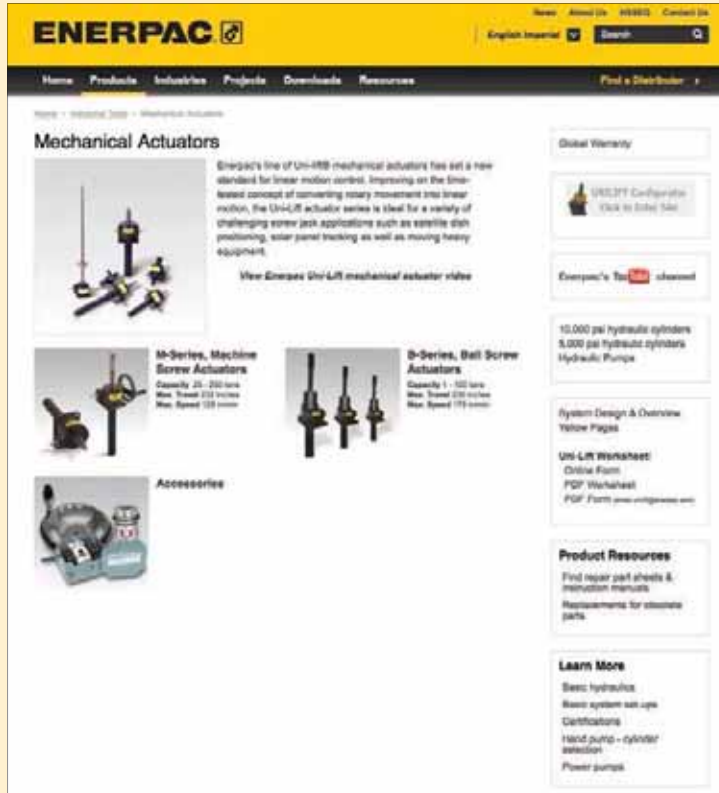

When engineers needed a quick and compact way of opening the large doors of these large plating tanks, they contacted Uni-Lift® for help. This application utilizes two 5-ton double-clevis actuators, with a motor and a limit switch box mounted on each actuator. The operator just pushes a button to open the doors, and pushes another button to close them. This method greatly enhances operator safety and helps prevent cross contamination between tanks.

Uni-Lift® screw jacks are used extensively in a variety of material handling applications. Whether used in positioning conveyor belts, placing tension on overhead beams or moving heavy-duty equipment, Uni-Lift® actuators are the ideal solution for many jackings, tensionings, and positioning applications. Whether you have one lifting point or multiple lifting points, Uni-Lift® actuators are the perfect solution for many different OEM motion control applications.

Configuring Your UNI-LIFT Actuator On-Line

www.enerpac.com/unilift for latest Enerpac Uni-Lift® information

Visit the Enerpac Web Site and use the UNI-LIFT® Configurator to properly select the type, ratio, and size of the machine or ball screw actuator for your application.

- Provides instant results that are downloadable in 2D and 3D CAD
- Configuration snapshot is generated from your selection input
- Supports imperial and metric units
- Informative help topics guide you through the entire process

Yellow Pages Overview

Enerpac "Yellow Pages" stand for Hydraulic Information!

If selecting hydraulic equipment is not your daily routine then you will appreciate these pages. The "Yellow Pages" are designed to help you work with hydraulics. They will help you to better understand the basics of hydraulics, of system set-ups and of the most commonly used hydraulic techniques. The better your choice of equipment, the better you will appreciate hydraulics. Take the time to go through these "Yellow Pages" and you will benefit even more from Enerpac High Pressure Hydraulics.

ENERPAC WARRANTY STATEMENT

www.enerpac.com

Visit our website for the complete Enerpac Global Warranty or call your Enerpac representative or Enerpac Authorized Service Center.

Enerpac is certified for several quality standards. These standards require compliance with standards for management, administration, product development and manufacturing.

Enerpac works hard to maintain the ISO 9001 quality rating, in its ongoing pursuit of excellence.

CE Marking & Conformity

Enerpac provides Declarations of Conformity, Declarations of Incorporation, and CE marking for products that conform to the European Community Directives.

Where specified, Enerpac electric power units meet the design, assembly and test requirements of The Standards Council of Canada (CAN C22.2 No. 68-92), and UL73 for the United States. Units were tested and certified for both USA and Canada by TUV, a nationally recognized testing laboratory.

EMC Directive 2004/108/EC

Where specified, Enerpac electric power pumps meet the requirements for Electromagnetic Compatibility per EMC Directive 2004/108/EC.

DEKRA & IBEx
ATP-1500, ZA and XA-Series air-motor driven pumps, and S- and W-Series Torque Wrenches are tested and certified according to the Directive 94 / 9 / EC "ATEX Directive". The explosion protection is for equipment group II, equipment category 2 (hazardous area zone 1), in gas and/or dust atmospheres. ATP-1500, ZA and XA-Series pumps are marked with: Ex II 2 GD ck T4.

ASME B30.1-2004

Our cylinders fully comply with the criteria set forth by the American Society of Mechanical Engineers (except RD, BRD, CLL, CLS and CLP-Series).

DIN 20024

Enerpac thermoplastic hoses are related to the criteria set forth in Deutsche Industrie Norm 20024.

Product Design Criteria

All hydraulic components are designed and tested to be safe for use at maximum 10,000 psi unless otherwise specifically noted.

Safety Instructions

- Lift slowly and check often
- Avoid standing in the line of force
- Anticipate possible problems and take steps to avoid them

When used correctly, hydraulic power is one of the safest methods of applying force to your work. To that end we offer some DO's and DON'Ts, simple common sense points which apply to practically all Enerpac hydraulic products.

The illustrations and application photos of Enerpac products throughout this catalog are used to portray how some of our customers

have used hydraulics in industry. In designing similar systems, care must be taken to select the proper components that provide safe operation and fit your needs. Check to see if all safety measures have been taken to avoid the risk of injury and property damage from your application or system. Enerpac cannot be held responsible for damage or injury caused by unsafe use, maintenance or application of its products.

Please contact the Enerpac office or a representative for guidance when you are in doubt as to the proper safety precautions to be taken in designing and setting up your particular system.

In addition to these tips, every Enerpac product comes with specific safety information and instructions. Please read them carefully.

Provide a level and solid support for the entire jack base area.

The entire jack saddle must be in contact with the load. Movement of the load must be in the same direction as jack plunger.

Never place any part of your body under the load. Ensure the load is on a solid support before venturing under.

Remove the jack handle when it is not being used.

Cylinders

Provide a solid support for the entire cylinder base area. Use cylinder base attachment for more stability.

The entire cylinder saddle must be in contact with the load. Movement of the cylinder must be parallel with the movement of the load.

Do not use cylinder without saddle. This will cause plunger to "mushroom". Saddles distribute load evenly on the plunger.

As with jacks, never place any part of your body under the load. Load must be on cribbing before venturing under.

Always protect cylinder threads for use with attachments.

Keep hydraulic equipment away from open fire and temperatures above 150 °F (65 °C).

General

80% Manufacturer's rating of load and stroke are maximum safe limits. **80%**
Good practice encourages using only 80% of these ratings!

Always read instructions and safety warnings that come with your Enerpac hydraulic equipment.

Don't override the factory setting of relief valves. Always use a gauge to check system pressure.

Pumps

Don't use handle extenders. Hand pumps should be easy to operate when used correctly.

Close release valve finger tight. Using force will ruin the valve.

Fill pump only to recommended level. Fill only when connected cylinder is fully retracted.

Always use genuine enerpac hydraulic oil.

Hoses and couplers

Clean both coupler parts before connecting. Use dust caps when coupler parts are not connected.

Detach cylinder only when fully retracted or use shut-off valves or safety valves to lock-in cylinder pressure.

Keep hoses away from the area beneath loads.

Don't kink hoses. Bending radius should be at least 4 1/2 inch. Don't drive over or drop heavy objects on hoses.

Don't lift hydraulic equipment by the hoses.

Never allow the cylinder to be lifted off of the ground through the couplers.

▼ HAND PUMP AND SINGLE-ACTING CYLINDER MATCHING CHART

	Including coupler model:			<input type="text"/>

Pump Selection

The three most commonly selected pumps are hand pumps, electric pumps and air-driven pumps. Gas powered pumps, however can be selected in the same way.

Available power source: Manual Battery Electric Compressed Air Gasoline

Hand pump
Single- or double-acting operation

Not for high-cycle applications
Use 4-way valve for D/A applications
Check speed chart on page 251 for number of strokes per inch

Selected hand pump:

Electric or compressed air pump

Need for portability:
Duty cycle:
Required usable oil capacity:

Weight and power requirements
Intermittent or extended
Intermittent = 1.2 x cylinder oil capacity
high cycle = 2 x cylinder oil capacity

Available voltage:
Lifting speed (Important/not important): Use speed chart on page 251
Type of control:
Type of actuation/function:
Accessories:

Single phase or Three phase
Manual/remote pendant
Advance/hold/retract
Roll bar, Oil Filter kit, ...

Selected pump:

To suit hose: Oil connection

System Components

Number of hoses and length required:

Selected hoses:

Manifold or tee:
Extra hose per manifold (2):
Gauge (psi, lbs or tons scale):
Gauge adaptor:
Fittings:
Pressure relief safety valve:
Load-holding valve(s):
Hydraulic oil:

Glycerine for high cycle

- 1 Cylinder**
Applies hydraulic force.
Page 5
- 2 Cylinder Base Plate**
For applications such as lifting where additional cylinder stability is required.
Page 10
- 3 Pump**
Provides hydraulic flow.
Page 56
- 4 Hose**
Transports hydraulic fluid.
Page 114-115
- 5 Male Coupler**
For quick connection of the hose to system components.
Page 116-117
- 6 Female Coupler**
For quick connection of the hose end to the system components.
Page 116-117
- 7 Gauge**
To monitor pressure of the hydraulic circuit.
Page 120-123
- 8 Gauge Adaptor**
For quick and easy gauge installation.
Page 126
- 9 Swivel Connector**
Allows proper alignment of valves and/or gauges. Used when units being connected cannot be rotated.
Page 127
- 10 Auto-damper Valve V-10**
Used to protect gauge from damage due to sudden pulses in the system. Needs no adjustment and allows correct positioning of gauge, prior to tightening.
Page 129

Single-acting push application, such as in a press.
The hand pump offers controlled cylinder advance, but may require many hand pump strokes in longer stroke applications when the cylinder capacity is 25 ton or above.

Examples of pump, hose and cylinder sets can be found on page 55.

Single-acting cylinder with longer stroke used for lifting applications.

Double-acting cylinder set-up used for lifting applications where a slow controlled descent of the load must be maintained.

Double-acting cylinder set-up used in a push/pull application.

11 4-Way Directional Control Valve
Controls the direction of hydraulic fluid in a double-acting system.
Page 106

12 3-Way Directional Control Valve
Controls the direction of hydraulic fluid in a single-acting system.
Page 106

13 Safety Holding Valve
Controls load descent in lifting applications.
Page 129

14 Manifold
Allows distribution of hydraulic fluid from one power source to several cylinders
Page 118

15 Needle Valve
Regulates the flow of hydraulic fluid to or from the cylinders.
Page 129

Two point lifting set-up using single-acting cylinders.

www.enerpac.com
Visit our web site to learn more about hydraulics and system set-ups.

Four point lifting set-up, using single-acting cylinders, flow control valves and safety valves.

Flow

A hydraulic pump produces flow

Pressure

Pressure occurs when there is resistance to flow

Pascal's Law

Pressure applied at any point upon a confined liquid is transmitted undiminished in all directions (Fig.1).

This means that when more than one hydraulic cylinder is being used, each cylinder will lift at its own rate, depending on the force required to move the load at that point (Fig. 2).

Cylinders with the lightest load will move first, and cylinders with the heaviest load will move last (Load A), as long as the cylinders have the same capacity.

Figure 1

To have all cylinders operate uniformly so that the load is being lifted at the same rate at each point, either control valves (see Valve section) or Synchronous Lift System components (see Cylinder section) must be added to the system (Load B).

CAUTION!

When lifting or pressing, always use a gauge.

A gauge is your "window" to the system. It lets you see what's going on. You will find the gauges in the System Components section.

Learn more about hydraulics

Visit www.enerpac.com to learn more about hydraulics and system set-ups.

Force

The amount of force a hydraulic cylinder can generate is equal to the hydraulic pressure times the “effective area” of the cylinder (see cylinder selection charts).

Force	=	Hydraulic Working Pressure	x	Cylinder Effective Area
-------	---	----------------------------	---	-------------------------

F	=	P	x	A
---	---	---	---	---

Use this formula to determine either force, pressure or effective area if two of the variables are known.

Example 1

An RC-106 cylinder with 2.24 in² effective area operating at 8,000 psi will generate what force?
Force = 8,000 psi x 2.24 in² = 17,920 lbs.

Example 2

An RC-106 cylinder lifting 14,000 lbs will require what pressure?
Pressure = 14,000 lbs ÷ 2.24 in² = 6,250 psi.

Example 3

An RC-256 cylinder with 5.15 in² effective area is required to produce a force of 41,000 lbs. What pressure is required?
Pressure = 41,000 lbs. ÷ 5.15 in² = 7961 psi.

Example 4

Four RC-308 cylinders each with 6.49 in² effective area are required to produce a force of 180,000 lbs. What pressure is required?
Pressure = 180,000 lbs ÷ (4 x 6.49 in²) = 6933 psi.
 Remember, since four cylinders are used together, the area for one cylinder must be multiplied by the number of cylinders used.

Example 5

A CLL-2506 cylinder with 56.79 in² effective area is going to be used with a power source that is capable of 7,500 psi. What is the theoretical force available from that cylinder?
Force = 7,500 psi x 56.79 in² = 425,925 lbs.

Cylinder Oil Capacity

The volume of oil required for a cylinder (cylinder oil capacity) is equal to the effective area of the cylinder times the stroke*.

Cylinder Oil Capacity	=	Cylinder Effective Area	x	Cylinder Stroke
-----------------------	---	-------------------------	---	-----------------

Example 1

An RC-158 cylinder with 3.14 in² effective area and an 8 in. stroke will require what volume of oil?
Oil Capacity = 3.14 in² x 8 in = 25.12 in³

Example 2

An RC-5013 cylinder has an effective area of 11.05 in² and a stroke of 13.25 in. How much oil will be required?
Oil Capacity = 11.05 in² x 13.25 in = 146.41 in³

Example 3

An RC-10010 cylinder has an effective area of 20.63 in² and a stroke of 10.25 in. How much oil will it require?
Oil Capacity = 20.63 in² x 10.25 in = 211.46 in³

Example 4

Four RC-308 cylinders are being used, each with an effective area of 6.49 in² and stroke of 8.25 in. How much oil will be required?
Oil Capacity = 6.49 in² x 8.25 in = 53.54 in³ for one cylinder
 Multiply by four to obtain the required capacity: 214.17 in³

* Note: these are theoretical examples and do not take into account the compressibility of oil under high pressure.

Enerpac oil will compress 2.28% at 5,000 psi and 4.1% at 10,000 psi.

Key to cylinder dimensions

Dimensions shown in the Selection Charts of the cylinder section are identified on the relevant drawings by the capital letter references listed here: A for collapsed height through Z for depth of internal base thread.

- A = Collapsed height
- B = Extended height
- C = Cylinder body length
- D = Cylinder outside diameter
- D1 = Cylinder width
- E = Cylinder inside diameter (bore)
- F = Plunger rod diameter
- G = Oil inlet thread

- H = Cylinder bottom to advance port
- I = Cylinder top to retract port
- J = Saddle outside diameter
- K = Cylinder rod protrusion at collapsed height
- L = Plunger center to side of base
- M = Mounting holes to plunger center
- N = Length of smaller cylinder part
- O = Plunger hole or thread of saddle
- P = Plunger thread length
- Q = Plunger outside thread (pull cylinders only)
- U = Bolt circle diameter of mounting holes
- V = Thread of cylinder mounting holes
- W = Collar thread
- X = Collar thread length
- Y = Center hole diameter (hollow cylinders only)
- Z = Depth of internal base thread

Key to measurements

All capacities and measurements in the catalog are expressed in uniform values.

The conversion chart provides helpful information for their translation into equivalent systems.

You can also visit our website at www.enerpac.com to download Conpaq, a FREE conversion calculator.

Pressure:

- 1 psi = .069 bar
- 1 bar = 14.50 psi
- 1 kPa = .145 psi

Volume:

- 1 in³ = 16.387 cm³
- 1 cm³ = .061 in³
- 1 liter = 61.02 in³
- 1 liter = .264 gal
- 1 US gal = 3,785 cm³
- = 3.785 l
- = 231 in³

Weight:

- 1 pound (lb) = .4536 kg
- 1 kg = 2.205 lbs
- 1 metric ton = 2,205 lbs
- 1 ton (short) = 2,000 lbs
- 1 ton (short) = 907.18 kg

Temperature:

- To convert °F to °C:
 $T_c = (T_f - 32) \div 1.8$
- To convert °C to °F:
 $T_f = (T_c \times 1.8) + 32$

Other measurements:

- 1 in = 25.4 mm
- 1 mm = .039 in
- 1 in² = 6.452 cm²
- 1 cm² = .155 in²
- 1 hp = .735 kW
- 1 kW = 1.359 hp
- 1 Nm = .73756 Ft.lbs
- 1 Ft.lbs = 1.355818 Nm

Imperial to metric

Inches	Decimal	mm
1/16	.06	1.59

Cylinder Speed Charts

Cylinder Speed

This chart will help you calculate the time required for an Enerpac cylinder to lift a load when powered by a 10,000 psi Enerpac hydraulic pump.

The Cylinder Speed Chart can also be used to determine the pump type and model best suited for an application when you know the plunger speed required.

To determine:

Cylinder plunger speed

An RC-308 cylinder (30 ton) is powered by a ZE-5 pump. While lifting the load, the cylinder plunger will require 3.2 seconds to travel 1 inch.

25 ton		30 ton		50 ton		75 ton		100 ton		Pump Type
No Load	Load	No Load	Load	No Load	Load	No Load	Load	No Load	Load	
15	15.9	1.9	1.1	3.3	3.2	4.8	4.7	6.2	6.1	0.5 hp Economy

6.2	38.8	7.8	48.7	13.3	82.9	19.1	119.3	24.8	154.7	PA-133
48	34.3	6.0	43.3	1.0	73.7	1.5	106.8	1.9	137.5	PAM 10-Series
36	3.9	4.6	4.9	.76	3.3	1.1	11.9	1.5	15.5	Z4 Series
15	1.7	1.9	2.7	3.3	16.6	4.8	23.9	6.2	30.9	PGM2 Atlas
0.44	3.1	0.58	3.9	0.95	6.6	1.4	9.5	1.8	12.4	ZG5 Series, Briggs
0.77	3.1	0.97	3.9	1.7	6.6	2.4	9.5	3.1	12.4	ZG5 Series, Honda
0.34	1.5	0.43	1.9	0.74	3.3	1.1	4.8	1.4	6.2	ZG6 Series

While extending towards the load, the cylinder plunger travels at .46 sec/in.

To determine:

Best matching pump

Your 30 ton cylinder needs to move a load at a speed of 6.50 sec/in. Simply go down from the top of the chart, to the value of 6.50 sec/in. Then follow the chart to the right to find that

the ZE4 pump or ZU4 is most suitable for your application.

No Load indicates the plunger speed as the plunger extends toward the load (1st stage).
Load indicates the plunger speed as the load is lifted at a system pressure of 10,000 psi (2nd stage).

Formula V = A ÷ Q

V (sec/in) = **A** (in²) ÷ **Q** (in³/min)

V = Cylinder plunger speed in seconds per inch

A = Cylinder effective area in square inches

Q = Pump oil flow in cubic inches

Example

At what speed (V) will the RC-308 (30 ton) cylinder move when powered by a ZE3 electric driven pump?

ZE3 pump:
Oil flow Q, (no load) is 450 in³/min

RC-308 cylinder:
Effective area A is 6.50 in²

V = 6.50 in² ÷ 450 in³/min x 60 = .87 sec/in

$$\text{Cylinder Plunger Speed (sec/in)} = \frac{\text{Cylinder Effective Area}}{\text{Pump Flow Rate}} \times \frac{60 \text{ sec}}{1}$$

Valve Information

Ways

The (oil) ports on a valve.

A 3-way valve has 3 ports:

pressure (P), tank (T), and cylinder (A).

A 4-way valve has 4 ports:

pressure (P), tank (T), advance (A) and retract (B).

Single-acting cylinders require at least a 3-way valve, and can, under certain instances, be operated with a 4-way valve.

Double-acting cylinders require a 4-way valve, providing control of the flow to each cylinder port.

Positions

The number of control points a valve can provide. A 2-position valve has the ability to control only the advance or retraction of the cylinder. To be able to control the cylinder with a hold position, the valve requires a 3rd position.

Center Configuration

The center position of a valve is the position at which there is no movement required of the hydraulic component, whether a tool or cylinder.

The most common is the **Tandem Center**. This configuration provides for little to no movement of the cylinder and the unloading of the pump. This provides for minimum heat build-up.

The next most common is the **Closed Center** configuration, which is used mostly for independent control of multi-cylinder applications. This configuration again provides for little to no movement of the cylinder, but also dead-heads the pump, isolating it from the circuit. Use of this type of valve may require some means of unloading the pump to prevent heat build-up.

There are many more types of valves, such as Open Center and Float Center. These valves are used mostly in complex hydraulic circuits and require other special considerations.

Open Center

Float Center

Directional Control Valves

3-Way Valves

are used with single-acting cylinders

4-Way Valves

are used with double-acting cylinders

Valves may be either pump mounted or remote mounted.

Pump Mounted

Remote Mounted

Valves may be either manually or solenoid operated.

Manually Operated

Solenoid Operated

Advance Hold Retract

Single-acting cylinder

Controlled by a 3-way, 3-position valve.

Advance

The oil flows from the pump pressure port P to the cylinder port A: the cylinder plunger will extend.

Hold

The oil flows from the pump pressure port P to the tank T. The cylinder port A is closed: the cylinder plunger will maintain its position.

Retract

The oil flows from the pump port P and cylinder port A to the tank T: the cylinder plunger will retract.

Double-acting cylinder

Controlled by a 4-way, 3-position valve.

Advance

The oil flows from the pump pressure port P to the cylinder port A, and from cylinder port B to tank T: the cylinder plunger will extend.

Hold

The oil flows from the pump pressure port P to the tank T. The cylinder ports A and B are closed: the cylinder plunger will maintain position.

Retract

The oil flows from the pump pressure port P to cylinder port B, and from cylinder port A to tank T: the cylinder plunger will retract.

Tightening Methods

Principally there are two modes of tightening: "Uncontrolled" and "Controlled".

Uncontrolled tightening

Uses equipment and/or procedures that cannot be measured. Preload is applied to a bolt and nut assembly using a hammer and spanner or other types of impact tools.

Controlled tightening

Employs calibrated and measurable equipment, follows prescribed procedures and is carried out by trained personnel.

For further information on Torque Tightening or other controlled tightening methods, please visit www.enerpac.com.

Advantages of Controlled Tightening

Known, controllable and accurate bolt loads

Employs tooling with controllable outputs and adopts calculation to determine the required tool settings.

Safe operation following prescribed procedures

Eliminates the dangerous activities of manual uncontrolled tightening and requires that the operators be skilled and follow procedures.

Reliable and repeatable results

Using calibrated, tested equipment, following procedures and employing skilled operators achieves known results consistently.

Uniformity of bolt loading

Especially important on gasketed joints as an even and consistent compression is required for the gasket to be effective.

Reduces operational time resulting in increased productivity

Reduces tightening time and operator fatigue by replacing manual effort with the use of controlled tooling.

The right results first time

Many of the uncertainties surrounding in-service joint failures are removed by ensuring the correct assembly and tightening of the joint are carried out the first time.

What is Torque?

It is a measure of how much force acting on an object which causes that object to rotate.

What is Torque Tightening?

The application of preload to a fastener by the turning of the fastener's nut.

Torque Tightening and Preload

The amount of preload created when torqueing is largely dependant on the effects of friction.

Principally there are three different "torque components":

- torque to stretch the bolt
- torque to overcome the friction in bolt and nut threads
- torque to overcome friction at the nut spot face (bearing contact surface).

Torque Tightening

Visit www.enerpac.com to access our free on-line bolting software application and obtain information on tool selection, bolt load calculations and tool pressure settings.

A combined application data sheet and joint completion report is also available.

Torque Tightening

Friction points should always be lubricated when using the torque tightening method.

Preload (residual load) = Applied Torque *minus* Frictional Losses

Lubrication Reduces Friction

Lubrication reduces the friction during tightening, decreases bolt failure during installation and increases bolt service life. Variation in friction coefficients affect the amount of preload achieved at a specified torque. Higher friction results in less conversion of torque to preload. The value for the friction coefficient provided by the lubricant manufacturer must be known to accurately establish the required torque value.

Lubricant or anti-seizure compounds should be applied to both the nut bearing surface and the male threads.

Frictional Losses

Frictional Losses (dry steel bolt)

Select the Right Wrench

Choose your Enerpac torque wrench using the untightening rule of thumb:

- When loosening a nut or bolt more torque is usually required than when tightening.
- For general conditions it can take up to 2½ times the input torque to breakout.
- Do not apply more than 75% of the maximum torque output of the tool when loosening nuts or bolts.

Conditions of bolted joints

- Humidity corrosion (rust) requires up to twice the torque required for tightening.
- Sea water and chemical corrosion requires up to 2½ times the torque required for tightening.
- Heat corrosion requires up to 3 times the torque required for tightening.

Breakout Torque

When loosening bolts a torque value higher than the tightening torque is normally required. This is mainly due to corrosion and deformations in the bolt and nut threads.

Breakout torque cannot be accurately calculated, however, depending on conditions it can take up to 2½ times the input torque to breakout.

The use of penetrating oils or anti-seize products is always recommended when performing breakout operations.

Torque Procedure

When torquing it is common to tighten only one bolt at a time, this can result in Point Loading and Load Scatter. To avoid this, torque is applied in stages following a prescribed pattern:

Torque Sequence

- Step 1** Spanner tight ensuring that 2 - 3 threads extend above nut
- Step 2** Tighten each bolt to one-third of the final required torque following the pattern as shown above.
- Step 3** Increase the torque to two-thirds following the pattern shown above.

- Step 4** Increase the torque to full torque following the pattern shown above.
- Step 5** Perform one final pass on each bolt working clockwise from bolt 1, at the full final torque.

ENERPAC manufactures high-force hydraulics (cylinders, pumps, valves, presses, pullers, tools, accessories and system components) for industry and construction and provides hydraulic workholding and OEM solutions to industries worldwide.

With an 80-year history of quality and innovation, the broadest line in the business, and more than 4,000 distributors and factory-trained service centers around the world, Enerpac leads the industry by setting new standards in design, strength, durability and local support. Strict quality programs, zero tolerance for defects, and ISO-9001 certification are your assurance of safe, trouble-free operation.

Enerpac is ready to tackle your toughest challenge and provide the hydraulic advantage you need to increase productivity, labor efficiency and speed of operation.

Enerpac catalogs/brochures to meet your needs:

To obtain your copy just give us a call, or visit our Internet site **www.enerpac.com**

E412, Bolting Solutions Catalog: Caters to the complete bolting workflow, ensuring joint integrity in a variety of applications throughout industry, including: joint assembly, controlled tightening and joint separation.

E215, Workholding Catalog: Offers innovative products and solutions to provide powerful clamping and positioning force to every type of manufacturing process. Enerpac Workholding solutions increase product quality and production output.

Integrated Solutions Capability Brochure

Enerpac's "Integrated Solutions" (IS) provides solutions to meet customer requirements for safe, precise control of movement and positioning of heavy loads. Enerpac IS combines hydraulics, steel fabrication and electronic control with engineering and application knowledge, to design and manufacture solutions that ensure customer projects are completed safely and efficiently. (#655)
