PROFESSIONAL TOOL

## TOOL STORAGE

For a professional tool user, a toolbox is more than a metal bin. It's a source of pride and a key to productivity – a way to make sure that tools are secure and organized, and easy to find when needed. A pro also needs a tool storage system that stands up to the heaviest use in the harshest environments. After all, a day at work may require a drawer to keep working smoothly after having a 12-pound combination wrench dropped into it when fully open. Or it could require a frame to stay stiff and square after being rolled across a bumpy flight line.

We engineer every item in the Stanley® Proto® Professional Tool Box Line to exceed these expectations.

Proto® tool boxes come in 440SS Standard Duty and 450HS Heavy Duty models. The "standard" we set for our Standard Duty models is of rugged durability and exceptional value. We build all of our housings with thick gauge steel top and bottom panels, then coat them with a smooth electrocoat finish that won't lose its luster. We include heavy steel drawer fronts and bodies that are unlikely to dent when that tossed wrench misses its mark, as well as full extension drawers with ball bearing slides that move smoothly under the heaviest loads. We build diagonal reinforcing bars into the bottom of

our wheeled cabinets, and put a 2-in. wide steel lip around the top edge to keep the housing from twisting and the corners from cracking under the stress of moving.

For our most demanding customers, Heavy-Duty series cabinets have thick steel housings on all sides, as well as high capacity drawer slides and shock-absorbing casters that smooth out bumps and make it easier to move on rough surfaces.

The Proto® line includes stationary tool chests, mobile work stations, and upright cabinets for various combinations of drawer storage, bulk storage, and work-benching. The selection of sizes and configurations is broad enough to meet almost any need, with storage capacities ranging from 2000 to over 36000 cubic inches, and with the drawer combinations most commonly used in the industries we serve. All are designed to make every bit of internal space available for storage.

Strong, organized, efficient, ready to tackle the toughest of tasks. Those qualities make our toolboxes a reflection of the people they serve.

# PRODUCT FEATURES AND BENEFITS

## 450HS HEAVY DUTY SERIES TOOL BOXES

- 14 or 16 gauge steel housings.
- Powder coat finish.
- Heavy duty tubular locks.
- 125 or 200lb. capacity ball bearing drawer slides.
- 6" x 2" casters with 700lbs. capacity each.
- Colors available: Red, Black (MTO), Blue (MTO), Yellow (MTO).

## 440SS STANDARD DUTY SERIES TOOL BOXES

- 16 gauge steel top and bottom panels, 18 gauge side housings.
- Electrocoat finish.
- Key locks.
- 100lb. capacity ball bearing drawer slides.
- 5" x 2" casters with 450lbs. capacity each.
- Colors available: Red, Black (MTO).

## 450HS AVAILABLE ACCESSORIES

- Wood tops available for some models.
- Side Shelf available.
- 6" x 2" spring loaded casters.

## 440SS AVAILABLE ACCESSORIES

- Wood top (27" cabinet only).
- Side Shelf available.
- 6" x 2" hard rubber casters.
- Slip-resistant drawer liners.

STANLEY

**PROTO**<sup>®</sup>

## TOOL BOX PRODUCT NUMBER IDENTIFICATION

Proto's item numbering system for tool boxes is designed to make it easy for users to identify the box that has the size and drawer configuration that best meets their needs.

**Example:** J 44 2742 - 4 RD - D

### Part Number Key

- Series of Tool Box
- Width and Height
- # of Drawers
- Cabinet Color
- Special Feature

### Special Feature Code

- D = Drop Front
- IC = Intermediate Chest
- SC = Side Cabinet
- LK = Locker
- 1S = 1 Shelf
- 2S = 2 Shelf

## SAFETY TIPS

- Do not open more than one loaded drawer at a time.
- Do not overload drawers.
- Always push a tool cabinet. Do not pull.
- Lock all drawers before moving the tool cabinet.

## TOOL ROLLS

- Made of red nylon material for durability and flexibility.
- Stitched and reinforced edges for strength.
- Clear tool slots for easy viewing.
- Tie strap closure.

- Do not move a tool cabinet that has loose tools or tools stacked on top of it.
- Set the brakes on the locking casters after moving the cabinet to the work area.
