

48" Professional Drywall T-Square

Measure, mark and cut drywall accurately and quickly with the Empire® Level 47-7/8-Inch Professional Drywall T-Square. Designed for professional use, the tool features large, bold graduations and numbers that are easily visible for increased accuracy when taking measurements. The Empire Level 48-inch professional drywall T-square has an anodized aluminum finish that helps ensure its durability and long-lasting use. With a heavy-duty 3/16-inch thick design, it also resists breaking and bending, even when accidentally dropped on the job site. For improved accuracy and easier marking of drywall, the Empire Level aluminum drywall T-square has a patented rivet design that helps ensure the joint of the head and blade are permanent and secure. With its silver background, the bold, black graduations and numbers stand out for easy visibility.
