

## 80742 & 80728 Master Bit Socket Sets

### SPEED

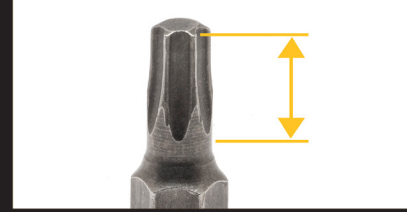

Large hard stamped identification and double line (SAE) and knurled line (metric) to easily identify SAE vs. metric sockets.

### STRENGTH

S2 steel insert bits and heat treated socket bases exceed ASME proof torque requirements for durability.

### ACCESS

Bit sockets meet insertion depth requirements to ensure correct engagement with the fastener

• Professional, full polish chrome

• Black oxide anti-corrosion coating
