

## CP505E-12 Electronic Combination Protractor

### Work Faster and Reduce Errors

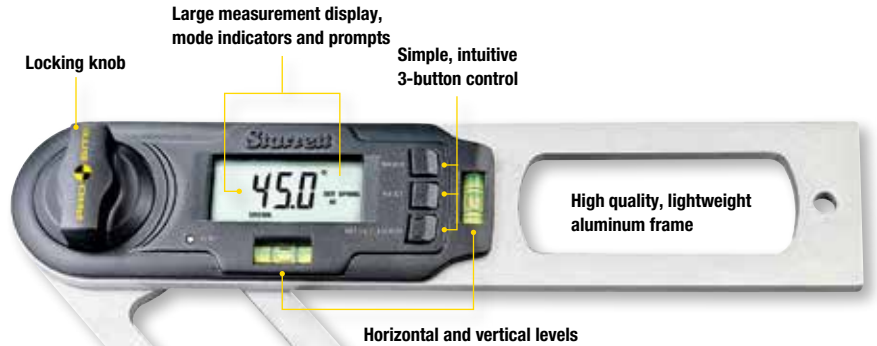

The CP505E-12 Electronic Protractor is a powerful, multi-function tool that takes the guesswork and errors out of a variety of jobs.

It is easy to use, featuring a step-by-step guide for crown molding work. It performs all of the calculations to help you work faster and reduce the cost of ruined material and rework.

Built on the same design principals as other 505s, this high quality tool is compact and lightweight with smooth and precise movement of the arms.

### Features

- Large, easy-to-read LED display
- Simple 3-button control with all modes clearly designated in the display
- Displayed Miter Cut value is the actual saw setting
- Displayed Single Cut value is the saw setting for butt joints
- Full 360° swing protractor toggles between 0° to 360°, 0-180-0° and 180-0-180°
- Step-by-step guide for crown molding work
- Calculations done by tool
- Spring angle presets for 38°, 45°, or 52° plus the ability to measure and calculate miter and bevel settings for custom angles
- Horizontal and vertical level vials
- Knob to lock measurements
- Includes durable storage pouch
- Included manual details stock layout, miter and bevel settings for all inside and outside crown molding cuts

Setting a miter cut.
