

## Pocket Level

The Milwaukee® Pocket Level offer users a compact, yet heavy duty alternative to current protractors and angle finders, while also functioning as a traditional pocket level for quick checks. Amplified Rare Earth Magnet Technology utilizes magnetic circuits to redirect and focus the magnetic field for industry-leading holding power. Providing functionality similar to a protractor, a Locking 360° Adjustable Vial secures the vial in place so users can identify and repeat any angle needed. A locking screw protects the accuracy of the vial whether it's taken in and out of pockets or pouches. SHARPSITE™ Vial Technology magnifies the bubble so it's easier to read, and the vial is engineered with high-impact acrylic for ultimate durability that will protect accuracy over the life of the level.

## INCLUDES:

[\(1\) Pocket Level \(48-22-5102\)](#)

## FEATURES:

- Amplified Rare Earth Magnets: 2X Holding power on metal jobsite material
- Rotating vial allows users to set and identify any angle
- Locking feature ensures all day accuracy at any angle while level is taken in an out of pockets and pouches
- Heavy duty die cast construction ensures maximum durability when dropped
